

* Elevations given are from existing plans, and have been adjusted by deducting 0.69'. The comparison data is based on a survey of the existing bearing seats, and is subject to normal construction tolerance variations.

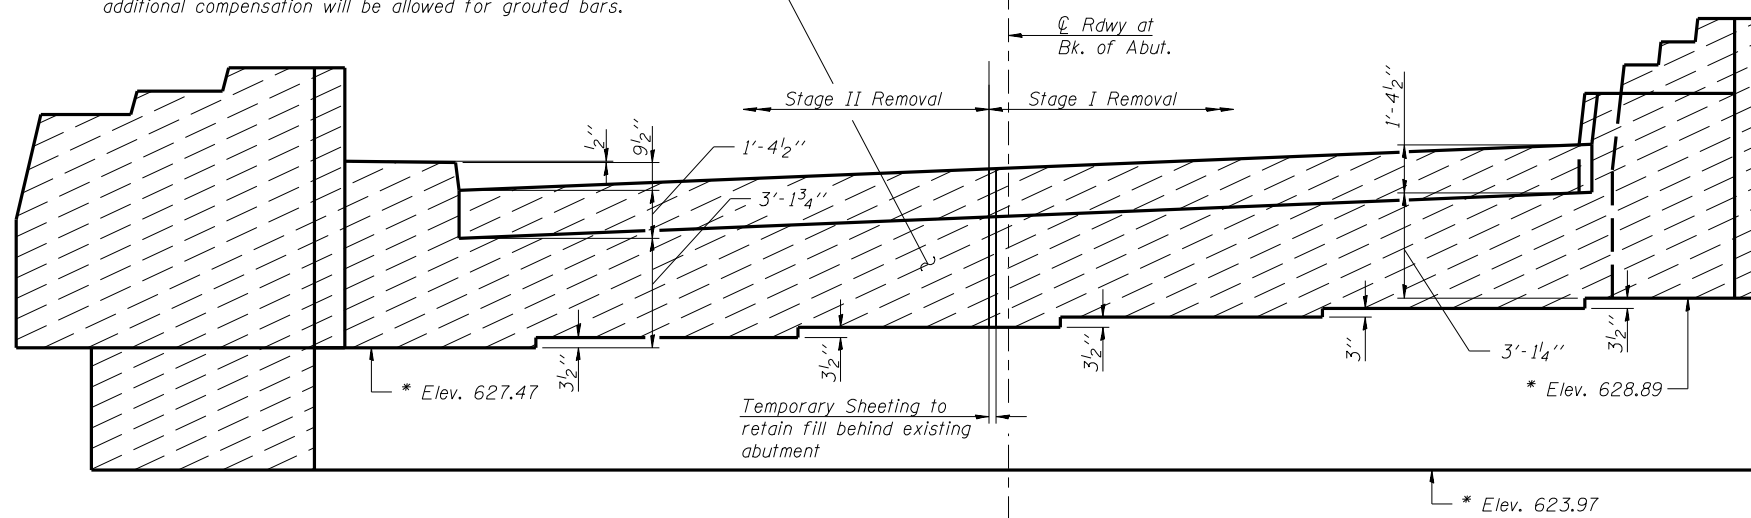

Salvage existing vertical reinforcement bars. Cut as required to provide minimum 2'-2" lap with new backwall vertical reinforcement bars. Bars damaged or not salvaged shall be replaced in kind with drilled and epoxy grouted bars as directed by the Engineer. No additional compensation will be allowed for grouted bars.
