REMOVAL AND DISPOSAL OF REGULATED SUBSTANCES

REMOVAL AND DISPOSAL OF REGULATED SUBSTANCES

This work shall be according to Article 669 of the Standard Specifications and the following:

Qualifications. The term environmental firm shall mean an environmental firm with at least five (5) documented leaking underground storage tank (LUST) cleanups or that is pre-qualified in hazardous waste by the Department. Documentation includes but not limited to verifying remediation and special waste operations for sites contaminated with gasoline, diesel, or waste oil in accordance with all Federal, State, or local regulatory requirements and shall be provided to the Engineer for approval. The environmental firm selected shall not be a former or current consultant or have any ties with any of the properties contained within and/or adjacent to this construction project.

General. This Special Provision will likely require the Contractor to subcontract for the execution of certain activities.

All contaminated materials shall be managed as non-special waste. This work shall include monitoring and potential sampling, analytical testing, and management of a material contaminated by regulated substances.

- A) The Environmental Firm shall continuously monitor for worker protection and the Contractor shall manage any excavated soils **within the construction limits of this project as fill**. Although the soil concentrations exceed a residential property's Tier 1 soil remediation objective for the ingestion exposure pathway, they can be utilized within the construction limits as fill because the roadway is not considered a residential property. All storm sewer excavated soils can be placed back into the excavated trench as backfill unless trench backfill is specified. If the soils cannot be utilized within the construction limits as fill then they must be managed off-site as a non-special waste. The following areas can be managed within the construction limits as fill.
1. Station 11+00 to Station 12+00 0 to 50 feet LT (Vacant Lot, Site 1963-27, 41 West Locust Street) – non-special waste. Contaminants of concern sampling parameters: Arsenic and Lead.
 2. Station 12+00 to Station 14+46 0 to 50 feet LT (Russel's Auto Repair, Site 1963-26, 212 North Main Street) – non-special waste. Contaminants of concern sampling parameters: Arsenic and Lead.
 3. Station 11+60 to Station 12+20 0 to 50 feet RT (Country Insurance, Site 1963-02, 48 West Locust Street) – non-special waste. Contaminants of concern sampling parameters: Arsenic and Lead.
