

Designer Note: Include in all projects that involve any tree removal or potential for tree removal. Current tree removal policy requires that trees to be removed on a project be reviewed by the District's Tree Committee. Proposed work/tree removal is then coordinated with other public agencies and replacement trees provided in accordance with policy. Tree removal locations are then outlined in the Project Report.

This general note is intended to notify the Contractor and Resident Engineer that trees removed beyond established limits or locations without coordination with other agencies and the property owners could lead to problems with final acceptance of the project.

TREE REMOVAL

The District Four Tree Committee should be contacted and prior approval obtained for any tree removal beyond the limits/locations included in the plans.
