

IDOT PROJECT LABOR AGREEMENT DETERMINATION

To: Omer Osman, Acting Secretary

From: Anthony Quigley, Region One Engineer

Date: 1/31/2020

Re: Interstate 90/94 (SB) at Interstate 290 and from Roosevelt Rd to Lake/Madison St.,
Contract Number 62A77, Cook County

{Letting: April 24, 2020; Completion Date: November 30, 2022}

In accordance with the Project Labor Agreement Act (30 ILCS 571), it is recommended that a project labor agreement (PLA) be utilized for the above-captioned Project. This recommendation is based on the considerations indicated below.

- 1) The Project is being awarded and administered by IDOT (i.e., not by another governmental agency).
- 2) The Project is being constructed using state or local funds only (i.e., no federal funds).
- 3) The overall size, scope, sequencing, logistics or other aspects of the Project make it particularly challenging to manage, and use of a PLA is expected to help assure that the construction work is performed properly and efficiently under the circumstances.
- 4) The duration of construction activity on the Project is expected to exceed one construction season (i.e., 110 or more working days), or the nature of the Project results in a heightened need for labor force continuity and stability over a substantial period of time.
- 5) There is a firm construction completion date established for the Project thereby increasing the adverse consequences of any work stoppage or other labor disruption.
- 6) The time required to complete the Project is expected to extend beyond the expiration date of one or more existing collective bargaining agreements covering trades likely to be involved in the Project, thereby increasing the likelihood of work stoppage(s) or other labor disruption(s) during construction of the Project.
- 7) In the absence of a PLA, there is an increased likelihood of jurisdictional disputes among unions or of conflict between unionized and non-unionized workers on the Project that could have a potentially material adverse effect on the time, cost, or quality of work performed on the Project.

8) This project presents specific safety concerns to the traveling public and a PLA, will ensure labor force continuity and stability, decreasing the length of the safety concern.

9) Use of a PLA is expected to result in improved access to skilled labor, improved efficiency, or improved safety performance on the Project.

10) Use of a PLA on the Project is not expected to have a material adverse effect on the competitive bidding process.

11) Use of a PLA on the Project is not expected to have a material adverse effect on the ability of the Department to achieve other Departmental goals (e.g., utilization of disadvantaged businesses, utilization of Illinois domiciled businesses, development of competitive vendor alternatives over time, etc.).

12) There are other material considerations favoring or disfavoring use of a PLA on this Project as follows:

Based upon the identified considerations, we recommend that you approve use of a PLA on this Project. Upon your approval, the Department shall undertake to negotiate in good faith a PLA with the relevant labor organization(s), and shall include in all necessary bid specifications and other documents information regarding the actual or form of PLA that is to binding upon all contractors and their employees.

Iron Workers Local 1 Structural	June 1, 2019 thru May 31, 2024
Cement Masons, Cook County, Local 502	June 1, 2017 to May 31, 2021
Teamsters, Will County, Local 179	June 1, 2017 to May 31, 2021

Attachment A

The use of a Project Labor Agreement (PLA) for Contract 62A76 is consistent with all State and Local statutory and regulatory requirements.

Item 3: This project includes both State and Federal funding and the programmed cost for this project is estimated at \$47,950,000. The scope of work involves the total reconstruction of the Kennedy Expressway(I-90/94) Southbound mainline to 4 through lanes between Roosevelt Road and Lake / Madison Streets in the City of Chicago using continuously reinforced concrete pavement (CRCC) for the mainline lanes and Portland cement concrete jointed pavement (PCC) for the ramps and tapers, construction of one new concrete retaining wall, resurfacing of the transition area at the north end of the expressway reconstruction limit in the SB direction from Ohio Street to the project limits through the Hubbard's Cave, construction of a two-lane collector distributor (C-D) roadway with shoulder within the limits of the project along the west side, replacement of overhead signing within and at the approaches to the project, roadway lighting, ITS upgrades, drainage improvements and the installation of pavement markings. The work also includes special waste clean-up and remediation within the Accident Investigation Site (AIS) at Polk Street and other areas within the project limits in addition to the construction of an underground detention storage facility underneath the AIS near the Cermak Pumping Station. Total length of the project is 1.59 miles.

Item 5: The completion date is November 30, 2022 plus 10 working days for punch list and clean-up items.

Items 6 & 7: There are thirteen different unions that are expected to perform work on this project, some with multiple collective bargaining agreements. As shown in this document, there are many collective bargaining agreements that will expire during completion of the Project. With the high number of different unions expected to be utilized, there is an increased likelihood of jurisdictional disputes among unions or of conflict between unionized and non-unionized workers on the Project.

Item 9: The use of a PLA on this Project will result in improved access to skilled labor, improved efficiency, and improved safety performance due because it will coordinate the labor forces of thirteen separate trade unions on the Project.
