The above represents the best information of the Department and is only included for the convenience of the bidder. The applicable provisions of Sections 102 and 103 and Articles 105.07 and 107.20 of the Standard Specifications for Road and Bridge Construction shall apply.

If any utility adjustment or removal has not been completed when required by the Contractor's operation, the Contractor should notify the Engineer in writing. A request for an extension of time will be considered to the extent the Contractor's operations were affected.

REMOVE IMPACT ATTENUATOR SAND MODULE AND BASE

<u>Description</u>: This work shall consist of the removal and satisfactory disposal of the existing sand module impact attenuator and attenuator base at locations shown on the plans. A sand module impact attenuator is considered to be made of three parts: barrel, lid, and inserts.

All barrels, lids, and inserts shall be disposed of in accordance with Article 202.03 of the Standard Specifications. Surplus material including sand fill in the existing barrels and inserts shall be disposed of in accordance with Article 202.03 of the Standard Specifications. Anti-freeze, when present, shall be disposed of/recycled according to local ordinances.

Method of Measurement: This work shall be measured per each array for each location.

<u>Basis of Payment:</u> This work shall be paid for at the contract unit price per each array for REMOVE IMPACT ATTENUATOR SAND MODULE, which price shall include the removal the barrels and sand, salvage, and transport of the salvaged material.

Impact attenuator base removal, salvage, and transport will be paid for at the contract unit price per EACH for REMOVE ATTENUATOR BASE.
