BOX CULVERT TEMP. SHEET PILING

**8 X 4 BOX CULVERT
STA. 284 + 80.47**

TOTAL AREA
619.23 FT²

TEMPORARY SHEET PILING

S = Minimum Required Section Modules

$$S = 6.88 \text{ in} / \text{ft}^3$$

MINIMUM EMBEDMENT LENGTH = 11.0'

NOTES:

If the Contractor chooses to alter the temporary cantilevered sheet piling design requirements shown on the plans for lesser design requirements, then full design submittal with the required seals will be expected by the Department, for review and approval.

It shall be the Contractor's responsibility to retain the soil on top of the culvert subject to the approval of the Engineer. This shall not be paid for separately but shall be included in the cost of Temporary Sheet Piling.

Plan dimensions and details relative to existing structures have been taken from field survey. It shall be the Contractor's responsibility to verify such dimensions and details in the field and make necessary approved adjustments prior to construction or ordering of materials. Such variations shall not be cause for additional compensation for a change in the scope of work, however, the Contractor will be paid for the quantity actually furnished at the unit price bid for the work.
