IDOT PROJECT LABOR AGREEMENT DETERMINATION

To: Omer Osman, Secretary

From: Jose Rios, Region One Engineer

Date: 6/25/2024

Re: FAI Route 94, FAP 346 – Park Ave to I-90/94 Kennedy/Edens Junction, Contract Number 62V17, Cook & Lake Counties

{Letting: September 20, 2024
working days}

Completion Date: April 30, 2026 plus 10

In accordance with the Project Labor Agreement Act (30 ILCS 571), it is recommended that a project labor agreement (PLA) be utilized for the above-captioned Project. This recommendation is based on the considerations indicated below.

- 1) The Project is being awarded and administered by IDOT (i.e., not by another governmental agency).
- 2) The Project is being constructed using state or local funds only (i.e., no federal funds).
- 3) The overall size, scope, sequencing, logistics or other aspects of the Project make it particularly challenging to manage, and use of a PLA is expected to help assure that the construction work is performed properly and efficiently under the circumstances. See attachment A below.
- 4) The duration of construction activity on the Project is expected to exceed one construction season (i.e., 110 or more working days), or the nature of the Project results in a heightened need for labor force continuity and stability over a substantial period of time.
- 5) There is a firm construction completion date established for the Project thereby increasing the adverse consequences of any work stoppage or other labor disruption.
- 6) The time required to complete the Project is expected to extend beyond the expiration date of one or more existing collective bargaining agreements covering trades likely to be involved in the Project, thereby increasing the likelihood of work stoppage(s) or other labor disruption(s) during construction of the Project.
- 7) In the absence of a PLA, there is an increased likelihood of jurisdictional disputes among unions or of conflict between unionized and non-unionized workers on the Project that could have a potentially material adverse effect on the time, cost, or quality of work performed on the Project.

Cook & Lake Counties

Fed. Proj. No. HSIP BZF0(469))

8) This project presents specific safety concerns to the traveling public and a PLA, will ensure labor force continuity and stability, decreasing the length of the safety concern.

9) Use of a PLA is expected to result in improved access to skilled labor, improved efficiency, or improved safety performance on the Project.

10) Use of a PLA on the Project is not expected to have a material adverse effect on the competitive bidding process.

11) Use of a PLA on the Project is not expected to have a material adverse effect on the ability of the Department to achieve other Departmental goals (e.g., utilization of disadvantaged businesses, utilization of Illinois domiciled businesses, development of competitive vendor alternatives over time, etc.).

12) There are other material considerations favoring or disfavoring use of a PLA on this Project as follows:

Based upon the identified considerations, we recommend that you approve use of a PLA on this Project. Upon your approval, the Department shall undertake to negotiate in good faith a PLA with the relevant labor organization(s) and shall include in all necessary bid specifications and other documents information regarding the actual or form of PLA that is to binding upon all contractors and their employees.

Contract No. 62V17

Cook & Lake Counties

Fed. Proj. No. HSIP BZF0(469))

The use of Project Labor Agreement (PLA) for Contract 62V17 is consistent with all State and Local statutory and regulatory requirements.

Item 3: This project includes both State and Federal funding and the programmed cost for this project is estimated at \$5,938,000. The scope of work consists of the replacement of surveillance stations, 16 ramp meter systems, the installation of one active wrong way detection system and the replacement of six (6) sign structures and associated foundations. Wireless in-pavement vehicle detection will replace inductive loops. Surveillance equipment will be installed in a new cabinet or incorporated into a modified existing ITS cabinet. Ramp meter systems include the controller, signal heads, warning signs and supporting infrastructure. The infrastructure installed under this contract will be connected to the fiber optic cable backbone installed under contract 62D79. The wrong way detection system will connect to the vendor via a cellular modem. Coordinate fiberoptic/network integration efforts of all installed equipment and route to TSC headquarters. The work also consists of excavation, site restoration, maintenance of traffic, and all incidental and collateral work necessary to complete the project as shown on the plans and as described herein.

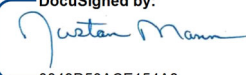

The project is located in the City of Chicago, Villages of Lincolnwood, Skokie, Morton Grove, Wilmette, Northfield and Northbrook in Cook County, Illinois and the City of Highland Park in Lake County, Illinois.

Item 5: The completion date is April 30, 2026, plus 10 working days for punch list and clean-up items.
