## **REMOVAL AND DISPOSAL OF REGULATED SUBSTANCES**

---

This work shall be according to Article 669 of the Standard Specifications and the following:

**Qualifications.** The term "environmental firm" shall mean an environmental firm with at least five (5) documented leaking underground storage tank (LUST) cleanups or that is pre-qualified in hazardous waste by the Department. Documentation includes but is not limited to verifying remediation and special waste operations for sites contaminated with gasoline, diesel, or waste oil in accordance with all federal, state, or local regulatory requirements and shall be provided to the Engineer for approval. The environmental firm selected shall not be a former or current consultant or have any ties with any of the properties contained within and/or adjacent to this construction project.

**General.** This special provision will likely require the Contractor to subcontract for the execution of certain activities.

All contaminated materials shall be managed as non-special waste. This work shall include monitoring and potential sampling, analytical testing, and management of a material contaminated by regulated substances.

The environmental firm shall continuously monitor for worker protection, and the Contractor shall manage and dispose of all soils excavated within the following areas as classified below. The lateral distance is measured from centerline, and the farthest distance is the offset distance or construction limit, whichever is less. Soil samples or analysis without the approval of the Engineer will be at no additional cost to the Department. Phase I Preliminary Engineering information is available through the District's Environmental Studies Unit.

Station 7+00 to Station 10+00, 0 to 50 feet RT (BP Gasoline Station, Site 1595A-4, 339 East Roosevelt Road) – non-special waste. Contaminants of concern sampling parameters: VOCs, SVOCs, and Metals.
