

Illinois Department of Transportation

2300 South Dirksen Parkway / Springfield, Illinois / 62764

January 8, 2014

SUBJECT: FAU 168 (Johnsburg Road)
Project TE-CMM-4003(205)
Section 05-00314-03-WR
McHenry County
Contract No. 63870
Item 138
January 17, 2014 Letting
Addendum (A)

NOTICE TO PROSPECTIVE BIDDERS:

Due to clarify information necessary to revise the following:

- 1. Replaced the Schedule of Prices.**
- 2. Revised page 3 of the Index to the Special Provisions.**
- 3. Revised page 54 of the Special Provisions.**
- 4. Added page 56A to the Special Provisions.**
- 5. Revised plan sheets 4-8, 18-20, 27, 29-33, 35, 38-49, 51, 55, 57, 59, 61, 65, 75, 81, 83, 88, 100 & 118.**

Prime contractors must utilize the enclosed material when preparing their bid and must include any Schedule of Prices changes in their bidding proposal.

Bidders using computer-generated bids are cautioned to reflect any and all Schedule of Prices changes, if involved, into their computer programs.

Very truly yours,

John Baranzelli, P.E.
Acting Engineer of Design and Environment

A handwritten signature in cursive script, reading "Ted B. Walschleger P.E.", with a small "P.E." to the right.

By: Ted B. Walschleger, P.E.
Engineer of Project Management

Revise the second paragraph of Article 1066.05 to read:

"The tape shall have reinforced metallic detection capabilities consisting of a woven reinforced polyethylene tape with a metallic core or backing."

MODIFY EXISTING LIGHTING CONTROLLER

Description: The work shall consist of upgrading the existing 100A lighting controller to a 200A lighting controller. This item shall include removal of the existing equipment to be replaced, furnishing the proposed equipment and installation of the proposed equipment as identified herein.

General: The removal work shall include disconnection and removal of the main circuit breaker and contactor. The Contractor shall be responsible for repairing or replacing any items of equipment damaged during this process to the satisfaction of the Engineer. The proposed 200A main circuit breaker and 200A contactor shall be provided in accordance with Sections 1068.01 (e) (3) and (4) of the Standard Specifications. The Contractor shall confirm the dimensions of the existing breaker and contactor and make adjustments if necessary to accommodate the proposed circuit breaker and contactor with their dimensions. This work shall be included in this pay item.

Each of the electrical components and parts shall be assembled in a neat orderly fashion. All electrical cables shall be reconnected in a neat professional manner. The cables shall be trained in straight horizontal and vertical directions and be parallel, next to, and adjacent to other cables whenever possible.

This replacement work shall be done in a manner that will not disrupt the night time operation of the existing lighting system.

Basis of Payment: This work will be paid for at the contract unit price per each **MODIFY EXISTING LIGHTING CONTROLLER**. All parts, labor and equipment required for the completion of this work shall be included in this pay item.

LUMINAIRE (SPECIAL)

This item shall conform to Section 821 of the Standard Specifications except as shown in the contract plans or stated below.

Add the following to first paragraph of Article 1067(c) of the Standard Specifications:

"The reflector shall not be altered by paint or other opaque coatings which would cover or coat the reflecting surface. Control of the light distribution by any method other than the reflecting material and the aforementioned clear protective coating that will alter the reflective properties of the reflecting surface is unacceptable"

Add the following to Article 1067(e) (4) of the Standard Specifications:

Pulse Start Metal Halide. The ballast shall be a Pulse Start Metal Halide, high power factor, constant wattage auto-regulator, lead type (CWA). The CWA ballast requires an igniter.

The ballast shall produce positive lamp ignition over a voltage range not less than ± 10 percent of nominal system voltage.

1 House side shields shall be provided with each luminaire and they shall be installed per manufactures instructions.

Shop drawings for the luminaire must be submitted for review and approval by the Engineer.

RECESSED REFLECTIVE PAVEMENT MARKER (MCDOT)

This work shall be according to Section 781 of the Standard Specifications except as modified herein.

Installation: The recessed reflective pavement markers shall be constructed by removing a 5" x 24" area of the HMA pavement at a depth of 3/4". This depressed area shall be tapered vertically from the full depth of 3/4 inches to 0 inches in 30 inches at both ends for the two-way markers and at the approach end only for the one-way markers. The depressed area shall be orientated lengthwise and longitudinally with respect to the roadway.

A 3M 290 series pavement marker or approved equivalent shall be placed and cemented with epoxy in the center of the 3/4" deep depressed area.

The recessed area shall be cleaned free of all loose material by means of sand blasting and also free of moisture before the placement of the pavement marker. All excess material resulting from the construction of the recessed area shall be completely removed from the surface of the roadway by means of vacuum sweeper truck.
