

EJIW Gate Valves, Series N

City of Chicago Specification

engineered designed constructed for a position of trust

SERIES N GATE VALVES:

The Chicago Gate Valve is manufactured according to City of Chicago specifications in sizes 3" to 16" inclusive. It has double disc construction with parallel seats a V-type gate spreading mechanism which is actuated when the wedging piece comes in contact with a lug at the bottom of the valve body. The wedge is thus restrained from further movement and the discs being forced downward over the wedges are forced to spread.

SIZE	CAT. #
3"	3K22
4"	4K22
6"	6K22
8"	8K22
12"	12K22
16"	16K22

MECHANICAL JOINT END	DIMENSIONAL INFORMATION					
	3"	4"	6"	8"	12"	16"
Overall Length	10.500	13.125	13.375	16.125	16.125	23.125
Laying Length	8.625	8.125	8.375	10.125	11.125	16.125
Centerline to Top of Stem	13.125	16.500	20	23.125	31	36.500
Number of Turns to Open	7	9	14	18	43	50
