2300 South Dirksen Parkway / Springfield, Illinois / 62764

February 20, 2009

SUBJECT: FAP Route 68 (IL 23)  
Project HSIP-0068 (104)  
Section (35,51&48CS. 1Z)TS  
LaSalle County  
Contract No. 66769  
Item No. 60, March 6, 2009 Letting  
Addendum B

## NOTICE TO PROSPECTIVE BIDDERS:

Attached is an addendum to the plans or proposal. This addendum involves revised and/or added material.

1. Revised page 2 of the Schedule of Prices.
2. Revised page ii of the Table of Contents to the Special Provisions.
3. Added pages 50 - 51 to the Special Provisions.
4. Revised sheet 3 of the Plans.

Prime contractors must utilize the enclosed material when preparing their bid and must include any Schedule of Prices changes in their bidding proposal.

Bidders using computer-generated bids are cautioned to reflect any and all Schedule of Prices changes, if involved, into their computer programs.

Very truly yours,

Charles J. Ingersoll, Chief  
Bureau of Design and Environment

A handwritten signature in cursive script, appearing to read "Ted B. Walschleger" followed by a small "P.E." to the right.

PAYROLLS AND PAYROLL RECORDS (BDE) ..... 48  
REMOVAL AND DISPOSAL OF REGULATED SUBSTANCES ..... 50

Revised 02/20/2009

## REMOVAL AND DISPOSAL OF REGULATED SUBSTANCES

This work shall be according to Article 669 of the Standard Specifications and the following:

Qualifications. The term environmental firm shall mean an environmental firm with at least five (5) documented leaking underground storage tank (LUST) cleanups or that is pre-qualified in hazardous waste by the Department. Documentation includes but not limited to verifying remediation and special waste operations for sites contaminated with gasoline, diesel, or waste oil in accordance with all Federal, State, or local regulatory requirements and shall be provided to the Engineer for approval. The environmental firm selected shall not be a former or current consultant or have any ties with any of the properties contained within and/or adjacent to this construction project.

General. Implementation of this Special Provision will likely require the Contractor to subcontract for the execution of certain activities. It will be the Contractor's responsibility to assess the working conditions and adjust anticipated production rates accordingly.

All contaminated materials shall be managed as non-special waste. This work shall include monitoring and potential sampling, analytical testing, and management of a material contaminated by regulated substances.

Any soil classified as a non-special waste shall be excavated and disposed of as directed by this project or the Engineer. Any excavation or disposal beyond what is required by this project or the Engineer will be at no additional cost to the Department. The preliminary site investigation (PSI) report, available through the District's Environmental Studies Unit, estimated the excavation quantity of non-special waste at the following location. The information available at the time of plan preparation determined the limits of the contamination and the quantities estimated were based on soil excavation for construction purposes only. The lateral distance is measured from centerline and the farthest distance is the offset distance or construction limit which ever is less. Any soil samples or analysis without the approval of the Engineer will be at no additional cost to the Department.

A) The Environmental Firm shall continuously monitor for worker protection and the Contractor shall manage and dispose of all soils excavated within the following areas as classified below.

1. All soil excavated from the Northwest corner of LaSalle and Superior Streets – non-special waste. Contaminants of concern sampling parameters: Mercury.
2. All soil excavated from the Southeast corner of LaSalle and Superior Streets – non-special waste. Contaminants of concern sampling parameters: Manganese.
3. All soil excavated from the Northeast corner of Columbus and Superior Streets – non-special waste. Contaminants of concern sampling parameters: Mercury.
4. All soil excavated from the Southwest corner of Columbus and Washington Streets – non-special waste. Contaminants of concern sampling parameters: Manganese.
5. All soil excavated from the Northwest corner of LaSalle and Lafayette Streets – non-special waste. Contaminants of concern sampling parameters: Mercury.

Added 02/20/2009

6. All soil excavated from the Northwest corner of LaSalle and Jackson Streets – non-special waste. Contaminants of concern sampling parameters: Lead.
7. All soil excavated from the Southwest corner of LaSalle and Madison Streets – non-special waste. Contaminants of concern sampling parameters: Mercury.
8. All soil excavated from the Southeast corner of LaSalle and Madison Streets – non-special waste. Contaminants of concern sampling parameters: Manganese.
9. All soil excavated from the Northwest corner of Columbus and Madison Streets – non-special waste. Contaminants of concern sampling parameters: Mercury.
10. All soil excavated from the Northeast corner of Columbus and Madison Streets – non-special waste. Contaminants of concern sampling parameters: Mercury and PAHs.
11. All soil excavated from the Southeast corner of Columbus and Madison Streets – non-special waste. Contaminants of concern sampling parameters: Mercury.
12. All soil excavated from the Northwest corner of LaSalle and Main Streets – non-special waste. Contaminants of concern sampling parameters: Mercury.
13. All soil excavated from the Southeast corner of LaSalle and Main Streets – non-special waste. Contaminants of concern sampling parameters: Mercury.
14. All soil excavated from the Northwest corner of Columbus and Main Streets – non-special waste. Contaminants of concern sampling parameters: Tetrachloroethene.
15. All soil excavated from the Southwest corner of Columbus and Main Streets – non-special waste. Contaminants of concern sampling parameters: Mercury.
