When "A" is 3'-6" or less, the temporary concrete barrier shall be anchored to the new slab according to Detail I or Detail II. No anchorage is required when "A" is greater than 3'-6".

EXISTING DECK BEAM

SECTIONS THRU SLAB OR DECK BEAM

NOTES

Detail I - With Bar Splicer or Couplers:
Connect one (1) 1" x 7¹⁄₄" x "W" steel ℙ to the top layer of couplers with 2-⁵⁄₈" ⌀ bolts screwed to coupler at approximate ℄ of each barrier panel.
Detail II - With Extended Reinforcement Bars:
Connect one (1) 1" x 7¹⁄₄" x "W" steel ℙ to the concrete slab or concrete wearing surface with 2-⁵⁄₈" ⌀ Expansion Anchors or cast in place inserts spaced between the top layer of reinforcement at approximate ℄ of each barrier panel.

Cost of anchorage is included with Temporary Concrete Barrier.

The 1" x 7¹⁄₄" x "W" plate shall not be removed until stage II construction forms and all reinforcement bars are in place and the concrete is ready to be placed.
*** Dimension shown is minimum required embedment into concrete. If hot-mix asphalt wearing surface is present, minimum embedment shall be in addition to wearing surface depth.

**** If existing deck beam is to remain in place after stage construction, embedment shall only be into wearing surface and not into existing deck beam concrete.
***** Prior to Diamond Grinding of Bridge Section
