2300 South Dirksen Parkway / Springfield, Illinois / 62764

July 15, 2016

SUBJECT: FAP Route 331 (IL 13)
Project ACNHPP-0331 (073)
Section (1-4)R-6
Williamson County
Contract No. 78452
Item No. 105, July 29, 2016 Letting
Addendum A

NOTICE TO PROSPECTIVE BIDDERS:

Attached is an addendum to the plans or proposal. This addendum involves revised and/or added material.

1. Revised page 10 of the Special Provisions

Prime contractors must utilize the enclosed material when preparing their bid and must include any Schedule of Prices changes in their bidding proposal.

Bidders using computer-generated bids are cautioned to reflect any and all Schedule of Prices changes, if involved, into their computer programs.

Very truly yours,

Maureen M. Addis, P.E.
Acting Engineer of Design and Environment

Engineer of Project Management

cc: Jeffrey L. Keirn, Region 5, District 9; Tim Kell; Estimates

CWR/ck

The contractor shall use a dormant planting time of November 16, 2016 to February 28, 2017, with CONWR preferring a planting time during January or February, weather permitting. The contractor shall not plant during the spring, as to not interfere with the Crawfish frog mating season.

Basis of Payment This work shall be paid for in accordance with Article 250.10 at the contract unit price per acre for SEEDING, CLASS 4B SPECIAL.

SPECIAL WASTE REMOVAL

This work shall consist of transportation and proper disposal of contaminated soil and water near Campground Road. BETX contaminates were identified in the PSI report completed by CONWR. This work will be done as specified in Section 669 of the Standard Specification. CONWR will hire a qualified environmental consultant that will be responsible for the costs and fees of special waste plans and reports and BETX soil analysis. The special waste removal work shall be completed between October 24, 2016 and December 30, 2016. The contractor shall notify the Engineer 4 weeks prior to starting special waste removal work.

HERBICIDES

During construction application of any pesticides, herbicides and/or insecticides will be coordinated with CONWR prior to application and will be applied in accordance with their specifications. The use of pesticides, herbicides and/or insecticides requires prior CONWR approval. The contractor shall provide the Refuge Manager with product labeling and/or the Safety Data Sheet two weeks prior to use to provide adequate time to determine approval or disapproval of the product. Pesticide, herbicide and/or insecticide use shall be reported (chemical trade name, active ingredient, rate & quantities used, acres treated) following the treatment. Spraying near wetlands will require maintaining appropriate buffers (300') and the use of aquatic safe herbicide.

STRINGLINE GRADE CONTROL

Effective 1990

Revised 1/3/12

The Contractor shall use stringline grade control or an electronic grade control system that has been approved by the Engineer for the final shaping of the earth subgrade, final trimming of the lime modified soil subgrade, laydown of each lift of HMA binder course and laydown of the surface course.

The stringline grade supports shall be placed at 25 ft intervals. The stringline and supports shall be offset so as not to interfere with rolling operations.

A tolerance of ½ inch from the proposed grade elevations will be permitted for the final earth subgrade; a tolerance of ¼ inch will be permitted for the final lime modified soil subgrade.

It is understood that the cost of complying with these requirements is included in the unit prices of the various pay items involved, and no additional compensation will be allowed.

Revised 7-15-16
