

GENERAL NOTES:

Fasteners shall be high strength bolts. Bolts $\frac{1}{2}$ " ϕ , open holes $\frac{1}{8}$ " ϕ , unless otherwise noted.

Calculated weight of Structural Steel = 658,683 lb. M 270 Grade 50.
 Calculated weight of Structural Steel = 52,485 lb. M 270 Grade 36.

Field welding of construction accessories will not be permitted to beams or girders.

Anchor bolts shall be set before bolting diaphragms over supports.

The structural steel bearing plates and fill plates of the Elastomeric Bearing Assembly shall conform to the requirements of AASHTO M270 Grade 50.

The main load carrying member components subject to tensile stress shall conform to the Supplemental Requirements for Notch Toughness Zone 2. These components are the tension flanges, webs and all splice plate material except fill plates.

Reinforcement Bars shall conform to the requirements of AASHTO M 31 or M 322 Grade 60.

The back face of Closed Abutments and their wingwalls shall be waterproofed according to Article 503.18 of the Standard Specifications.

Bearing seat surfaces shall be constructed or adjusted to the designated elevations within a tolerance of $\frac{1}{8}$ ". Adjustments shall be made either by grinding the surface or by shimming the bearing. Two $\frac{1}{8}$ " adjusting shims, of the dimensions of the bottom bearing plate, shall be provided for each bearing in addition to all other plates or shims. For Type I Elastomeric Bearings, two $\frac{1}{8}$ " adjusting shims shall be provided for each bearing and placed as detailed.

Bridge Seat Sealer shall be applied to the seat area of the abutments.

All construction joints shall be bonded.

All exposed edges shall be chamfered $\frac{3}{4}$ " except as noted.

Before any removal work begins, it is the Contractor's responsibility to ensure that all utility attachments are disconnected. The Contractor shall coordinate protection of all utility attachments. Any attached utilities on the bridge shall be removed and the cost included with item "Removal of Existing Structures No. 3".

All structural steel shall receive a thermal sprayed metal coating (metallizing) in the shop. See Special Provisions for Metallizing Structural Steel.

Elevations shown are based on City of Chicago Datum.
 USGS Elevation = City of Chicago Datum + 579.19

TOTAL BILL OF MATERIAL

ITEM	UNIT	SUPER	SUB	TOTAL
Removal Of Existing Structures No. 3	Each			1
Porous Granular Embankment	Cu. Yd.		2828	2828
Structure Excavation	Cu. Yd.		6392	6392
Concrete Structures	Cu. Yd.		1726	1726

EXISTING DECK CROSS SECTION (Looking East)

NOTE - A

Proposed protective shield shall be provided during removal of the existing superstructure for the entire length and width of the existing bridge. The limits of the protective shield shall be as shown or as approved by the Engineer.

NOTE - B

The entire existing protective shield shall be removed and salvaged. Salvaged material shall be taken to the IDOT Maintenance Yard located at: 1101 Bluestem Road Elk Grove Village, Illinois

Proposed protective shield shall be provided during deck pouring for the entire length and width of the proposed bridge. The limits of the protective shield shall be as shown or as approved by the Engineer.
