GENERAL NOTES

Where section or subsection monuments are encountered, the engineer shall be notified before such monuments are removed. The Contractor shall protect and carefully preserve all monuments until an authorized surveyor or an agent has witnessed or otherwise referenced their location. The contractor shall be responsible for having an authorized surveyor reestablish any section or subsection monuments destroyed by his operation

Seeding shall not be permitted at any time when the ground is frozen, wet, or in an unillable condition. locations to be seeded will be determined by the engineer.

All elevations refer to U.S.G.S mean sea level datum.

Abandoned underground utilities that conflict with construction shall be disposed of outside the limits of the right of way according to Article 202.03 of the standard specifications and directed by the engineer. This work will not be paid for separately but shall be included in the cost of earth excavation.

Any reference to a standard in these plans shall be interpreted to mean the edition as indicated by the subnumber listed on the index of sheets or the copy of the standard included in these plans.

The finished earthwork shall have a vegetation sustaining soil covering the top four inches in areas to be seeded or sodded. The vegetation sustaining soil required will not be paid for separately but shall be included in the cost of topsoil excavation and placement.

The Contractor shall contact JULIE at least 48 Hours prior to excavation to determine which utilities are in the project area.
