

IDOT PROJECT LABOR AGREEMENT DETERMINATION

To: Omer Osman, Acting Secretary

From: Anthony Quigley, Region One Engineer

Date: 12/8/2020

Re: FAU 1453 (Cermak Road) over IHB RR, Gardner Road, 25th Avenue and Addison Creek, Contract Number 62H51, Cook County

{Letting: March 5, 2021 Completion Date: October 31, 2022}

In accordance with the Project Labor Agreement Act (30 ILCS 571), it is recommended that a project labor agreement (PLA) be utilized for the above-captioned Project. This recommendation is based on the considerations indicated below.

- 1) The Project is being awarded and administered by IDOT (i.e., not by another governmental agency).
- 2) The Project is being constructed using state or local funds only (i.e., no federal funds).
- 3) The overall size, scope, sequencing, logistics or other aspects of the Project make it particularly challenging to manage, and use of a PLA is expected to help assure that the construction work is performed properly and efficiently under the circumstances.
- 4) The duration of construction activity on the Project is expected to exceed one construction season (i.e., 110 or more working days), or the nature of the Project results in a heightened need for labor force continuity and stability over a substantial period of time.
- 5) There is a firm construction completion date established for the Project thereby increasing the adverse consequences of any work stoppage or other labor disruption.
- 6) The time required to complete the Project is expected to extend beyond the expiration date of one or more existing collective bargaining agreements covering trades likely to be involved in the Project, thereby increasing the likelihood of work stoppage(s) or other labor disruption(s) during construction of the Project.
- 7) In the absence of a PLA, there is an increased likelihood of jurisdictional disputes among unions or of conflict between unionized and non-unionized workers on the Project that could have a potentially material adverse effect on the time, cost, or quality of work performed on the Project.

Attachment A

The use of a Project Labor Agreement (PLA) for Contract 62H51 is consistent with all State and Local statutory and regulatory requirements.

Item 3: This project includes both State and Federal funding and the programmed cost for this project is estimated at \$10,550,000. The scope of work consists of bridge rehabilitation along Cermak Road due to poor structure conditions including substructure repair and bridge deck replacements over IHB Railroad/Gardner Avenue, 25th Avenue, and Addison Creek. For the Cermak Road over Gardner Road and IHB Railroad structure, the work includes replacing the deck and approaches, repairing the superstructure and substructure, increasing the clearance for the bridge over railroad tracks to a minimum of 21'-6", and replacing pier caps 3 and 6. The Cermak Road over 25th Avenue structure includes the replacement of the deck and approach slabs as well as the repair of the superstructure and substructure. The Cermak Road over Addison Creek structure includes a full deck slab and superstructure replacement with widening, additional piling at the piers and new steel piling for new abutments, a new 20-inch-thick slab deck, new 8' sidewalk on the north side which will be extended to the shared use paths at 19th Avenue on the east side and to 21st Avenue on the west side, and a new 7'-6" sidewalk on the south side of the bridge.

Item 5: The completion date is October 31, 2022 plus 10 working days for punch list and clean-up items.
