

April 12, 2013

SUBJECT: FAU 2411 (Western Avenue) Project M-4003(147) Section 12-00114-00-RS (Geneva) Kane County Contract No. 63814 Item 134 April 26, 2013 Letting Addendum (A)

NOTICE TO PROSPECTIVE BIDDERS:

Due to clarify information necessary to revise the following:

- 1. Replaced the Schedule of Prices.
- 2. Revised Table of Contents.
- 3. Added page 34A to the Special Provisions.
- 4. Revised sheet 3 of the Plans.

Prime contractors must utilize the enclosed material when preparing their bid and must include any Schedule of Prices changes in their bidding proposal.

Bidders using computer-generated bids are cautioned to reflect any and all Schedule of Prices changes, if involved, into their computer programs.

Very truly yours,

John Baranzelli, P.E. Acting Engineer of Design and Environment

Jedge abschbyer RE.

By: Ted B. Walschleger, P.E. Engineer of Project Management

PARKWAY RESTORATION

Revised 4/12/13

XXOO7278: PARKWAY RESTORATION

WORK DESCRIPTION:

This work shall consist of the furnishing and placing of topsoil, seed, fertilizer, and hydraulic mulch. This work shall be done in accordance with Sections 211, 250 and 251 of the Standard Specifications except as modified herein. The topsoil shall be pulverized and placed to a compacted minimum depth of four (4") inches. The topsoil will be placed in such a manner such that after compaction and normal settling the final grade of the soil will be at the same elevation as the top of the adjacent curb, sidewalk, or driveway. To minimize the amount of material removed, the excavated material removed from the site can be reused to fill all voids. Reused material shall be capped with pulverized topsoil.

No Sodding will be used in this contract. Instead, grassed areas will be restored by planting Class 1, Lawn Mixture grass seeds. The planting times for this seed mix shall be according to the Standard Specifications. Full payment for this item will be made when the grass has germinated and is at least two (2") inches in height, covering no less than 75% of the planted area at each location where seeds were planted. Any damage done to the grassed areas outside of the construction limits or within the construction limits, but unnecessary for the purpose of this contract, will be restored as described above at the Contractor's expense and no additional compensation will be allowed. Interseeding and fertilizing of the existing grass will be allowed if in the Engineers opinion the existing turf was not excessively disturbed. Fertilizer nutrients at the specified ratios shall be placed at the rate specified in the Standard Specifications.

The Contractor shall furnish, transport and place hydraulic mulch over the seeded areas. Within 24 hours of the time seeding is placed, the seeded area shall be given a covering of mulch using Method-3 of Section 251, see article 251.03(c).

Method-3 shall not be used on slopes greater than 1:3(V: H). This method shall consist of machine application of wood or paper fiber hydraulic mulch at the specified rate using an approved hydraulic seeder. The hydraulic mulch shall be applied as slurry of 2000 pounds of mulch and not less than 2000 gallons of water per acre. The hydraulic mulch slurry shall be agitated a minimum of 5 minutes before application. The seeds shall not be applied concurrently with this method. Following the mulching operation, foot or vehicular traffic, or the movement of any equipment over the mulched area is prohibited. If Contractor's equipment or personnel displaces mulch, it shall be repaired or replaced at Contractor's expense, in a manner satisfactory to the Engineer.

METHOD OF MEASUREMENT:

This item shall be measured for payment per square yard for the area in which parkway restoration has been performed.

BASIS OF PAYMENT:

The finish work shall be paid for at the contract unit price per square yard for PARKWAY RESTORATION, which price shall be full compensation for all labor, equipment, material and incidentals needed to complete the work as specified.
