IDOT PROJECT LABOR AGREEMENT DETERMINATION

To: Omer Osman, Secretary
From: Trisha Thompson, Region 2 Engineer
Date: 3/18/2024
Re: Midland Road 64T18 Henry County
(Midland Road -W South St in Kewanee to US 34}

In accordance with the Project Labor Agreement Act (30 ILCS 571), it is recommended that a project labor agreement (PLA) be utilized for the above-captioned Project. This recommendation is based on the considerations indicated below.

- 1) The Project is being awarded and administered by IDOT (i.e., not by another governmental agency).
- 2) The Project is being constructed using state or local funds only (i.e., no federal funds).
- 3) The overall size, scope, sequencing, logistics or other aspects of the Project make it particularly challenging to manage, and use of a PLA is expected to help assure that the construction work is performed properly and efficiently under the circumstances.
- 4) The duration of construction activity on the Project is expected to exceed one construction season (i.e., 110 or more working days), or the nature of the Project results in a heightened need for labor force continuity and stability over a substantial period of time.
- 5) There is a firm construction completion date established for the Project thereby increasing the adverse consequences of any work stoppage or other labor disruption.
- 6) The time required to complete the Project is expected to extend beyond the expiration date of one or more existing collective bargaining agreements covering trades likely to be involved in the Project, thereby increasing the likelihood of work stoppage(s) or other labor disruption(s) during construction of the Project.
- 7) In the absence of a PLA, there is an increased likelihood of jurisdictional disputes among unions or of conflict between unionized and non-unionized workers on the Project that could have a potentially material adverse effect on the time, cost, or quality of work performed on the Project.

8) This project presents specific safety concerns to the traveling public and a PLA, will ensure labor force continuity and stability, decreasing the length of the safety concern.

9) Use of a PLA is expected to result in improved access to skilled labor, improved efficiency, or improved safety performance on the Project.

10) Use of a PLA on the Project is not expected to have a material adverse effect on the competitive bidding process.

11) Use of a PLA on the Project is not expected to have a material adverse effect on the ability of the Department to achieve other Departmental goals (e.g., utilization of disadvantaged businesses, utilization of Illinois domiciled businesses, development of competitive vendor alternatives over time, etc.).

12) There are other material considerations favoring or disfavoring use of a PLA on this Project as follows:

Based upon the identified considerations, we recommend that you approve use of a PLA on this Project. Upon your approval, the Department shall undertake to negotiate in good faith a PLA with the relevant labor organization(s), and shall include in all necessary bid specifications and other documents information regarding the actual or form of PLA that is to binding upon all contractors and their employees.

Attachment A

The use of a Project Labor Agreement (PLA) for Contract 64T18 is consistent with all State and Local statutory and regulatory requirements.

Project Description: This project consists of milling and resurfacing of Midland Road with patching from W South Street to US 34 south of Kewanee.

Item 3:

This project includes both state and federal funding and the programmed cost for the project is \$5,500,000. Any disruption in the continuity of this project due to labor issues would result in the delay of deadlines which would cause safety concerns for the travelling public. Lapsing trade contracts during the project duration would be addressed through use of a Project Labor Agreement. It is the Illinois Department of Transportation’s finding that the large skilled workforce needed for this project can be provided by union trades involved and is a necessary requirement for a Project Labor Agreement.

Item 4:

This project is scheduled to be let in June 2024 and work is expected to begin in the summer of 2024. The project schedule will have a November 26, 2024 completion date. Any labor issues could put the project at risk of exceeding the required timeframes and exposing workers and the travelling public to additional hazards.

Item 6:

The targeted completion timeframe of the contract falls beyond the union contract expiration dates noted below:

<u>Local</u>	Location	Classification	<u>Contract Expiration</u>
309	MOLINE	LABORER	12/31/2024
544	MOLINE	CEMENTFINISHER	12/31/2024
538	GALESBURG	LABORER	4/20/2025
587	DIXON	CEMENT FINISHER	5/31/2025
649	PEORIA	OPERATOR	3/31/2025
727	DIXON	LABORER	4/30/2024
790	DIXON	CARPENTER	4/30/2025

Item 8:

The proposed work has a deadline for completion at the end of 2024. This deadline is to ensure the completion of the work prior to the need for snow removal operations. Delays into the winter will cause issues for the driving public and maintainers tasked with snow removal activities. As there is a hospital and nursing home facility, the delays could further affect emergency services for those facilities and the people that use them.

Fed. Proj. No: STP-DEWC(629)**

Item 9:

The use of a PLA on this project will result in improved access to skilled labor, improved efficiency and improved safety performance because it will assist in coordinating the labor forces of twelve separate trade unions that may be involved in its construction efforts.
