WORKING DAYS (BDE)

Effective: January 1, 2002

The Contractor shall complete the work within **<u>20</u>** working days.

ADMINISTRATION OF WORKING DAYS

Due to the uncertainty associated with manufacturing Cured-In-Place Pipe Liners, the basis for charging working days on this contract will be according to Article 108.04 of the Standard Specifications with the following exceptions.

- The charging of working days will be suspended after a pipe culvert has been cleaned, inspected, and the associated design report submitted for the Engineer's consideration.
- Once the Cured-In-Place Pipe Liner material order is placed, working days will not be charged until the Contractor accepts delivery of the pipe liner up to 42 calendar days after the material order has been placed, whichever is less.

At the discretion of the Engineer, the maximum allowable working day suspension of 42 calendar days may be extended, given adequate documentation of material delays for the Cured-In-Place Pipe Liner.

• Upon delivery of the Cured-In-Place Pipe Liner or beyond the maximum allowable suspension, the Engineer will resume charging working days according to Article 108.04.

This special provision applies to the following materials:

Cured-In-Place Pipe Liner, 24" Cured-In-Place Pipe Liner, 30" Cured-In-Place Pipe Liner, 36"
