

Revised 08-12-05

Designer Note: Used only where last minute changes in typical sections are made and there is not sufficient time/manpower to correct the cross sections. Computations must include these additions/deductions to the earth quantities. Discuss usage with your Project Engineer. Every effort should be made to correct the plans and only use this note when absolutely no other option is available.

### **EARTHWORK QUANTITIES (TYPICAL SECTIONS VS CROSS SECTIONS)**

The earthwork quantities shown on the plans have been computed to agree with the details as shown on the typical sections and not to the limits shown on the cross sections.
