All foundations are designed to be located on slopes not exceeding 2:1 where soils have an unconfined compressive strength of at least 1.0 TSF. The contractor shall verify the soil strength during drilling for concrete foundations or by monitoring installation resistance on steel foundations and notify the engineer if other conditions are encountered.

Notes:

ay be on front, back, f foundation as required enching. Place door of er base on wireway side the number of unit

nedule 40 PVC 125(5) ing window, shall for drainage.
