

Illinois Department of Transportation

2300 South Dirksen Parkway / Springfield, Illinois / 62764

June 6, 2012

SUBJECT: Various Routes
Project HSIP-000S(902)
Section 2011-209-TS
Cook County
Contract No. 60R47
Item No. 97, June 15, 2012 Letting
Addendum A

NOTICE TO PROSPECTIVE BIDDERS:

Attached is an addendum to the plans or proposal. This addendum involves revised and/or added material.

1. Replaced the Schedule of Prices.
2. Revised the Table of Contents to the Special Provisions.
3. Added pages 171 & 172 to the Special Provisions.
4. Revised sheet 7 of the Plans.

Prime contractors must utilize the enclosed material when preparing their bid and must include any Schedule of Prices changes in their bidding proposal.

Bidders using computer-generated bids are cautioned to reflect any and all Schedule of Prices changes, if involved, into their computer programs.

Very truly yours,

John D. Baranzelli, P. E.
Acting Engineer of Design and Environment

A handwritten signature in black ink, appearing to read "Ted B. Walschleger P.E." with a stylized flourish at the end.

Revised 6-5-2012

REMOVAL AND DISPOSAL OF REGULATED SUBSTANCES

This work shall be according to Section 669 of the Standard Specifications and the following:

Revise the second and third sentence of the first paragraph of Article 669.08 to read: "The affected area shall be monitored with a photo ionization detector (PID) utilizing a lamp of 10.6 eV or greater or an instrument with a flame ionization detector (FID). Any reading on the PID or FID in excess of background levels indicates the potential presence of contaminated material requiring it to be properly managed as either a non-special waste, non-hazardous special waste, or hazardous waste."

Revise the fourth and fifth sentence of the second paragraph of Article 669.08 to read: "When the analytical results indicate that detected levels are at or below the most stringent maximum allowable concentration (MAC) for chemical constituents in uncontaminated soil established pursuant to the proposed Subpart F of 35 Illinois Administrative Code (IAC) 1100.605, the soil excavated shall be included in the storm sewer or earth excavation, as appropriate, and backfill shall be in accordance to Article 205 and/or 208. When the analytical results indicate that detected levels are above the most stringent MAC for chemical constituents in uncontaminated soil established pursuant to the proposed Subpart F of 35 IAC 1100.605, the soil excavated shall be considered a waste and managed appropriately."

Qualifications. The term environmental firm shall mean an environmental firm with at least five (5) documented leaking underground storage tank (LUST) cleanups or that is pre-qualified in hazardous waste by the Department. Documentation includes but not limited to verifying remediation and special waste operations for sites contaminated with gasoline, diesel, or waste oil in accordance with all Federal, State, or local regulatory requirements and shall be provided to the Engineer for approval. The environmental firm selected shall not be a former or current consultant or have any ties with any of the properties contained within and/or adjacent to this construction project.

General. This Special Provision will likely require the Contractor to subcontract for the execution of certain activities.

All contaminated materials shall be managed as "uncontaminated soil" or non-special waste. This work shall include monitoring and potential sampling, analytical testing, and management of a material contaminated by regulated substances. The Environmental Firm shall continuously monitor all soil excavation for worker protection and soil contamination. **Phase I Preliminary Engineering information is available through the District's Environmental Studies Unit.** Soil samples or analysis without the approval of the Engineer will be at no additional cost to the Department.

A) The Contractor shall manage and dispose of all soils excavated within the following areas as classified below. The lateral distance is measured from centerline and the farthest distance is the offset distance or construction limit whichever is less.

1. Station 259+70 to Station 260+00 20 to 60 feet RT (Residences, Site 2416-1, 5031-5036 Golf Road, 9555-9601 Lawler Avenue) – non-special waste. Contaminants of concern sampling parameters: Arsenic.
2. Station 260+30 to Station 260+80 20 to 60 feet LT (Residences, Site 2416-1, 5031-5036 Golf Road, 9555-9601 Lawler Avenue) – non-special waste. Contaminants of concern sampling parameters: Arsenic and Lead.

Added 6-5-2012

3. Station 24+00 to Station 24+60 20 to 70 feet RT (Cash for Gold, Site 2416-8, 9240 Skokie Boulevard) – non-special waste. Contaminants of concern sampling parameters: BETX and PNAs.
4. Station 26+60 to Station 27+30 20 to 70 feet LT (Shell Gasoline Station, Site 2416-7, 9301 Skokie Boulevard) – non-special waste. Contaminants of concern sampling parameters: PNAs and Lead.

B) The Contractor shall manage any excavated soils and sediment **within the construction limits of this project as fill**. Although the soil concentrations may exceed the stringent proposed Maximum Allowable Concentrations (MACs) of Chemical Constituents in Uncontaminated Soils, it does not exceed the proposed MACs for Metropolitan Statistical Area (MSA) County. Therefore, the following areas can be utilized within the construction limits as fill or managed off-site as “uncontaminated soil” to a Clean Construction and Demolition Debris (CCDD) or Uncontaminated Soil fill operation within the MSA County. If the soils cannot be utilized within the construction limits as fill or off-site as “uncontaminated soil” to a CCDD or Uncontaminated Soil fill operation, then they must be managed off-site as a non-special waste.

1. Station 12+75 to Station 13+15 20 to 60 feet RT (Residence, Site 2416-3, 5001 Golf Road) – uncontaminated soil. Contaminants of concern sampling parameters: Lead.
2. Station 24+90 to Station 25+60 20 to 70 feet LT (Orchard Plaza, Site 2416-6, 9300-9320 Skokie Boulevard) – uncontaminated soil. Contaminants of concern sampling parameters: Lead.

REMOVAL AND DISPOSAL OF REGULATED SUBSTANCES (BDE)

Effective: January 1, 2012

Revise Article 669.01 of the Standard Specifications to read:

“669.01 Description. This work shall consist of the transportation and proper disposal of contaminated soil and water. This work shall also consist of the removal, transportation, and proper disposal of underground storage tanks (UST), their content and associated underground piping to the point where the piping is above the ground, including determining the content types and estimated quantities.”

Revise the second paragraph of Article 669.16 of the Standard Specifications to read:

“The transportation and disposal of soil and other materials from an excavation determined to be contaminated will be paid for at the contract unit price per cubic yard (cubic meter) for NON-SPECIAL WASTE DISPOSAL, SPECIAL WASTE DISPOSAL, or HAZARDOUS WASTE DISPOSAL.”

Added 6-5-2012
