

IDOT PROJECT LABOR AGREEMENT DETERMINATION

To Ann L. Schneider, Secretary

From Omer Osman, Director

Date May 8, 2013

Re. FAP 2 (IL 3), Contract Number 76G06, Madison County

{Patching milling and resurfacing the southbound right lane on IL 3 from New Poag Road to Industrial Drive and the intersections of IL 3 at IL 143, IL 3 at Chain of Rocks Road, IL 3 at New Poag Road and IL 3 at Pontoon Road}

In accordance with the Project Labor Agreement Act (30 ILCS 571), it is recommended that a project labor agreement (PLA) be utilized for the above-captioned Project. This recommendation is based on the considerations indicated below

1) The Project is being awarded and administered by IDOT (i.e., not by another governmental agency).

2) The Project is being constructed using state or local funds only (i.e., no federal funds)

3) The overall size, scope, sequencing, logistics or other aspects of the Project make it particularly challenging to manage, and use of a PLA is expected to help assure that the construction work is performed properly and efficiently under the circumstances
See Attachment A.

4) The duration of construction activity on the Project is expected to exceed one construction season (i.e., 110 or more working days), or the nature of the Project results in a heightened need for labor force continuity and stability over a substantial period of time
See Attachment A

5) There is a firm construction completion date established for the Project thereby increasing the adverse consequences of any work stoppage or other labor disruption.

6) The time required to complete the Project is expected to extend beyond the expiration date of one or more existing collective bargaining agreements covering trades likely to be involved in the Project, thereby increasing the likelihood of work stoppage(s) or other labor disruption(s) during construction of the Project.
See Attachment A

7) In the absence of a PLA, there is an increased likelihood of jurisdictional disputes among unions or of conflict between unionized and non-unionized workers on

Contract Number 76G06
Madison County
Item

the Project that could have a potentially material adverse effect on the time, cost, or quality of work performed on the Project.

8) This project presents specific safety concerns to the traveling public and a PLA, will ensure labor force continuity and stability, decreasing the length of the safety concern

9) Use of a PLA is expected to result in improved access to skilled labor, improved efficiency, or improved safety performance on the Project

10) Use of a PLA on the Project is not expected to have a material adverse effect on the competitive bidding process.

11) Use of a PLA on the Project is not expected to have a material adverse effect on the ability of the Department to achieve other Departmental goals (e.g., utilization of disadvantaged businesses; utilization of Illinois domiciled businesses, development of competitive vendor alternatives over time, etc.).

12) There are other material considerations favoring or disfavoring use of a PLA on this Project as follows:

Based upon the identified considerations, we recommend that you approve use of a PLA on this Project. Upon your approval, the Department shall undertake to negotiate in good faith a PLA with the relevant labor organization(s), and shall include in all necessary bid specifications and other documents information regarding the actual or form of PLA that is to binding upon all contractors and their employees.

Sarah Keimann, Ex. Assistant
FHWA concurrence in the PLA for the above mentioned contract
Gregory Nadeau, Deputy Administrator of FHWA
See Approval Dated 5/09/13

IDOT Project Labor Agreement Determination

Contract Number 76G06

Attachment A

Item #3 This project requires patching, milling and resurfacing on IL 3 at the intersections of IL 3 and IL 143, IL 3 and New Poag Road, IL 3 and Chain of Rocks Road and IL 3 and Pontoon Road. Additionally, the southbound right lane of IL 3 will be patched, milled and resurfaced from New Poag Road to Industrial Drive. IL 143 and Chain of Rocks Road will be patched, milled and resurfaced at their intersections with IL 3.

IL 3 is a highly traveled roadway in the Metro St. Louis area. IL 3 has deteriorated at the locations described above to an extent that requires significant HMA overlay removal and replacement. This work will require complex traffic control to maintain traffic at the intersections during construction operations.

Item #4: Due to the extremely deteriorated condition of these roadways, it is important this project be completed before the next winter season.

Item #6. The following collective bargaining agreements expire before the anticipated completion of the project:

<u>Local Union</u>	<u>Expiration Date</u>
Carpenters D C	4/30/13
IBEW 309 (lineman)	12/1/13
Iron Workers 392	7/31/13
Laborers D C	7/31/13
