KING LUMINAIRE™

ORNAMENTAL LIGHTING

K611 BALMORAL™ POST TOP LUMINAIRE

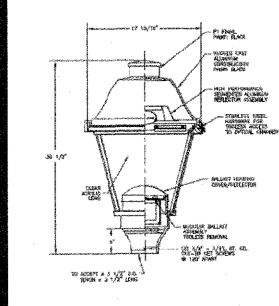

Modeled after the historical gas lanterns of yesteryear, the K611 Balmoral has a classic look that will complement any architectural setting. This post-top, lantern-style fixture is designed with a high-performance segmented aluminum reflector assembly. Its cutoff optical system makes it a dark-sky friendly™ fixture, meeting the minimal uplight requirements of many cities.

With a horizontal lamp and acrylic rippled lens, the K611 is designed for ease of maintenance, as its stainless steel hardware allows for tool-less access to the optical chamber and ballast housing. Constructed of rugged cast aluminum, the K611 is an extremely versatile fixture. When finished with King's durable "KingCoat" powder coat paint finish, it is the ideal lighting solution for any outdoor setting.

Designed with King Luminaire's commitment to excellent photometric performance, ease of maintenance and design integrity, the K611 Balmoral will add an impressive touch to any project.

March 2007 - Temporary Specifications Sheet

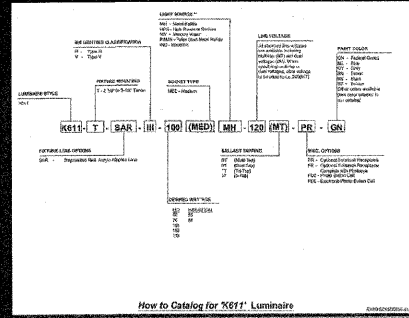

Built on King's Essential Criteria:

- 1.) Excellent photometric performance
- 2.) Ease of Maintenance
- 3.) Design Integrity
