PROPOSED WESTBOUND CROSS SECTION

Looking East

EXISTING WESTBOUND CROSS SECTION

Looking East

MINIMUM CONSTRUCTION CLEARANCES

(Normal to Railroad)

NOTES

The protective shield shall extend perpendicular from the railroad tracks at least 18 feet beyond the centerline of tracks.

The quantity of Protective Shield represents the quantity for four installations and removals, which are one installation and removal for deck and superstructure removal over UP railroad tracks, one installation and removal for deck and superstructure removal over CC&P railroad tracks, one installation and removal for proposed deck construction over UP railroad tracks, and one installation and removal for proposed deck construction over CC&P railroad tracks. Each installation of Protective Shield shall be measured for payment. Removal of Protective Shield shall not be measured for payment.

The Protective Shield shall be designed for a live load not less than 200 pounds per square foot.

If the Contractor intends to use cantilever forming brackets on the exterior beams for the protective shield, the beams shall be adequately braced to prevent twisting.
