

GENERAL NOTES:

- Site related work, including paving, earthwork, curbing storm sewer and drainage structure cleaning and repair, etc., shall conform to the "Standard Special for Road and Bridge Construction in Illinois", adopted January 1, 2007 "Soil Erosion and Sediment Control in Illinois", or their current editions thereof.
- The Contractor shall dispose of all surplus, unstable and/or unsuitable materials resulting from construction of the project, including those resulting from removal of existing sidewalk, curbs and pavements. Such materials shall be disposed of by the Contractor at his/her own expense in accordance with Article 202.08 of the Standard Specifications.
- The removal of unusable and unstable material in all cut and fill areas and their replacement with satisfactory material, where required, shall be included in cost of the Pay Item for Cubic Yard of EARTH EXCAVATION and in accordance with Article 202.03 and Article 202.08 of the Standard Specifications.
- Existing utilities shown on plans are plotted from available information. Their location is to be considered a approximate only and there may be others not shown. It shall be the Contractors' responsibility to locate and protect all utilities. Any damage to utilities shall be the Contractors responsibility.
- The Contractor is advised that no underground investigation of sewers or other utilities has been performed in connection with this project. Plan information has been obtained from visual surface inspection of available documentation. The Owner and Engineer assume no responsibility for the presence, specific size, location of condition of underground utility and distribution systems.
- In order to avoid damage to underground utilities, the Contractor shall contact all utility companies not belonging to the J.U.L.I.E. system and obtain the location and depth of their respective facilities. A list of known Utilities is presented on this Sheet. J.U.L.I.E. will notify all utility companies (belonging to the J.U.L.I.E. system) involved that their respective utility should be located. A minimum of forty-eight (48) hours advanced notice is required.
- The saw cutting of existing curb to a sufficient depth to create a clean vertical joint shall be considered included in the cost of curb removal. Curb and Sidewalk Removal and Replacement shall be done to the joint nearest to the limit indicated on the plans. Removal of steps shall be paid for as Sidewalk Removal.
- All catch basin lids, frames, grates and storm sewer appurtenances deemed salvageable by the Engineer shall become the property of the Village of Washington Park and stockpiled for reuse within the limits of this project at a location designated by the Engineer. The cost of stockpiling these salvageable items shall be considered included in the cost of to the removal item involved.
- The thickness of H-M-A mixtures shown on plans is the nominal thickness. Deviations from the nominal thickness will be permitted when such deviations occur due to irregularities in the existing surface or based on which the H-M-A mixture is placed.
- The Contractor shall place pavement so that flow along curbs is maintained, including flow through intersections around curb returns. Place and compact fill in horizontal lifts not to exceed 6" when in loose condition. All lifts shall be compacted to 95% of the maximum dry density in accordance with ASTM standards.
- All stations/offsets shown through the plans unless otherwise noted are referenced to the center line.
- All earth areas disturbed, for whatever reason, shall be seeded with Class 1 seeding as described in the IDOT Standard Specifications Section 250. Areas disturbed and seeded beyond the construction limits shall be at the Contractor's expense.

Contractor shall provide erosion and siltation control, as needed to prevent damage of off site properties until the pavement surface has been installed and vegetation in all disturbed areas has been established, at which time he shall be responsible for removal of all temporary erosion control and repair of any eroded areas.

- Seeding for this project shall be Class 1. For the purpose of this contract, Spring seeding is defined as that performed between March 1 and June 1. Fall seeding is defined as that performed between August 1 and November 15. Seeding will not be permitted at any time when the ground is frozen, wet or in an unillable condition. Fertilizing nutrients for Seeding Class 1 shall be applied at the rate of 270 pounds per acre. The fertilizer for Class 1 seeding shall be a ready-mixed material.
- Mulch Method 1 shall be included in the cost of Seeding Class 1 and provided per Section 251 of the Standard Specifications.
- The following constants were used in the calculation of quantities for this project.

H-M-A (Surface and Binder)	115 lbs/S.Y./inch
Bituminous Materials Prime Coat	0.40 gal/S.Y./ (paved)
Aggregate Prime Coat	6 lbs/S.Y. (paved)
Granular Materials	2.10 tons/C.Y.
- Intersection radii shall meet the back of existing curb lines.
- Earthwork and material required in connection with excavation, embankments, backfilling behind drives, curbs, sidewalks and drainage structures, and grading and shaping of areas disturbed by the Contractor shall not be paid for separately, but shall be considered included in the cost of various items of work involved and no additional compensation or remuneration will be allowed.
- All intersection are to be constructed to warp and drain to existing or proposed inlets.
- The Contractor shall provide positive drainage to inlets at all time during construction. Excavation for new storm sewer is included in the pay item for new pipe.

LIST OF UTILITIES:

Illinois American Water Company
100 North Water Works Drive
Belleville, IL 62223
Phone: 618-996-2202

Metro East Sanitary Sewer District
1800 Edison Street
Granite City, IL 62040
Phone: 618-452-9400

AMEREN-IP (CAS)
1050 West Blvd.

UTILITY DISCLAIMER

THE TYPE, SIZE, AND LOCATION OF UTILITIES AS DELINEATED ON THESE TOPOGRAPHIC LAND SURVEY DOCUMENTS AND/OR CIVIL ENGINEERING DESIGN DOCUMENTS HAVE BEEN DETERMINED BY REVIEW OF AVAILABLE EXISTING "AS-BUILT" OR RECORD DRAWINGS; FIELD SURVEY OF J.U.L.I.E. MARKED UTILITIES; OR FIELD SURVEY OF ABOVE GROUND SURFACE UTILITY FEATURES. THE OWNER AND ENGINEER HAVE NOT UNDERTAKEN SUBSURFACE EXPLORATORY INVESTIGATIONS TO CONFIRM OR VERIFY THE UTILITIES SHOWN ON THESE DOCUMENTS, THEREFORE THEIR EXACT LOCATION, SIZE, AND FUNCTION MUST BE CONSIDERED APPROXIMATE AND MUST BE FIELD CONFIRMED BY THE CONTRACTOR.

THE ENGINEER AND OWNER FURTHER DO NOT WARRANT THAT ALL UTILITIES HAVE BEEN ILLUSTRATED ON THESE DOCUMENTS. THE CONTRACTOR IS SOLELY RESPONSIBLE FOR CONTACTING J.U.L.I.E. FOR FIELD VERIFICATION OF ALL UTILITIES ON THE SITE PRIOR TO COMMENCEMENT OF CONSTRUCTION. IF THE CONTRACTOR DETERMINES THAT SUBSTANTIAL DISCREPANCY EXISTS BETWEEN FIELD VERIFIED UTILITIES AND THESE PLANS WHICH WOULD SIGNIFICANTLY AFFECT THE FUNCTION, COST, OR PERFORMANCE OF THE PROJECT, THE CONTRACTOR SHALL IMMEDIATELY CONTACT THE ENGINEER FOR CLARIFICATION AND PROJECT DIRECTION.
