4 mm wide x 2 mm deep groove in anchor boll with 3 mm "

coil wire

#### MATERIALS FOR ILLINOIS COIL-LOCK ANCHOR BOLT

The anchor ball shall be fabricated from cold drawn or hal finished seamless carbon steel mechanical labing conforming to ASTW A 518, Grade 1026, CW and supplied with hexagonal nuts and cut washers.
The coll wire shall be made of any suitable soft steel wire.
The finished anchor both shall be cleaned of rust and other foreign materials and wrapped or packaged to prevent conformation until they are installed. The egony grout shall be a two component, appay resin bonding system conforming to ASTW C 881, Type 1, Grade 1 and of a Class suitable for the temperature at installation.

## INSTALLATION PROCEDURE for the ILLINOIS

### COIL-LOCK ANCHOR BOLT

1. With the coll wire in place, the ball shall be inserted into the hole and turned clackwise to a snug fit in the hole. Aut and washer shall be placed on the ball, The nut shall be tensioned until the steet base plates are held securely to the concrete bearing seal.
2. Epony grout shall be pumped through the zerk fitting with a pressure gun. Pumping shall continue until the epony overflows the hole around the ball shank. After pumping is discontinued, excess epony shall be immediately wiped off.

## ALTERNATE ANCHOR BOLTS

The Contractor may use, at his aption, the capsule or the adhesive cartridge type anchor rads that have been previously lested and given a prior approval by the Department. The Contractor shall install these anchor rads in pre-drilled holes according to the anaturacturer's recommendations and procedures.

The capsule or the adhesive cartridge type anchor rads shall be a two part system composed of:

1. A threaded rad stud with rut and washer of the type specified.

2. A sealed glass capsule or a sealed glass adhesive cartridge containing premeasured amounts of the adhesive chemical.

ASTM F 1554 (Fy = 724 mpa), ASTM A 449 and AASHTO M 314 (Fy = 724 mpa) anchor boils may be substituted for the anchor balls shown above.

#### GENERAL NOTES

Holes in the masonry for anchor boils shall be drilled through the base plates to the diameter and depth shown or according to the manufacturer's recommendation after beams or girders have been erected and adjusted. Prior to setting the boils, the holes shall be dry and oil dust and loose particles shall be removed by the use of compressed oir or vacuuming. The anchor boils, furnished and installed and including the epay grout or capsules shall not be poid for separately but shall be included in the unit bid price for Furnishing and Erecting Structural Steel.

All dimensions are in millimeters (mm) except as noted.
