**LEGEND**  
 CP #106 CONTROL POINT

NOTE:  
 "The survey control provided in these construction plans was set for the purpose of topographical surveying for the design of this project. At the time the survey work was completed, these control points were found to be correct. Due to circumstances beyond the control of the Surveyor and Engineer, it is possible that the control provided may be disturbed after field work has been completed and prior to the start of construction. The control as provided shall be verified by the Contractor prior to beginning any construction or layout work. If, upon verifying the control, the Contractor finds that the control provided in the plans is missing or inaccurate, the Contractor shall notify the Engineer prior to beginning any construction or layout work. If the Contractor determines that additional control is necessary to ensure accurate layout of the work, it is the responsibility of the Contractor to establish any such additional control."
