TRAFFIC CONTROL PLAN

Traffic Control shall be in accordance with the applicable sections of the Standard Specifications for Road and Bridge Construction, the applicable guidelines contained in the Illinois Manual on Uniform Traffic Control Devices for Streets and Highways, these special provisions, and any special details and highway standards contained herein and in the plans.

Special attention is called to Articles 107.09, 107.14, and 107.15 of the Standard Specifications for Road and Bridge Construction, the following highway standards, and Recurring Special Provisions relating to traffic control:

Highway Standards:

701101 701400 701401 701406 701411 701456 701901

The existing roadway shall be kept open to traffic at all times during the construction of this section. Construction operations will be staged to allow at least one lane open at all times in each direction along I-72.

Traffic Control Standards shall be applied as directed by the Engineers. Suggested applications for each standard or details are as follows:

Standard 701101: This standard is applicable for work within 15' but more than 2' away from edge of pavement.

Standard 701400: This standard is applicable in advance of a lane closure. A lane closure up to 6 miles will be allowed. Weekend lane closures will be allowed.

Standard 701401: This standard is applicable to any work requiring a lane closure along I-64 such as patching, surface removal, hot-mix asphalt paving, and shoulder work.

Standard 701411: This standard is applicable to lane closure operations that pass entrance and exit ramps at the IL 242 interchange.

Standard 701456: This standard is applicable to operations requiring partial closures of the entrance and exit ramps at the IL 242 interchange.

BORROW AREAS, USE AREAS, AND/OR WASTE AREAS

In addition to the provisions contained in Article 107.22 of the Standard Specifications, the Contractor shall submit all required documents to the District electronically. All photos shall be in color.
