n depths are for sites which have cohesive soils (clayey silt, sandy clay, etc.) along ne shaft, with an average Unconfined Compressive Strength (Qu) > 1.0 tsf (100 kpa). nall be verified by boring data prior to construction or with testing by the Engineer n drilling. The Bureau of Bridges & structures should be contacted for a revised conditions are encountered.

arm assemblies under 55 feet (16.8 m) shall use 36" (900 mm) diameter foundations. arm assemblies under 56 feet (16.8 m) through 75 feet (22.9 m) shall use 42'' (1060 mm)

semblies with dual arms refer to state standard 878001...
