BASIS OF DESIGN:
Loading and Distribution: D.L. – Computed; L.L. – H-15. Use AASHO distribution

fs – (Structural Steel)	18000# psi
fs – (Reinforcement Steel – Intermediate Grade)	20000# psi
Reinf. Steel Bond; Unanchored Bars	150# psi
Anchored Bars	225# psi
fc – Compression in extreme Fiber: Stress in Flexure	
Substructure	800# psi
Super Structure	1200# psi
Neg. Mom. of Deck Slab	1350# psi
fc Bearing, Bridge seat under Rollers	1000# psi
" " Fixed Plate	700# psi
fc Shear, no web Reinf. Bars unanchored	60# psi
no web Reinf. Bars anchored	90# psi
Earth Pressure: Equivalent Fluid Pressure	40# per cu. ft.

Surcharge: Three Feet above crown of Rdwy.

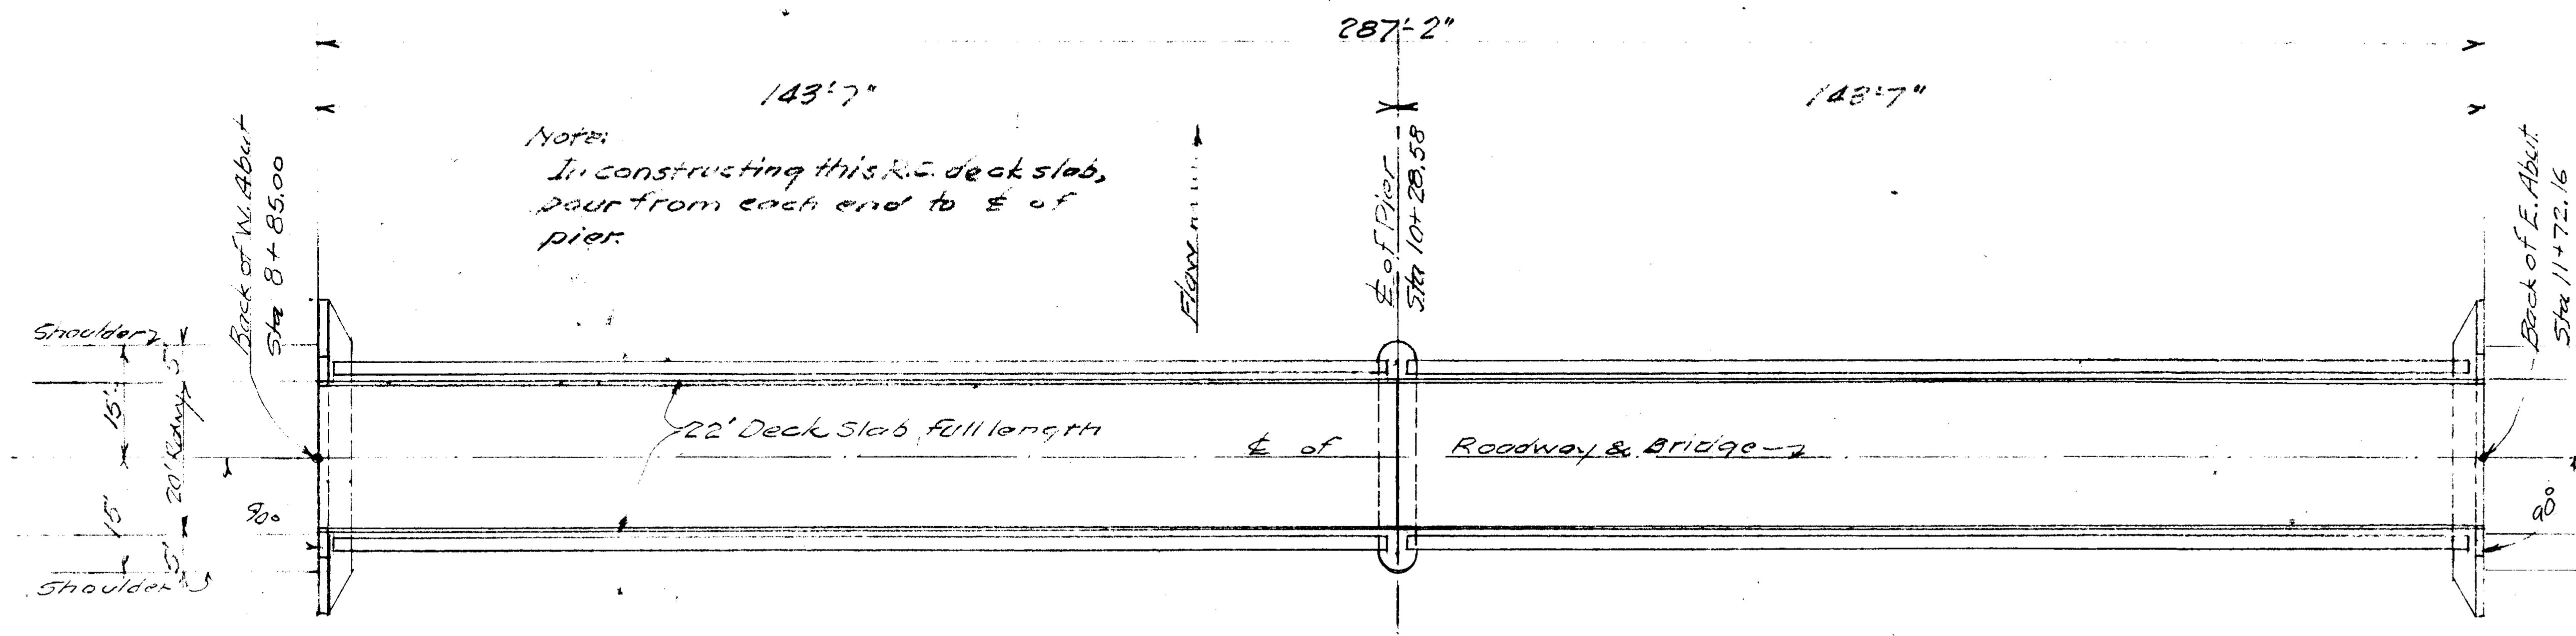
┼ LIST OF QUANTITIES

Item	Unit	Number of Units
Class X Concrete Ⓐ	Cu Yd	ϕ 418.6
Reinforcement Bars Ⓐ	Lbs	11540
Furnishing Treated Piles		
Θ up to 20 ft. long. Ⓐ	Lin Ft	726
Driving piles up to 20 ft long	Lin Ft.	726
Channel Excavation	Cu Yd	2500
Sandstone Masonry Removal	Cu Yd	46
Removal of Existing 180 Ft		
Thru Truss Span (90 tons ±)	Lump Sum	
Test Piles	Each	2

┼ Quantities given are for the substructure only.

ϕ Fine aggregate for Class X concrete will be furnished at the bridge site free of charge.

Θ 33 - 22 Ft. treated piles required. Ⓐ



PLAN

GENERAL NOTES:

The two 140 Ft. Thru Truss Spans are salvaged from a highway bridge over Mill Creek at Milan, Ill.

The existing 180 Ft. Thru Truss span with timber plank deck is to be removed and stock piled to the East of Sta 12+00. and to remain the property of Clear Lake township. Ⓐ

State of Illinois "Standard Specifications" dated July 1, 1942 with supplemental Special Provisions shall govern for all work.

Materials from channel excavation and masonry removal shall be stock piled on the embankment East of Sta. 12+00

LOG OF TEST BORINGS

Note to Erector:

"X" Dimensions as shown are derived from field measurements taken at 12" above top of curb. Slight changes may be encountered at 24" above top of curd and the brackets shall be cut in the field to fit the new measurements.

Welds: Field welds shall be 3/16" c. f. an welds & Plug welds shall be 3/16" diameter.

Pipe: Rail shall be made from 2½"Ø salvaged pipe. It may be composed of random lengths of pipe spliced with inserted 12" lengths of 2"Ø galvanized pipe - See detail on this sheet.
Rail shall extend in a straight line throughout the entire length of each span.

Rail Posts: All rail posts shall be set in a vertical position.

Specifications:

State of Illinois Standard Specifications for Road and Bridge Construction adapted July 1, 1942, plus Special Provisions shall govern.

Material: Structural steel specifications ASTM. Designated A 7 plus 0.2% copper, unless otherwise noted
Bolts: ⅝" diam., Open Holes ¾" diam., Reaming, none.
Inspection: Before painting, by Sangamon County Highway Department.
Painting: Shop, one coat of red lead paint.
Field, two coats of aluminum paint.
All paint shall be furnished and applied by the contractor.

Method of Payment: Railing shall be paid for as linear feet of handrail and shall include all pipe, pipe ends, rail posts, rail brackets, bolts, washers and anchors, and all welding required for completion of the handrails as shown on the plans.

All bolts nuts and washers shall be galvanized.
