

IDOT PROJECT LABOR AGREEMENT DETERMINATION

To: Ann L Schneider, Secretary

From: Omer Osman, Director

Date: December 20, 2012

Re: US 24 (FAP 63) & IL 96 (FAP 506), Contract Number 72E31, Adams County
{March 8, 2013 Letting}

In accordance with the Project Labor Agreement Act (30 ILCS 571), it is recommended that a project labor agreement (PLA) be utilized for the above-captioned Project. This recommendation is based on the considerations indicated below.

- 1) The Project is being awarded and administered by IDOT (i.e., not by another governmental agency).
- 2) The Project is being constructed using state or local funds only (i.e., no federal funds).
- 3) The overall size, scope, sequencing, logistics or other aspects of the Project make it particularly challenging to manage, and use of a PLA is expected to help assure that the construction work is performed properly and efficiently under the circumstances.
- 4) The duration of construction activity on the Project is expected to exceed one construction season (i.e., 110 or more working days), or the nature of the Project results in a heightened need for labor force continuity and stability over a substantial period of time
- 5) There is a firm construction completion date established for the Project thereby increasing the adverse consequences of any work stoppage or other labor disruption.
- 6) The time required to complete the Project is expected to extend beyond the expiration date of one or more existing collective bargaining agreements covering trades likely to be involved in the Project, thereby increasing the likelihood of work stoppage(s) or other labor disruption(s) during construction of the Project.
- 7) In the absence of a PLA, there is an increased likelihood of jurisdictional disputes among unions or of conflict between unionized and non-unionized workers on the Project that could have a potentially material adverse effect on the time, cost, or quality of work performed on the Project.

US 24 (FAP 03) & IL 90 (FAP 006)
Contract Number 72E31
Adams County
Item

8) This project presents specific safety concerns to the traveling public and a PLA, will ensure labor force continuity and stability, decreasing the length of the safety concern

9) Use of a PLA is expected to result in improved access to skilled labor, improved efficiency, or improved safety performance on the Project.

10) Use of a PLA on the Project is not expected to have a material adverse effect on the competitive bidding process.

11) Use of a PLA on the Project is not expected to have a material adverse effect on the ability of the Department to achieve other Departmental goals (e.g., utilization of disadvantaged businesses, utilization of Illinois domiciled businesses, development of competitive vendor alternatives over time, etc.)

12) There are other material considerations favoring or disfavoring use of a PLA on this Project as follows:

Based upon the identified considerations, we recommend that you approve use of a PLA on this Project. Upon your approval, the Department shall undertake to negotiate in good faith a PLA with the relevant labor organization(s), and shall include in all necessary bid specifications and other documents information regarding the actual or form of PLA that is to be binding upon all contractors and their employees.

Attachment A

Justification for use of Project Labor Agreement on Contract No. 72E31, Adams County.

The use of a Project Labor Agreement on this project is consistent with all State and Local statutory and regulatory requirements.

Item 2: The project is both *state* and *federally* funded. This project includes some safety funding.

Item 3: The estimate cost for this project is \$3,064,000.

Any disruption in the continuity of this project due to the labor issues would result in delayed deadlines that would cause safety concerns for the traveling public. It is the Illinois Department of Transportation's finding that the large skilled workforce needed for this project can be provided by the union trades involved and is a necessary requirement for a Project Labor Agreement.

Item 4: The project requires 65 working days. Construction of the project will not take place over multiple construction seasons.

Item 8: Any disruption to the contractor's schedule due to labor issues may present safety concerns to the motoring public. Traffic control left in place for an extended period of time, especially over the winter months, may contribute to additional exposure to crashes through the work zone, due to the inherent risk of driver inattention to lane changes, etc. that will be in place during stage construction. The traffic volumes and capacity of this section of roadway would also greatly diminish safety if any traffic control and protection was left in place longer than necessary.

Item 12: The various trades that may be used on the project include Laborers, Finishers, Carpenters, Iron Workers, Operators and Teamsters.
