

IDOT PROJECT LABOR AGREEMENT DETERMINATION

To: Omer Osman, Acting Secretary
From: Jeffrey P. Myers, Region Four Engineer
Date: 1/31/2020
Re: I-155, Contract Number 72E23, Logan County
{April 24, 2020 Letting}

In accordance with the Project Labor Agreement Act (30 ILCS 571), it is recommended that a project labor agreement (PLA) be utilized for the above-captioned Project. This recommendation is based on the considerations indicated below.

- 1) The Project is being awarded and administered by IDOT (i.e., not by another governmental agency).
- 2) The Project is being constructed using state or local funds only (i.e., no federal funds).
- 3) The overall size, scope, sequencing, logistics or other aspects of the Project make it particularly challenging to manage, and use of a PLA is expected to help assure that the construction work is performed properly and efficiently under the circumstances.
(See Attachment A)
- 4) The duration of construction activity on the Project is expected to exceed one construction season (i.e., 110 or more working days), or the nature of the Project results in a heightened need for labor force continuity and stability over a substantial period of time.
- 5) There is a firm construction completion date established for the Project thereby increasing the adverse consequences of any work stoppage or other labor disruption.
(See attachment A)
- 6) The time required to complete the Project is expected to extend beyond the expiration date of one or more existing collective bargaining agreements covering trades likely to be involved in the Project, thereby increasing the likelihood of work stoppage(s) or other labor disruption(s) during construction of the Project.
- 7) In the absence of a PLA, there is an increased likelihood of jurisdictional disputes among unions or of conflict between unionized and non-unionized workers on the Project that could have a potentially material adverse effect on the time, cost, or quality of work performed on the Project.

Attachment A

The use of a Project Labor Agreement on this project is consistent with all State and Local statutory and regulatory requirements.

Project Description: This project includes resurfacing of approximately 3.1 miles of I-155 and removal and replacement of HMA shoulders in select areas. Significant ditch grading and bridge repair is also included with this project. Additional roadway work items include guardrail removal and replacement, roadway drainage, pavement markings, and shoulder rumble strip installation.

Item 3: The estimate cost for this project is \$7,500,000. The work is required to be completed in 90 working days during the summer and fall of 2020.

Item 8: Any disruption to the contractor's schedule due to labor issues may result in an increase in the duration of the project. Traffic control left in place for extended periods of time, especially over the winter months, may contribute to additional exposure to crashes through the work zone, due to the inherent risk associated with reducing the number of thru lanes, traffic merging, and lane shifts. The District desires to minimize the length of time the traffic control is in place during construction, thereby minimizing the potential risks to the motoring public.
