

IDOT PROJECT LABOR AGREEMENT DETERMINATION

To: Omer Osman, Acting Secretary

From: Kensil A. Garnett, Region 3 Engineer

Date: 3/19/2021

Re: FAI 474, 74 and FAP 318 (I-474, I-74, & IL 6) Bridge Rehabilitations Project, Contract Number 68E52, Peoria County

In accordance with the Project Labor Agreement Act (30 ILCS 571), it is recommended that a project labor agreement (PLA) be utilized for the above-captioned Project. This recommendation is based on the considerations indicated below.

- 1) The Project is being awarded and administered by IDOT (i.e., not by another governmental agency).
- 2) The Project is being constructed using state or local funds only (i.e., no federal funds).
- 3) The overall size, scope, sequencing, logistics or other aspects of the Project make it particularly challenging to manage, and use of a PLA is expected to help assure that the construction work is performed properly and efficiently under the circumstances. **See Attachment A.**
- 4) The duration of construction activity on the Project is expected to exceed one construction season (i.e., 110 or more working days), or the nature of the Project results in a heightened need for labor force continuity and stability over a substantial period of time. **See Attachment A.**
- 5) There is a firm construction completion date established for the Project thereby increasing the adverse consequences of any work stoppage or other labor disruption.
- 6) The time required to complete the Project is expected to extend beyond the expiration date of one or more existing collective bargaining agreements covering trades likely to be involved in the Project, thereby increasing the likelihood of work stoppage(s) or other labor disruption(s) during construction of the Project.
- 7) In the absence of a PLA, there is an increased likelihood of jurisdictional disputes among unions or of conflict between unionized and non-unionized workers on the Project that could have a potentially material adverse effect on the time, cost, or quality of work performed on the Project.

8) This project presents specific safety concerns to the traveling public and a PLA, will ensure labor force continuity and stability, decreasing the length of the safety concern. See Attachment A.

9) Use of a PLA is expected to result in improved access to skilled labor, improved efficiency, or improved safety performance on the Project.

10) Use of a PLA on the Project is not expected to have a material adverse effect on the competitive bidding process.

11) Use of a PLA on the Project is not expected to have a material adverse effect on the ability of the Department to achieve other Departmental goals (e.g., utilization of disadvantaged businesses, utilization of Illinois domiciled businesses, development of competitive vendor alternatives over time, etc.).

12) There are other material considerations favoring or disfavoring use of a PLA on this Project as follows:

Based upon the identified considerations, we recommend that you approve use of a PLA on this Project. Upon your approval, the Department shall undertake to negotiate in good faith a PLA with the relevant labor organization(s), and shall include in all necessary bid specifications and other documents information regarding the actual or form of PLA that is to binding upon all contractors and their employees.

Attachment A

Justification for use of project Labor Agreement on Contract 68E52, Peoria County:

The use of a project Labor Agreement on this project is consistent with all State and Local statutory regulatory requirements.

Project Description:

This project is located at the interchange of I-474, I-74, and IL 6 in Peoria County. This project consists of a rehabilitation to six (6) structures including SN 072-0106, -0107, -0108, -0109, -0110, & -0111. Rehabilitation includes, but not limited to: hydroscarify and microsilica overlay, joint replacements, deck patching, parapet wall extensions, substructure repairs, and any other related collateral work necessary to complete this project as shown in the plans.

Item 3: The estimated project cost is \$6.8 million. This project is immediately adjacent to a resurfacing project on I-474 (Contract 68C45) that will also be let in June 2021 and a resurfacing project on I-74 (Contract 68F15). There is potential for work on all contracts to be done during the same time frame and will therefore require cooperation between all contractors to assure traffic control, work zone access, lane closures and ramp closures are well coordinated. In addition, there are several working restrictions imposed on the contractor for this project including:

- o Ramp E closure shall only occur when the WB I-474/NB IL 6 driving lane is closed.
- o Ramp D closure shall only occur when EB I-474/SB IL 6 driving lane is closed.

The use of a PLA is expected to help assure that the construction work is performed properly and efficiently under the above circumstances.

Item 4: The project is to be completed in 75 working days. With a June letting, the contract will extend into a second construction season.

Item 6: The time required to complete the project extends beyond the expiration of one or more existing collective bargaining agreements covering trades likely to be involved in the project. The trades that will be used on this project include but are not limited to those listed below. Trade contracts expiring prior to the anticipated construction completion date are indicated with bold font.

| <u>Local Trade</u> | <u>Current Contract Term</u> |
|--------------------------------|---------------------------------------|
| Cement Masons | May 1, 2020 thru April 30, 2021. |
| Iron Workers 112 | May 1, 2020 thru April 30, 2021. |
| Laborers 165 | May 1, 2020 thru April 30, 2023. |
| Operating Engineers 649 | April 1, 2020 thru March 31, 2021. |
| Electricians 34 | March 1, 2020 thru February 28, 2021. |
| Teamsters 627 | May 1, 2020 thru April 30, 2021. |

FAI 474, 74 and FAP 318 (I-474, I-74, & IL 6), Bridge Rehabilitations

Contract No. 68E52

Peoria County

Item [Click here to enter text](#)

Fed. Proj. No. NHPP-R034(528)

Item 8: The project allows for temporary lane width reductions within in the construction zone with adequate notice and proper signage. Any disruption to the contractor's schedule due to labor issues may result in an increase in duration of the project. This, in turn, could increase the length of time the traffic control on I-474 will be in place and the duration of reduced lane widths. The district desires to minimize the length of time traffic control is required on I-474 and the length of time reduced lane widths are needed to reduce the potential for crashes and to improve safety.
