IDOT PROJECT LABOR AGREEMENT DETERMINATION

To: Erica J Borggren, Acting Secretary

From Omer Osman, Director

Date. 9/11/2014

Re: IL 48 & 121 Resurfacing, Contract Number 74624, Macon County

{November 21, 2014 Letting}

In accordance with the Project Labor Agreement Act (30 ILCS 571), it is recommended that a project labor agreement (PLA) be utilized for the above-captioned Project. This recommendation is based on the considerations indicated below

- 1) The Project is being awarded and administered by IDOT (i e , not by another governmental agency)
- 2) The Project is being constructed using state or local funds only (i e., no federal funds)
- 3) The overall size, scope, sequencing, logistics or other aspects of the Project make it particularly challenging to manage, and use of a PLA is expected to help assure that the construction work is performed properly and efficiently under the circumstances.
- 4) The duration of construction activity on the Project is expected to exceed one construction season (i e., 110 or more working days), or the nature of the Project results in a heightened need for labor force continuity and stability over a substantial period of time.
- 5) There is a firm construction completion date established for the Project thereby increasing the adverse consequences of any work stoppage or other labor disruption.
- 6) The time required to complete the Project is expected to extend beyond the expiration date of one or more existing collective bargaining agreements covering trades likely to be involved in the Project, thereby increasing the likelihood of work stoppage(s) or other labor disruption(s) during construction of the Project.
- 7) In the absence of a PLA, there is an increased likelihood of jurisdictional disputes among unions or of conflict between unionized and non-unionized workers on the Project that could have a potentially material adverse effect on the time, cost, or quality of work performed on the Project

Contract Number 74624
Macon County
Item

8) This project presents specific safety concerns to the traveling public and a PLA, will ensure labor force continuity and stability, decreasing the length of the safety concern.

9) Use of a PLA is expected to result in improved access to skilled labor, improved efficiency, or improved safety performance on the Project.

10) Use of a PLA on the Project is not expected to have a material adverse effect on the competitive bidding process

11) Use of a PLA on the Project is not expected to have a material adverse effect on the ability of the Department to achieve other Departmental goals (e.g., utilization of disadvantaged businesses, utilization of Illinois domiciled businesses, development of competitive vendor alternatives over time, etc).

12) There are other material considerations favoring or disfavoring use of a PLA on this Project as follows

Based upon the identified considerations, we recommend that you approve use of a PLA on this Project. Upon your approval, the Department shall undertake to negotiate in good faith a PLA with the relevant labor organization(s), and shall include in all necessary bid specifications and other documents information regarding the actual or form of PLA that is to binding upon all contractors and their employees.

Attachment A:

Justification for the use of Project Labor Agreement on Contract # 74624, Macon County

The use of a Project Labor Agreement on this project is consistent with all State and Local statutory and regulatory requirements

Item 2: This project is federally funded with a state match.

Item 3: The Estimated Cost of this Project is \$4,840,000.

The work on this project is located on IL Route 48 & 121 from University Ave east 2.55 miles to 0.2 miles west of 22nd St. in Decatur. The average daily traffic at this location is 19,700 with 4% (788) trucks. In order to complete the mainline IL 48 & 121 resurfacing project without any adverse traffic delays for the traveling public or delays in commerce, IDOT feels a Project Labor Agreement is necessary for this project.

The work on this project consists of 2.55 miles of 2-1/4" milling, 2-1/4" HMA inlay, pavement patching, Sidewalk/ADA Ramp reconstruction, pavement marking and any other work necessary to complete this project. With the large number of different construction trades that will be involved in the resurfacing of this section of roadway, IDOT feels the use of a Project Labor Agreement is necessary to avoid any labor related delays.

The resurfacing and patching work involves various construction sequences creating numerous traffic control challenges. The contractor will need a reliable work force to complete the work in a timely manner to ensure safe travel for the traveling public during all stages of traffic control. It is IDOT's findings that the large skilled workforce needed to meet all the challenges with this project can be provided by the union trades involved and is a necessary requirement for a Project Labor Agreement.

With no construction in the project limits the speed limit is 35 MPH. Once the projects limits are under construction the speed limit will be 25 MPH. Based on user cost of \$10.00/hour for passenger vehicles and \$20.00/hour for trucks, a user cost of \$2,340/day will incur due to any work stoppages. Based on the adverse travel due to construction zones, IDOT feels the use of a Project Labor Agreement is necessary to avoid any Labor related delays.

Item 4: There are 115 working days to complete the project. With this number of working days, if there were any labor issues the project could continue into a second construction season. A Project Labor Agreement would ensure the stability of the work force allowing the work to be completed in the time allotted.

Item 6: This project could extend beyond the expiration date of the collective bargaining agreements with the following locals.

Operators Local (965) – contract expires 04-30-2015

Iron Workers Local (46) – contract expires 05-01-2016

Concrete Finisher Local (143) – contract expires 3-31-2016
