SUBJECT: FAP Route 840 (US 45 / 52) Project BHF-F-0840 (055) Section 139 BR-1 & BR-2 Kankakee County Contract No. 66543 Item No. 113, January 19, 2007 Letting Addendum A

NOTICE TO PROSPECTIVE BIDDERS:

Attached is an addendum to the plans or proposal. This addendum involves revised and/or added material.

- 1. Revised page ii of the Table of Contents to the Special Provisions.
- 2. Added pages 74 & 75 to the Special Provisions.

Prime contractors must utilize the enclosed material when preparing their bid and must include any Schedule of Prices changes in their bidding proposal.

Bidders using computer-generated bids are cautioned to reflect any and all Schedule of Prices changes, if involved, into their computer programs.

Very truly yours,

Eric E. Harm Interim Bureau Chief Bureau of Design and Environment

Jedge Jake heye . A.E.

## TEMPORARY CONSTRUCTION/WATERWAY PERMITS (IDNR)

046-0070 1L (Effective January 1, 2001; Revised January 1, 2002)

The temporary construction activities required for completion of the permanent structure are authorized by statewide Permit #13 from the Illinois Department of Natural Resources (IDNR), provided the following conditions are met:

- 1. The term "temporary" shall mean not more than one construction season; all temporary construction materials must be removed from the stream and floodway within one year of their placement and the area returned to the conditions existing prior to the beginning of construction. Any desired subsequent or repetitive material placement shall not occur without the review and approval of the Office of Water Resources.
- 2. The temporary project shall be constructed such that it will not cause erosion or damage due to increases in water surface profiles to adjacent properties. For locations where there are structures in the upstream floodplain, the temporary project shall be constructed such that all water surface profile increases due to the temporary project are contained within the channel banks.

This permit does not authorize the placement or construction of any solid embankment or wall such as a dam, roadway, levee, or dike across any channel or floodway.

- 3. No temporary structure shall be placed within any river or stream channel until a registered professional engineer determines and documents that the temporary structure will meet the requirements of Special Condition 3 of this permit (Item #2 listed above.) Such documentation shall include, at a minimum, confirmation that no buildings or structures will be impacted by the backwater induced by the temporary structure.
- 4. Disturbance of vegetation shall be kept to a minimum during construction to prevent erosion and sedimentation. All disturbed areas shall be seeded or otherwise stabilized upon completion of the removal of the temporary construction.
- 5. Materials used shall not cause water pollution as defined by the Environmental Protection Act (415 ILCS 5).

Should the Contractor desire to deviate from the conditions of the statewide Permit #13, a formal permit application shall be submitted by the Contractor to the Illinois Department of Natural Resources, Office of Water Resources, 524 South Second Street, Springfield, IL 62704. Any permit application by the Contractor shall refer to SN 046-0070.

## TEMPORARY CONSTRUCTION/WATERWAY PERMITS (CORPS OF ENGINEERS)

046-0070 1K (Effective January 1, 2001; Revised January 1, 2002)

Temporary in-stream work for proposed construction activities has been authorized from the Army Corps of Engineers using the following guidelines:

All requests made by the Contractor shall refer to Permit No. <u>CEMVR-OD-P-2006-1904</u> for Structure Number 046-0070.

Temporary causeway/workpad:

- Area: <u>+</u> 300 sq. yd.
- Location: Actual location to be determined in the field to suit actual construction needs.
- Material Type: Clean coarse aggregates.
- Additional Restrictions: Dewatering methods will be at the option of the contractor. The stream channel within the right-of-way limits must be cleaned and all temporary instream works shall be removed from the stream channel and taken to an upland site upon completion of the project

Should the Contractor desire to deviate from the guidelines currently imposed under the permit as listed above, then full design details including location, material specifications, and hydraulic analysis should be included in a request to the Army Corps of Engineers. Requests shall be made to United States Army Corps of Engineers, Rock Island District, Clock Tower Building, Rock Island, IL 61204.

Any additional request is at the discretion of the Contractor; therefore, any delays in receiving approval for various methods outside of the given parameters will **not** be cause for additional compensation.
