Notice to Bidders, Specifications and Proposal

**Illinois Department
of Transportation**

Springfield, Illinois 62764

**Contract No. 62F50
Various Counties
Section 2017-034I
Various Routes
District 1 Construction Funds**

Prepared by

S

Checked by

(Printed by authority of the State of Illinois)

- 1. TIME AND PLACE OF OPENING BIDS.** Electronic bids are to be submitted to the electronic bidding system (iCX-Integrated Contractors Exchange). All bids must be submitted to the iCX system prior to 10:00 a.m. September 22, 17 prevailing time at which time the bids will be publicly opened from the iCX SecureVault.
- 2. DESCRIPTION OF WORK.** The proposed improvement is identified and advertised for bids in the Invitation for Bids as:

**Contract No. 62F50
Various Counties
Section 2017-034I
Various Routes
District 1 Construction Funds**

Cleaning various expressways and arterial highways in various counties.

- 3. INSTRUCTIONS TO BIDDERS.** (a) This Notice, the invitation for bids, proposal and letter of award shall, together with all other documents in accordance with Article 101.09 of the Standard Specifications for Road and Bridge Construction, become part of the contract. Bidders are cautioned to read and examine carefully all documents, to make all required inspections, and to inquire or seek explanation of the same prior to submission of a bid.

(b) State law, and, if the work is to be paid wholly or in part with Federal-aid funds, Federal law requires the bidder to make various certifications as a part of the proposal and contract. By execution and submission of the proposal, the bidder makes the certification contained therein. A false or fraudulent certification shall, in addition to all other remedies provided by law, be a breach of contract and may result in termination of the contract.
- 4. AWARD CRITERIA AND REJECTION OF BIDS.** This contract will be awarded to the lowest responsive and responsible bidder considering conformity with the terms and conditions established by the Department in the rules, Invitation for Bids and contract documents. The issuance of plans and proposal forms for bidding based upon a prequalification rating shall not be the sole determinant of responsibility. The Department reserves the right to determine responsibility at the time of award, to reject any or all proposals, to readvertise the proposed improvement, and to waive technicalities.

By Order of the
Illinois Department of Transportation

Randall S. Blankenhorn,
Secretary

INDEX
FOR
SUPPLEMENTAL SPECIFICATIONS
AND RECURRING SPECIAL PROVISIONS

Adopted January 1, 2017

This index contains a listing of SUPPLEMENTAL SPECIFICATIONS and frequently used RECURRING SPECIAL PROVISIONS.

ERRATA Standard Specifications for Road and Bridge Construction (Adopted 4-1-16) (Revised 1-1-17)

SUPPLEMENTAL SPECIFICATIONS

<u>Std. Spec. Sec.</u>		<u>Page No.</u>

STATE OF ILLINOIS

SPECIAL PROVISIONS

The following Special Provisions supplement the "Standard Specifications for Road and Bridge Construction," adopted April 1, 2016, the latest edition of the "Manual on Uniform Traffic Control Devices for Streets and Highways," and the "Manual of Test Procedures for Materials" in effect on the date of invitation for bids, and the Supplemental Specifications and Recurring Special Provisions indicated on the Check Sheet included herein which apply to and govern the construction of Various Routes, Section 2017-034I, Various Counties, Contract No. 62F50 and in case of conflict with any part or parts of said Specifications, the said Special Provisions shall take precedence and shall govern.

Various Routes
Section 2017-034I
Various Counties
Contract No. 62F50

LOCATION OF IMPROVEMENT

This work is located on various State maintained expressway and arterial routes located within the counties of Cook, DuPage, Kane, Lake, McHenry and Will.

DESCRIPTION OF IMPROVEMENT

The work to be completed under this contract is divided into four (4) categories:

- I. EXPRESSWAY CLEANING – April 2nd, 2018 to November 20, 2018
- II. ARTERIAL CLEANING - April 2nd, 2018 to November 20, 2018
- III. SUPPLEMENTAL SWEEPING – January 1, 2018 to December 31, 2018
- IV. SIGN CLEANING - January 1, 2018 to December 31, 2018

The work to be done under Expressway Cleaning, Arterial Cleaning, Supplemental Sweeping and Sign Cleaning shall consist of the pickup, removal and satisfactory disposal of all sand, stones, debris, deceased animal carcasses, refuse and any other rubbish which has accumulated on the highway areas hereinafter described as the areas to be cleaned. After each cleaning cycle all areas must present an appearance which is completely satisfactory to the Engineer. Adequate equipment and hand labor is to be provided to accomplish the work to the satisfaction of the Engineer.

Specific provisions for the four (4) categories of work will be described in subsequent pages of these Special Provisions.

PROSECUTION OF THE WORK

The Engineer will issue a work order to the Contractor prior to the Contractor proceeding with any work on this Contract. Terms of Contract are specified in these Special Provisions.

The contractor shall understand before bidding that the plan schedule of starting and completion dates may be revised due to the Department's operational needs. There is no guaranteed minimum or maximum of any Pay Item Work.

INTERPRETATION OF QUANTITIES

The quantities shown in the Summary of Quantities are approximate to perform the cleaning work that may occur during the Term of Contract.

The quantities in the Summary of Quantities may be increased, decreased or deleted. Adjustments in contract unit prices will not be made due to an increase, decrease or deletion of items.

WORKING DAYS

A working day shall be defined as any calendar day between April 2 and November 20 inclusive, except Saturdays, Sundays or legal holidays observed by the Contractor's entire work force in Illinois.

CONTRACT COMPLETION DATE

The Contractor shall schedule his/her operations in order to complete all work and open all roadways to traffic on or before December 31, 2018.

The Provisions of Article 108.09 of the Standard Specification shall apply to the contract completion date.

GUARANTEED WORKING DAYS FOR FIRST FULL EXPRESSWAY CLEANING CYCLE

The Contractor shall schedule his/her operations in order to complete the First Full Expressway Cleaning Cycle and open all roadways to traffic on or within twenty-five (25) guaranteed working days.

GUARANTEED WORKING DAYS FOR FIRST FULL ARTERIAL CLEANING CYCLE

The Contractor shall schedule his/her operations in order to complete the First Full Arterial Cleaning Cycle and open all roadways to traffic on or within sixty (60) guaranteed working days.

FAILURE TO COMPLETE FIRST FULL EXPRESSWAY CLEANING CYCLE

Time is of the essence to the completion of the First Full Expressway Cleaning Cycle. Should the Contractor fail to complete the First Full Expressway Cleaning Cycle within the working days stipulated in the contract, the Contractor shall be liable and shall pay to the Department the amount of \$10,000, not as a penalty but as liquidated damages, for each day of overrun in the cleaning cycle time or such extended time as may have been allowed. The liquidated damage amount specified will accrue and be assessed until final completion of the First Full Expressway Cleaning Cycle.

The Department will deduct these liquidated damages from any monies due or to become due to the Contractor from the Department.

When the time limit is specified as working days, the daily charge shall be made for each additional working day, computed as specified in Article 108.04 of the Standard Specifications and as defined in these Special Provisions.

A calendar day is every day and starts at 12:00 midnight and ends at the following 12:00 midnight, twenty-four hours later.

FAILURE TO COMPLETE FIRST FULL ARTERIAL CLEANING CYCLE ON TIME

Time is of the essence to the completion of the First Full Arterial Cleaning Cycle. Should the Contractor fail to complete the First Full Arterial Cleaning Cycle within the working days stipulated in the contract, the Contractor shall be liable and shall pay to the Department the amount of \$10,000, not as a penalty but as liquidated damages, for each day of overrun in the cleaning cycle time or such extended time as may have been allowed. The liquidated damage amount specified will accrue and be assessed until final completion of the First Full Arterial Cleaning Cycle.

The Department will deduct the liquidated damages from any monies due or to become due to the Contractor from the Department.

When the time limit is specified as working days, the daily charge shall be made for each additional working day, computed as specified in Article 108.04 of the Standard Specifications and as defined in these Special Provisions.

A calendar day is every day and starts at 12:00 midnight and ends at the following 12:00 midnight, twenty-four hours later.

GENERAL REQUIREMENTS

1. WORK AUTHORIZATION AND APPROVAL: The Engineer will verbally instruct the contractor on the type and the location of work to be performed (Expressway Cleaning, Arterial Cleaning, Supplemental Sweeping, and Sign Cleaning). The Contractor shall contact the Engineer by telephone no later than 6:30 AM each workday (excluding Saturdays, Sundays, and holidays observed by the Illinois Department of Transportation), to coordinate and obtain approval for daily work. The Contractor shall not revise the sequence of daily planned work without the Engineer's approval.

No Daily Contractor Work Requests / Scheduling shall be authorized or approved to start when it is determined by the Engineer that weather conditions will be unfavorable. Approval of all Daily Contractor Work Schedule Requests shall be solely determined by the Engineer and or Project Supervisor.

The Contractor shall contact the Engineer by telephone on a weekday (Monday through Friday excluding holidays observed by the Illinois Department of Transportation) at least 24 hours in advance of work on Saturdays, Sundays or holidays (including holidays observed by the Illinois Department of Transportation). Verbal work authorization instructions will be followed by written confirmation.

Because sweeping operations need water to work effectively, sweeping will **NOT** be allowed when temperatures or wind chill factors are forecasted by the departments certified consulting meteorologists to be and or drop below freezing. **TEMPERATURE MUST BE ABOVE THIRTY TWO (32) DEGREES FARENHEIT.** All shoulders and curb lines must be free of any existing snow and or ice. Dry sweeping shall be allowed only if it is considered an emergency, immediate hazard, or any work as designated by the Department that requires first priority corrective action.

The Contractor shall repeat work that is not satisfactory. If after inspection the Engineer determines the work is to be repeated, the Engineer will verbally instruct the Contractor on the type and the location of the work to be repeated by the later of the following: 11:30 AM of the 3rd day (excluding Saturdays, Sundays, and holidays observed by the Illinois Department of Transportation) following the day the work was performed or 55 hours after receipt of the completed Report of Contractor's Daily Work.

After satisfactory completion of the work, the Contractor will be furnished a written document of acceptance. Written authorization and/or acceptance of work will be made on forms established for this purpose. Samples of these forms are part of these Special Provisions.

If a section of roadway scheduled to be cleaned cannot be completed due to unforeseen highway operational reasons; including, but not limited to, areas of roadway under construction during the period of the contract and emergency conditions resulting in closures or restrictions for safety purposes, that portion(s) of a cleaning cycle shall be deleted from the contract. The section of roadway deleted may be returned to the contract, at the direction of the Engineer, when highway operational reasons no longer require the section of roadway to be deleted. When a section of roadway is returned to the contract the work will be paid at the same percentage of the cycle that was deleted and no additional compensation will be allowed. The Contractor shall indicate all sections of roadway deleted from the cleaning cycle, including mileage and the reason for deletion, on the Report of Contractor's Daily Work.

2. PERFORMANCE OF WORK:

- A. Work Direction: Cleaning equipment and workers will move in the same direction as traffic.
- B. Damage to State Property: The Contractor must perform the work in a manner that will not disturb or damage State Property. Curbs, guardrails, fences, railings, light poles, delineators, semi-permanent cones and barricades, signs and the like must not be damaged or disturbed. If State property is damaged or disturbed, the cost of repairs or replacement will be borne by the Contractor.
- C. Inconvenience: The Contractor will prosecute the work in a manner that will minimize the inconvenience to the motoring public. The Contractor shall create neither air pollution with dust nor hazardous conditions with water on the pavement.
- D. Traffic Obstruction: Should the operations of the Contractor be performed in a manner that causes traffic to congest to a degree which is unsatisfactory to the Engineer, the Contractor will, at the discretion of the Engineer, cease work until such time as the Engineer decides work can resume without undue traffic congestion.
- E. Disposal of Waste: Removal and disposal of all waste and deceased animal carcasses collected during the prosecution of this work will be the responsibility of the Contractor and will be disposed of by the Contractor at his expense. All applicable laws and ordinances related to the hauling, handling and disposition of such material shall be complied with by the Contractor. This applies especially to spillage, covered loads in trucks and legal dumping depots such as a commercial land fill operation.
- F. Flushing: Flushing shall not be done without receiving approval from the Engineer. Care shall be taken to prevent flushing waste into traffic or creating a hazard to traffic in areas being flushed. Flushing of raised medians will be allowed. The contractor shall notify and gain approval of the Engineer twenty-four (24) hours in advance of flushing raised medians. When cleaning under and behind guardrail, waste shall not be flushed outside of the area to be cleaned.

- G. Solid Waste Management Site: The Contractor will not be allowed to use any State right-of-way or any existing Department solid waste management site as part of this contract. The Contractor may procure an Illinois Environmental Protection Agency, Bureau of Land permit to develop and operate a private solid waste management site to transfer non-hazardous waste generated from street sweeping. The cost of developing and operating a private solid waste management site shall be considered as included in the contract unit prices bid for the work, and no additional compensation will be allowed.
- H. Sweeper Speed Limit: At no time shall the sweeping unit and any related vehicles in the sweeping train exceed **15** miles per hour in speed while performing any work.
3. **EQUIPMENT AND LABOR**: The Contractor is hereby informed and shall understand that sufficient equipment shall be provided and maintained so that the various cleaning cycles are satisfactorily completed within the allotted time and that cleaning cycles are started in close conformance with the Schedule of Starting Dates shown in the plans.

The Contractor, taking into consideration lost work days due to weather, will be expected to provide the necessary number of sweeping units to satisfactorily complete the First Full Expressway Cleaning Cycle, the First Full Arterial Cleaning Cycle, Sign Cleaning and other cleaning cycles on time. The Contractor shall provide adequate and sufficient supervision, equipment and labor to ensure a satisfactory, safe completion of all work to meet the cleaning schedules as shown in the plans.

Due to heavy accumulation of dirt and rubbish during the winter months, the First Full Expressway Cleaning Cycle, the First Full Arterial Cleaning Cycle and Supplemental Sweeping will require a concentrated effort of equipment and manpower to satisfactorily complete the work on time. Multiple cleanings of the same areas may be required before obtaining satisfactory results and acceptance by the Engineer.

Personnel shall be made available, with hand tools, to clean areas not accessible to sweeping units, such as on top of raised medians, aggregate/ stone shoulders regardless of width and under and 10 feet behind all guardrail regardless of surface type; also to loosen tightly compacted dirt in curb lines. These conditions are frequently encountered during all cleaning cycles. Hand work will also be required for the removal of all rubbish from stabilized surfaces on expressways and arterials.

Labor, material and equipment will remain on State right-of-way only for such time as is necessary to successfully prosecute the cleaning work required by the contract. Maintenance or over-night parking of equipment will not be permitted on State right-of-way.

The Contractor shall furnish a total of fifteen (15) two-way mobile communication devices meeting the approval of the Engineer as a means of expediting and maintaining communication with the Engineers. The Contractor shall install and maintain two-way mobile communication devices in State and Consultant vehicles designated by the Engineer. The communication devices shall be operated on the same frequency as the Contractor's supervisor's vehicles.

The communication devices shall remain in the State and Consultant vehicles until completion of the contract. The contractor shall remove and re-install the communication devices and plug all holes with approved material when the State changes vehicles. The Contractor shall also plug all holes at final removal of the communication devices at the end of the contract. The cost of this work shall be considered included in the cost of the contract.

Follow vehicles are to be equipped with a truck mounted impact attenuator at all times per cleaning train basis, in accordance with the plan sheets District One details for typical application of traffic control devices for highway and sign cleaning operations.

All vehicles are to be equipped with high intensity amber strobes. Strobes, headlights and flashers shall be displayed at all times when work is performed.

All personnel working under this contract will be required to wear an approved flagger vest when not in a vehicle.

4. **DRAINAGE STRUCTURES:** Particular care shall be taken to prevent dirt and rubbish from being pushed into roadway drainage structures. All bridges located within the specified limits of the Expressways that have drainage structures (scuppers, inlets, floor drains etc.) shall be cleaned by utilizing vacuum type sweepers or other approved equipment and methods that will prevent dirt and rubbish from being deposited into the drainage structures. All drainage structures frames and lids shall be cleaned. The cost of removal of any such waste shall be the responsibility of the Contractor.
5. **EXTRA WORK:** If the Contractor is required by the Engineer to perform cleaning work other than that delineated in these Special Provisions, payment for such work will be in accordance with Article 109.04 of the Standard Specifications.
6. **NIGHT CLEANING:** Night cleaning of certain areas of expressways is required as part of this contract. Limits of night cleaning are included in these Special Provisions under Expressway Cleaning Specifications - Limits of Cleaning - Night Cleaning Only.

Night cleaning of other areas of expressway and arterials are not permitted.

Limits of night cleaning may be reduced or increased by the Engineer due to unforeseen highway operational reasons; including, but not limited to emergency conditions resulting in restrictions for safety purposes.

Night cleaning is defined as cleaning performed between the hours of 9:00 PM and 5:00 AM.

7. **METHOD OF MEASUREMENT:** The satisfactory completion of a Full Expressway Cleaning Cycle, Full Arterial Cleaning Cycle, Supplemental Sweeping and the Sign Cleaning will be the standard measurement for payment.

It shall be the Contractor's responsibility to notify the Engineer when each cycle is completed on any designated routes.

If a cleaning cycle cannot be completed due to unforeseen highway operational reasons; including, but not limited to, areas of roadway under construction during the period of the contract and emergency conditions resulting in closures or restrictions for safety purposes, payment will be made for the percentage of the cycle completed and will be calculated by shoulder and curb mileage basis. The Contractor will not be compensated for parts of cycles that are not complete. The Engineer shall determine to what extent work is not completed. Any work that cannot be completed shall be stated by the contractor on the report of contractor's daily work. The contractor shall include limits, mileage and reasons.

Supplemental Sweeping will be measured for payment in miles of expressway shoulder cleaned and in miles of arterial gutters cleaned (curb miles) rounded down to the tenth of a mile. A standard automobile odometer shall be used by the Engineer to make the measurements. Supplemental sweeping not authorized in writing by the Engineer will not be measured for payment.

It shall be the Contractor's responsibility to notify the Engineer when supplemental sweeping is completed on any authorized sweeping routes.

8. BASIS OF PAYMENT: Expressway cleaning will be paid for at the contract unit price per each for FULL EXPRESSWAY CLEANING CYCLE and at the contract unit price per each for FULL ARTERIAL CLEANING CYCLE.

Supplemental sweeping will be paid for at the contract unit price per mile for SUPPLEMENTAL SWEEPING.

Sign cleaning shall be paid for at the contract unit price per each for SIGN CLEANING.

Night cleaning will not be paid for as a separate item, but the cost shall be considered as included in the contract unit prices for the cleaning cycles involved and no additional compensation will be allowed.

Laboring will not be paid for as a separate item, but the cost shall be considered as included in the contract unit prices for the cleaning cycles involved and no additional compensation will be allowed.

9. QUANTITIES: The quantities of cleaning cycles and curb miles specified in this contract are estimated amounts and are intended as approximations to be used for bidding purposes only. The contractor shall understand before bidding that all individual estimated shoulder and curb mile limits shown for each expressway will stand as shown regardless of whether the mileage is low or high. No additional mileage compensation will be allowed. It shall be understood that the unit prices of this contract will prevail throughout the period of this contract.
10. CONTRACT BOND: The successful bidder, at the time of execution of the contract shall deposit with the Department in accordance with the Standard Specifications for Road and Bridge Construction, a surety bond in the amount of five hundred thousand dollars (\$500,000). The form of the bond shall be that furnished by the Department, and the surety shall be acceptable to the Department.

TRAFFIC CONTROL PLAN

Effective: September 30, 1985

Revised: January 1, 2007

Traffic Control shall be according to the applicable sections of the Standard Specifications, the Supplemental Specifications, the "Illinois Manual on Uniform Traffic Control Devices for Streets and Highways", any special details and Highway Standards contained in the plans, and the Special Provisions contained herein.

Special attention is called to Article 107.09 of the Standard Specifications and the following Highway Standards, Details, Quality Standard for Work Zone Traffic Control Devices, Recurring Special Provisions and Special Provisions contained herein, relating to traffic control.

The Contractor shall contact the District One Bureau of Traffic at least 72 hours in advance of beginning work.

STANDARDS: 701001, 701006, 701011, 701301, 701311, 701400, 701401, 701411, 701426, 701427, 701428 and 701901.

DETAILS: Single Lane Weave and Multi Lane Weave (TC-09)
Traffic Control Details for Freeway Shoulder Closures and Partial Ramp Closures (TC-17)

SPECIAL PROVISIONS: Keeping Expressways Open to Traffic
Failure to Open Traffic Lanes to Traffic
Traffic Control and Protection (Expressways)
Keeping Arterials Open to Traffic (Lane Closures Only)
Speed Display Trailer (D-1)
Nighttime Work Zone Lighting (D-1)
Public Convenience and Safety (D-1)

PUBLIC CONVENIENCE AND SAFETY (DIST 1)

Effective: May 1, 2012

Revised: July 15, 2012

Add the following to the end of the fourth paragraph of Article 107.09:

"If the holiday is on a Saturday or Sunday, and is legally observed on a Friday or Monday, the length of Holiday Period for Monday or Friday shall apply."

Add the following sentence after the Holiday Period table in the fourth paragraph of Article 107.09:

"The Length of Holiday Period for Thanksgiving shall be from 5:00 AM the Wednesday prior to 11:59 PM the Sunday After"

Delete the fifth paragraph of Article 107.09 of the Standard Specifications:

"On weekends, excluding holidays, roadways with Average Daily Traffic of 25,000 or greater, all lanes shall be open to traffic from 3:00 P.M. Friday to midnight Sunday except where structure construction or major rehabilitation makes it impractical."

NIGHTTIME WORK ZONE LIGHTING (DISTRICT ONE)

Effective: November 1, 2008

Revised: June 15, 2010

Description. This work shall consist of furnishing, installing, maintaining, moving, and removing lighting for nighttime work zones. Nighttime shall be defined as occurring shortly before sunset until after sunrise.

Materials. The lighting shall consist of mobile and/or stationary lighting systems as required herein for the specific type of construction. Mobile lighting systems shall consist of luminaires attached to construction equipment or moveable carts. Stationary lighting systems shall consist of roadway luminaires mounted on temporary poles or trailer mounted light towers at fixed locations. Some lighting systems, such as balloon lights, may be adapted to both mobile and stationary applications.

Equipment. The Contractor shall furnish an illuminance meter for use by the Engineer. The meter shall have a digital display calibrated to NIST standards, shall be cosine and color corrected, and shall have an accuracy of \pm five percent. The sensor shall have a level indicator to ensure measurements are taken in a horizontal plane.

CONSTRUCTION REQUIREMENTS

General. At the preconstruction conference, the Contractor shall submit the type(s) of lighting system to be used and the locations of all devices.

Before nighttime construction may begin, the lighting system shall be demonstrated as being operational.

Nighttime Flagging. The requirements for nighttime flagging shall be according to Article 701.13 of the Standard Specifications and the glare control requirements contained herein.

Lighting System Design. The lighting system shall be designed to meet the following.

- (a) **Lighting Levels.** The lighting system shall provide a minimum of 5 foot candles (54 lux) throughout the work area. For mobile operations, the work area shall be defined as 25 ft (9 m) in front of and behind moving equipment. For stationary operations, the work area shall be defined as the entire area where work is being performed.

Lighting levels will be measured with an illuminance meter. Readings will be taken in a horizontal plane 3 ft (1 m) above the pavement or ground surface.

- (b) **Glare Control.** The lighting system shall be designed and operated so as to avoid glare that interferes with traffic, workers, or inspection personnel. Lighting systems with flood, spot, or stadium type luminaires shall be aimed downward at the work and rotated outward no greater than 30 degrees from nadir (straight down). Balloon lights shall be positioned at least 12 ft (3.6 m) above the roadway.

As a large component of glare, the headlights of construction vehicles and equipment shall not be operated within the work zone except as allowed for specific construction operations. Headlights shall never be used when facing oncoming traffic.

- (c) **Light Trespass.** The lighting system shall be designed to effectively light the work area without spilling over to adjoining property. When, in the opinion of the Engineer, the lighting is disturbing adjoining property, the Contractor shall modify the lighting arrangement or add hardware to shield the light trespass.

Construction Operations. The lighting design required above shall be provided at any location where construction equipment is operating or workers are present on foot. When multiple operations are being carried on simultaneously, lighting shall be provided at each separate work area.

The lighting requirements for specific construction operations shall be as follows.

- (a) **Installation or Removal of Work Zone Traffic Control.** The required lighting level shall be provided at each truck and piece of equipment used during the installation or removal of work zone traffic control. Headlights may be operated in the work zone.
- (b) **Guardrail, Fence and High Tension Cable Barrier Median Repair.** The required lighting level shall be provided by mounting a minimum of one balloon light to each piece of mobile construction equipment used in the work zone. This would include all machines but not include trucks used to transport materials and personnel or other vehicles that are continuously moving in and out of the work zone. The headlights of construction equipment shall not be operated within the work zone.

- (c) Pavement Marking and Raised Reflective Pavement Marker Removal/Installation. The striping truck and the attenuator/arrow board trucks may be operated by headlights alone; however, additional lighting may be necessary for the operator of the striping truck to perform the work.

For raised reflective pavement marker removal and installation and other pavement marking operations where workers are on foot, the required lighting level shall be provided at each truck and piece of equipment.

- (d) Sweeping. The required lighting level shall be mounted on the sweeping train vehicles during the sweeping operations. Headlights may be operated in the work zone.

- (e) Layout, Testing, and Inspection. The required lighting level shall be provided for each active area of construction layout, material testing, and inspection. The work area shall be defined as 15 ft (7.6 m) in front and back of the individual(s) performing the tasks.

Nighttime Work Zone Lighting will not be paid for as a separate item, but the cost shall be considered as included in the contract unit prices for the construction items involved, and no additional compensation will be allowed.

KEEPING THE EXPRESSWAYS OPEN TO TRAFFIC

1. GENERAL

The Contractor shall not park any equipment or vehicles unnecessarily on the shoulder. Whenever work is in progress adjacent to the traveled way, the Contractor shall provide necessary traffic control signs to warn the public and protect the work site as required herein or as provided in the Standards. The Contractor shall remove all equipment from the shoulder and median after working hours every day of the week. Also, the contractor's personnel shall be prohibited from crossing the roadway and all pedestrian movements on the Freeway will be limited to barricaded areas.

The Contractor shall request and gain approval from the Illinois Department of Transportation's Expressway Traffic Operations Engineer (847-705-4151 or 4155) twenty-four (24) hours in advance of all daily lane, ramp and shoulder closures and seventy-two (72) hours in advance of all permanent closures on all Freeways and/or Expressways in District One.

All lane and shoulder closures shall be immediately removed during all adverse weather conditions **without exception**, including but not limited to Rain, Wet road surface (spray from tires), Mist, Drizzle, Sleet, Snow, Fog and any other circumstance determined unsafe by the Engineer. **The contractor shall implement this contract requirement immediately without waiting for department instructions.**

Because sweeping operations need water to work effectively, sweeping will **NOT** be allowed when temperatures or wind chill factors are forecasted by the departments certified consulting meteorologists to be and or drop below freezing. **TEMPERATURE MUST BE ABOVE THIRTY TWO (32) DEGREES FARENHEIT.** All shoulders and curb lines must be free of any existing snow and or ice. Dry sweeping shall be allowed only if it is considered an emergency, immediate hazard, or any work as designated by the Department that requires first priority corrective action.

Additional lane and shoulder closure hour restrictions may have to be imposed to facilitate the flow of traffic to and from major sporting events and/or other events. Major construction projects may also require additional restrictions on some expressways.

All lane closure signs shall not be erected any earlier than one-half (1/2) hour before the starting hours listed below. Also, these signs should be taken down within one-half (1/2) hour after the closure is removed.

The Contractor will be required to cooperate with all other contractors when erecting lane closures on the expressway. All lane closures within one (1) mile of each other in one direction of the expressway shall be on the same side of the pavement and any lane closure within a half (1/2) mile of each other should be connected. The maximum length of any lane closure on the project and combined with any adjacent projects shall be five (5) miles. Gaps between successive permanent lane closures shall be no less than two (2) miles in length.

Private vehicles shall not be parked in the work zone. Contractor's equipment and/or vehicles shall not be parked on the shoulders or in the median during non-working hours. The parking of equipment and/or vehicles on State right-of-way will only be permitted at the locations approved by the Engineer.

NO work shall be allowed Day or Night on the following dates unless it is considered an emergency, immediate hazard or any work as designated by the Department that requires first priority corrective action:

<u>2018:</u> March 30 – April 2	Easter Holiday
May 24 – May 30	Memorial Day Holiday
July 1 – July 8	Independence Day Holiday
August 30 – September 5	Labor Day Holiday
November 21 – November 26	Thanksgiving Holiday
December 22 – January 1	Christmas/New Year's Holiday

2. EXPRESSWAY NIGHT CLEANING

One lane closures, shoulder closures and partial ramp closures shall only be permitted between 9:00 PM and 5:00 AM on the following expressways:

1. Kennedy (I-90/94 & I-190), Entire Limits Except Ramps
2. Eisenhower (I-290), Austin Blvd. to IL-83 Left Hand Side only.
3. Dan Ryan (I-90/94), Entire Limits Except Ramps and Right Hand Side (Express & Locals) From Cottage Grove Ave to 31st St.
4. Bishop Ford (I-94), Cottage Grove Ave. to 171st St. northbound and southbound left hand side only.*
5. I-57, Halsted St to Dan Ryan (I-94), northbound and southbound, left hand side only.

*One lane closures in 2 lane sections will be allowed between 11:00 PM and 5:00 AM

The Contractor is required to erect stationary left lane closures in order to sweep the following locations:

1. Kennedy (I-90/94), I-290 to East River Rd.
2. Eisenhower (I-290), Austin Blvd. to IL 83*
3. Bishop Ford (I-94), Cottage Grove Ave. to 171st St. northbound and southbound left hand side only
4. Dan Ryan (I-90/94), a.) I-290 to 31st St.;
b.) Express Lanes 31st St. to 67th St.
5. I-80, Wheeler to Briggs except ramps and right shoulder

*One lane closures in 2 lane sections will be allowed between 11:00 PM and 5:00 AM

The maximum length of all stationary left lane closures shall be 5 miles. Truck Mounted Attenuator Follow Vehicle Protection shall be provided for any personnel working inside the stationary left lane closure.

3. EXPRESSWAY DAY CLEANING

One lane closures, shoulder closures and partial ramp closures shall only be permitted between 9:00 AM and 1:00 PM for all outbound traffic and 10:00 AM and 2:00PM for all inbound traffic on Monday through Friday, and between 5:00 AM and 2:30 PM on Saturday and Sunday on the following expressways:

1. Edens (I-94 & US 41), Montrose Ave. to 700 Lineal feet north of IL 137
2. I-290 Extension/IL 53, IL 83 to Lake-Cook Rd.
3. Stevenson Entire Limits
4. I-55, Entire Limits
5. I-57, Entire Limits, except Halsted St. to Dan Ryan northbound and southbound left hand side only.
6. Bishop Ford (I-94 & IL 394), Entire Limits except northbound and southbound left hand side from Cottage Grove Ave. to 171st St.
7. Kingery (I-80/94), IL 394 to State Line
8. I-80, I-294 to Briggs; Wheeler to Will – Kendall County Line
9. Eisenhower (I-290), Wells to Austin in its entirety, Austin to IL-83 right hand side and all ramps, the collector-distributor system and ramps at the U.S 12/20/45 (Mannheim Rd.) interchange and westbound to Roosevelt road on its extension.
10. Dan Ryan (I-90/I-94), Cottage Grove Ave to 31st St. right hand side, Express & Locals, and all ramps except slip ramps between express & local lanes & any ramps too narrow to allow traffic to pass sweeping crew. At **No** time will the sweeping train be allowed to block any lane during the daytime.
11. Kennedy (I-90/I-94), All Ramps, unless ramps are too narrow to let traffic pass sweeping crew. At **No** time will the sweeping train be allowed to block any lane during the daytime.

FAILURE TO OPEN TRAFFIC LANES TO TRAFFIC

Effective: March 22, 1996 Revised: February 9, 2005

Should the Contractor fail to completely open and keep open all the traffic lanes to traffic in accordance with the limitations specified under the Special Provisions for "Keeping the Expressway Open to Traffic", the Contractor shall be liable to the Department for the amount of:

One lane or ramp blocked = \$ **2000/15 minutes**

Not as a penalty but as liquidated and ascertained damages for each and every 15 minute interval or a portion thereof that a lane is blocked outside the allowable time limitations. Such damages may be deducted by the Department from any monies due the Contractor. These damages shall apply during the contract time and during any extensions of the contract time.

TRAFFIC CONTROL AND PROTECTION (EXPRESSWAYS)

Description. This work shall include furnishing, installing, maintaining, replacing, relocating, and removing all traffic control devices used for the purpose of regulating, warning, or directing traffic. Traffic control and protection shall be provided as called for in the plans, applicable Highway Standards, District One Expressway details, Standards and Supplemental Specifications, these Special Provisions, or as directed by the Engineer.

General. The governing factor in the execution and staging of work for this project is to provide the motoring public with the safest possible travel conditions on the expressway through the construction zone. The Contractor shall arrange his operations to keep the closing of lanes and/or ramps to a minimum.

The Contractor shall be responsible for the proper location, installation, and arrangement of all traffic control devices. Special attention shall be given to existing warning signs and overhead guide signs during all construction operations. Warning signs and existing guide signs with down arrows shall be kept consistent with the barricade placement at all times. The Contractor shall immediately remove, completely cover, or turn from the motorist's view all signs which are inconsistent with lane assignment patterns.

The Contractor shall coordinate all traffic control work on this project with adjoining or overlapping projects, including barricade placement necessary to provide a uniform traffic detour pattern. When directed by the Engineer, the Contractor shall remove all traffic control devices that were furnished, installed, or maintained by him under this contract, and such devices shall remain the property of the Contractor. All traffic control devices shall remain in place until specific authorization for relocation or removal is received from the Engineer.

Additional requirements for traffic control devices shall be as follows.

- (a) Traffic Control Setup and Removal. The setting and removal of barricades for the taper portion of a lane closure shall be done under the protection of a vehicle with a truck/trailer mounted attenuator and arrow board per State Standard 701428 and the Traffic Control Setup and Removal Freeway/Expressway BDE Special Provision. Failure to meet this requirement will subject to a Traffic Control Deficiency. The deficiency will be calculated as outlined in Article 105.03 of the Standard Specifications. Truck/trailer mounted attenuators shall comply with Article 1106.02(g) or shall meet the requirements of NCHRP 350 Test Level 3 with vehicles used in accordance with manufacturer's recommendations and requirements.

(b) Sign Requirements

- (1) Sign Maintenance. Prior to the beginning of construction operations, the Contractor will be provided a sign log of all existing signs within the limits of the construction zone. The Contractor is responsible for verifying the accuracy of the sign log. Throughout the duration of this project, all existing traffic signs shall be maintained by the Contractor. All provisions of Article 107.25 of the Standard Specifications shall apply except the third paragraph shall be revised to read: "The Contractor shall maintain, furnish, and replace at his own expense, any traffic sign or post which has been damaged or lost by the Contractor or a third party.
- (2) Work Zone Speed Limit Signs. Work zone speed limit signs shall be installed as required in Article 701.14(b) and as shown in the plans and Highway Standards. Based upon the existing posted speed limit, work zone speed limits shall be established and signed as follows.
 - a. Existing Speed Limit of 55mph or higher. The initial work zone speed limit assembly, located approximately 4200' before the closure, and shall be 55mph as shown in 701400. Additional work zone 45mph assemblies shall be used as required according to Article 701.14(b) and as shown in the Highway Standards and plans. WORK ZONE SPEED LIMIT 55 PHOTO ENFORCED assemblies may be omitted when this assembly would normally be placed within 1500 feet of the END WORK ZONE SPEED LIMIT sign. If existing speed limit is over 65 mph then additional signage should be installed per 701400.
 - b. Existing Speed Limit of 45mph. The advance 55mph work zone speed limit assembly shown in 701400 shall be replaced with a 45mph assembly. Additional work zone 45mph assemblies shall be used as required according to Article 701.14(b) and as shown in the Highway Standards and plans. WORK ZONE SPEED LIMIT 55 PHOTO ENFORCED assemblies shall be eliminated in all cases. END WORK ZONE SPEED LIMIT signs are required.
- (3) Exit Signs. The exit gore signs as shown in Standard 701411 shall be a minimum size of 48 inch by 48 inch with 12 inch capital letters and a 20 inch arrow. EXIT OPEN AHEAD signs shown in Standard 701411 shall be a minimum size of 48 inch by 48 inch with 8 inch capital letters.
- (4) Uneven Lanes Signs. The Contractor shall furnish and erect "UNEVEN LANES" signs (W8-11) on both sides of the expressway, at any time when the elevation difference between adjacent lanes open to traffic equals or exceeds one inch. Signs shall be placed 500' in advance of the drop-off, within 500' of every entrance, and a minimum of every mile.

- (c) Drums/Barricades. Check barricades shall be placed in work areas perpendicular to traffic every 1000', one per lane and per shoulder, to prevent motorists from using work areas as a traveled way. Check barricades shall also be placed in advance of each open patch, or excavation, or any other hazard in the work area, the first at the edge of the open traffic lane and the second centered in the closed lane. Check barricades, either Type I or II, or drums shall be equipped with a flashing light.

To provide sufficient lane widths (10' minimum) for traffic and also working room, the Contractor shall furnish and install vertical barricades with steady burn lights, in lieu of Type II or drums, along the cold milling and asphalt paving operations. The vertical barricades shall be placed at the same spacing as the drums.

- (d) Vertical Barricades. Vertical barricades shall not be used in lane closure tapers, lane shifts, and exit ramp gores, or staged construction projects lasting more than 12 hours. Also, vertical barricades shall not be used as patch barricades or check barricades. Special attention shall be given, and ballast provided per manufacture's specification, to maintain the vertical barricades in an upright position and in proper alignment.
- (e) Temporary Concrete Barrier Wall. Prismatic barrier wall reflectors shall be installed on both the face of the wall next to traffic, and the top of sections of the temporary concrete barrier wall as shown in Standard 704001. The color of these reflectors shall match the color of the edgelines (yellow on the left and crystal or white on the right). If the base of the temporary concrete barrier wall is 12 inches or less from the travel lane, then the lower slope of the wall shall also have a 6 inch wide temporary pavement marking edgeline (yellow on the left and white on the right).
- (f) Full Expressway Closures. Full Expressway Closures will only be permitted for a maximum of 15 minutes during the allowable hours listed in the Keeping the Expressway Open to Traffic Special Provision. During Full Expressway Closures, the Contractor will be required to close off all lanes except one, using Freeway Standard Closures. The Contractor will be required to provide one changeable message sign to be placed at the direction of the Engineer. The sign shall display a message as directed by the Engineer. A Maintenance of Traffic Plan shall be submitted to the District One Expressway Traffic Control Supervisor 14 days in advance of the planned work; including all stage changes. The Maintenance of Traffic Plan shall include, but not be limited to: lane and ramp closures, existing geometrics, and equipment and material location. The District One Expressway Traffic Control Supervisor (847-705-4151) shall be contacted at least 3 working days in advance of the proposed road closure and will coordinate the closure operation with police forces.

Method of Measurement.

Traffic Control and Protection will not be measured for payment.

All work for furnishing, installing, maintaining, replacing, relocating, and removing traffic control devices required in the plans and these Special Provisions shall be included in the contract unit prices for the construction item involved. Traffic control and protection required under Standards 701101, 701400, 701401, 701402, 701406, 701411, 701416, 701426, 701428, 701446, 701901 and District details TC-8, TC-9, TC-17, TC-18 and TC-25 will be included with this item.

Basis of Payment.

- (a) Traffic Control and Protection will not be paid for as separate items, but the costs shall be considered as included in the contract unit prices for the construction items involved, and no additional compensation will be allowed.
- (b) Work or revisions in the phasing of construction or maintenance operations may require traffic control to be installed in accordance with a Standard other than those included in the plans. In such cases, the Standards will be made available to the Contractor at least one week in advance of the change in traffic control. Payment for traffic control required by these added Standards will be according to Article 109.04. Revisions or modifications to increase the traffic control protection shown in the contract shall be submitted by the Contractor for approval by the Engineer. A reduction of the traffic control shown in the contract will not be allowed.

EXPRESSWAY CLEANING

1. LOCATION: Full cleaning cycles shall be performed on the following expressways:

EISENHOWER EXPRESSWAY
EDENS EXPRESSWAY
DAN RYAN EXPRESSWAY
BISHOP FORD/KINGERY EXPRESSWAY
KENNEDY EXPRESSWAY
STEVENSON EXPRESSWAY
I 290 EXTENSION
I 55 EXPRESSWAY
I 57 EXPRESSWAY
I 80 EXPRESSWAY

The areas of work on each expressway are all parts of the expressway. Areas to be cleaned are those with hard surfaces and will include stabilized surfaces under guardrail, ramps, curbs, gutters, medians (striped, raised, corrugated, barrier), gores, stabilized shoulders, wheel guards, bridge decks, bridge medians, bridge sidewalks, walkways underneath bridges and traveled lanes as required. Rubbish shall be removed from all stabilized surface areas and under any guardrail.

Located in the plans are typical cross sections of the expressways showing, in general, the areas which are to be cleaned.

2. LIMITS OF CLEANING: The limits of each expressway to be cleaned with the Full Cleaning Cycle, of the expressway specified, shall include all entrance and exit ramps up to the crossroads and all accident investigation sites and are specified as follows:

Day Cleaning Only:

Bishop Ford/Kingery Expressway

Interstate 94 from Cottage Grove Avenue to the Indiana State line excluding northbound and southbound left hand side from Cottage Grove Avenue to 171st St., Illinois 394 from Interstate 94 to Goodenow Rd., the entire Stony Island Avenue - 103rd Street Interchange. Interstate 80 from Interstate 94 to Interstate 294 and all accident investigation sites.

Stevenson Expressway

Interstate 55 (Stevenson Expressway) from Lake Shore Dr. to the Cook – DuPage County Line (County Line Rd.), including First Avenue, from 43rd Street to Archer Avenue, the ramps to and from Joliet Rd from Interstate 55 to Wolf Rd, the ramps from northbound Interstate 55 to northbound Interstate 294 Tollway and from southbound Interstate 294 Tollway to northbound Interstate 55 (Limits of cleaning on these ramps are from Interstate 55 to the first painted gore south of the bridge over Joliet Rd), and all accident investigation sites, excluding the entire Stevenson – Dan Ryan Interchange.

Eisenhower Expressway

Interstate 290 and its appurtenances from Wells St. to Austin Blvd. in its entirety, from Austin Blvd. to IL-83 right hand side and all ramps, the eastbound collector-distributor lane and ramps at the U.S. 12/20/45 (Mannheim Rd.) interchange and westbound to Roosevelt Rd. on its extension.

I-290 Extension

I-290 extension from Illinois 83 to Interstate 90 Jane Addams Tollway, Illinois 53 from Interstate 90 Jane Addams Tollway to Lake Cook Road including I-355 from I-290 to Army Trail Road.

I-55 Expressway

Interstate 55 from Cook - DuPage county line (County Line Rd.) to Will – Grundy county line (Reed Rd.) in its entirety, including all ramps and the entire I-55 - I-80 interchange, all accident investigation sites, Blodgett Rd. from Kelly Rd. to West Frontage Rd., Arsenal Rd. from the East Frontage Rd. to Elwood International Port Rd. (Baseline Rd.), and the West Frontage Rd. Connector from Arsenal Rd. to the southbound entrance ramp.

I-57 Expressway

Interstate 57 from Halsted Street to The Will-Kankakee County Line, in its entirety including the entire I-57 – I-80 Interchange and all accident investigation sites, and from Interstate 57 to Interstate 94 Day Ryan right hand side only.

I-80 Expressway

Interstate 80 from Interstate 294 Tri-State Tollway/Interstate I-294 to Briggs St. and from Wheeler Ave. to the Will – Kendall county line in its entirety, including the ramp from eastbound Interstate 80 to northbound Interstate 294 and from southbound Interstate 294 to westbound Interstate 80.

Kennedy Expressway

All Ramps on Interstate 90/94 from Ogden Ave to Interstate 90/94 Junction at Edens Expressway, Interstate 90 from Interstate 90/94 Junction at Edens Expressway to Interstate 90/190 Junction, and Interstate 190 from Interstate 90/190 Junction to the East Limits of O'Hare International Airport (Bessie Coleman Rd) unless ramps are too narrow to allow traffic to pass sweeping crew.

Dan Ryan Expressway

Interstate 94 from Cottage Grove Ave to 31st St right hand side of both local and express lanes and all ramps except slip ramps between local and express lanes and any ramps too narrow to allow traffic to pass sweeping crew.

Edens Expressway

Interstate 94 from Montrose to Dundee Road and US 41 from Dundee Road to 700 lineal feet north of Illinois 137, including two ramps at Clavey Road, two ramps at West Park Avenue, four ramps at Deerpath Road and the entire US 41/Deerfield Road interchange. Also included is Tower Road from Edens Expressway to Forestway Drive.

Night Cleaning Only:

Eisenhower Expressway

Interstate 290 from Austin Blvd. to IL-83 left hand side only.

Kennedy Expressway

Interstate 90/94 from Interstate 290 to Interstate 90/94 junction at Edens Expressway, Interstate 90 from Interstate 90/94 junction at Edens Expressway to Interstate 90/190, Interstate 190 from Interstate 90/190 junction to the east limits of O'Hare International Airport (Bessie Coleman Rd.), Interstate 90 from the Interstate 90/190 junction to the tollway turnaround, all ramps from the Jane Byrne Circle Interchange at the Eisenhower Expressway to Lake St, the Ohio Street Feeder from Orleans Street to Interstate 90/94, all accident investigation sites, and any ramps unable to be swept during the day, if applicable.

Dan Ryan Expressway

Interstate 94 from Interstate 290 to Cottage Grove Avenue, except the right hand side of local and express lanes and all ramps from Cottage Grove Ave to 31st St., including all ramps from the Jane Byrne Circle Interchange at the Eisenhower Expressway to 31st St, all slip ramps between local and express lanes, and also Interstate 57 from Interstate 94 to Halsted Street left hand side only, the Franklin Street connector from 22nd Street to Interstate 94, and all accident investigation sites.

Bishop Ford Expressway

Interstate 94 from Cottage Grove Ave. to 171st St. northbound and southbounds left hand side only.

I-80 Expressway

Interstate 80 from Briggs St. to Wheeler Ave. except ramps and right shoulder.

3. DEFINITIONS:

- A. Full Expressway Cleaning Cycle: Complete cleaning of all contract areas within the limits of all the expressways specified herein, including debris and rubbish which has accumulated over the winter season, shall be considered a Full Expressway Cleaning Cycle. Mechanical and/or hand sweeping will be required to remove debris from winter accumulation.

- 4. SCHEDULE OF CLEANING: The First Full Expressway Cleaning Cycle shall be completed before starting work on any subsequent Full Expressway Cleaning Cycles. Full Expressway Cleaning Cycles shall start in close conformity with the schedule of starting dates shown in the plans.

5. **SEQUENCE OF WORK:** The Contractor shall submit at the preconstruction meeting, a sequence of work (by expressway) for the First Full Expressway Cleaning Cycle. The sequence of work shall be approved by the Engineer prior to commencing operations. It is required that the First Full Expressway Cleaning Cycle be completed to the satisfaction of the Engineer before commencing any subsequent Full Expressway Cleaning Cycle. The Contractor may be required to alter the sequence of work at any time throughout the duration of the contract upon instruction from the Engineer.

6. **CLEANING CYCLE ADJUSTMENT BASIS:**

The total shoulder and curb miles for a complete Full Expressway Cleaning Cycle and is estimated to be approximately **1478.5** miles and is the basis to be used in computations when a cleaning cycle cannot be completed due to unforeseen highway operational reasons.

The total shoulder and curb miles for each individual Expressway Cleaning Cycle is estimated as follows:

- Eisenhower Expressway approximately **128.8** miles
- Edens Expressway approximately **135.6** miles
- Dan Ryan Expressway approximately **102.6** miles
- Bishop Ford/Kingery Expressway approximately **161.4** miles
- Kennedy Expressway approximately **120.8** miles
- Stevenson Expressway approximately **120.2** miles
- I-290 Extension approximately **129.4** miles
- I-55 Expressway approximately **240.4** miles
- I-57 Expressway approximately **179.4** miles
- I-80 Expressway approximately **159.9** miles

SPEED DISPLAY TRAILER (D1)

Effective: April 1, 2015

Revised: January 1, 2017

Revise the third paragraph of Article 701.11 of the Standard Specifications to read:

“When not being utilized to inform and direct traffic, sign trailers, speed display trailers, arrow boards, and portable changeable message boards shall be treated as nonoperating equipment.”

Add the following to Article 701.15 of the Standard Specifications:

“(m) Speed Display Trailer. A speed display trailer is used to enhance safety of the traveling public and workers in work zones by alerting drivers of their speed, thus deterring them from driving above the posted work zone speed limit.”

Whenever the speed display trailer is not in use, it shall be considered non-operating equipment and shall be stored according to Article 701.11.”

Add the following to Article 701.20 of the Standard Specifications:

- “(k) “Speed Display Trailer will NOT be paid for by separate pay item, but its costs shall be included in the contract unit price of the various traffic control pay items.

Add the following to Article 1106.02 of the Standard Specifications:

- “(o) Speed Display Trailer. The speed display trailer shall consist of a LED speed indicator display with self-contained, one-direction radar mounted on an orange see-through trailer. The height of the display and radar shall be such that it will function and be visible when located behind concrete barrier.

The speed measurement shall be by radar and provide a minimum detection distance of 1000 ft (300 m). The radar shall have an accuracy of ± 1 mile per hour.

The speed indicator display shall face approaching traffic and shall have a sign legend of “YOUR SPEED” immediately above or below the speed display. The digital speed display shall show two digits (00 to 99) in mph. The color of the changeable message legend shall be a yellow legend on a black background. The minimum height of the numerals shall be 18 in. (450 mm), and the nominal legibility distance shall be at least 750 ft (250 m).

The speed indicator display shall be equipped with a violation alert that flashes the displayed detected speed when the posted limit is exceeded. The speed indicator shall have a maximum speed cutoff. On roadway facilities with a normal posted speed limit greater than or equal to 45 mph, the detected speeds of vehicles traveling more than 25mph over the work zone speed limit shall not be displayed. On facilities with normal posted speed limit of less than 45 mph, the detected speeds of vehicles traveling more than 15 mph over the work zone speed limit shall not be displayed. On any roadway facility if detected speeds are less than 25 mph, speed shall not be displayed. The display shall include automatic dimming for nighttime operation.

The speed indicator measurement and display functions shall be equipped with the power supply capable of providing 24 hours of uninterrupted service.”

KEEPING THE ARTERIALS OPEN TO TRAFFIC

1. GENERAL

The Contractor shall not park any equipment or vehicles unnecessarily on the shoulder. Whenever work is in progress adjacent to the traveled way, the Contractor shall provide necessary traffic control signs to warn the public and protect the work site as required herein or as provided in the Standards. The Contractor shall remove all equipment from the shoulder and median after working hours every day of the week. Also, the contractor's personnel shall be prohibited from crossing the roadway and all pedestrian movements on the Freeway will be limited to barricaded areas.

The Contractor shall request and gain approval from the Illinois Department of Transportation's Arterial Traffic Operations Engineer (847-705-4170) twenty-four (24) hours in advance of all lane, ramp and shoulder closures and seventy-two (72) hours in advance of all permanent closures on all Arterials in District One.

All lane and shoulder closures shall be immediately removed during all adverse weather conditions **without exception**, including but not limited to Rain, Wet road surface (spray from tires), Mist, Drizzle, Sleet, Snow, Fog and any other circumstance determined unsafe by the Engineer. **The contractor shall implement this contract requirement immediately without waiting for department instructions.**

Because sweeping operations need water to work effectively, sweeping will **NOT** be allowed when temperatures or wind chill factors are forecasted by the departments certified consulting meteorologists to be and or drop below freezing. **TEMPERATURE MUST BE ABOVE THIRTY TWO (32) DEGREES FARENHEIT.** All shoulders and curb lines must be free of any existing snow and or ice. Dry sweeping shall be allowed only if it is considered an emergency, immediate hazard, or any work as designated by the Department that requires first priority corrective action.

Additional lane and shoulder closure hour restrictions may have to be imposed to facilitate the flow of traffic to and from major sporting events and/or other events. Major construction projects may also require additional restrictions on some expressways.

All lane closure signs shall not be erected any earlier than one-half (1/2) hour before the starting hours listed below. Also, these signs should be taken down within one-half (1/2) hour after the closure is removed.

Private vehicles shall not be parked in the work zone. Contractor's equipment and/or vehicles shall not be parked on the shoulders or in the median during non-working hours. The parking of equipment and/or vehicles on State right-of-way will only be permitted at the locations approved by the Engineer.

NO work will be allowed Day or Night on the following dates unless it is considered an emergency, immediate hazard or any work as designated by the Department that requires first priority corrective action:

<u>2018:</u> March 30 – April 2	Easter Holiday
May 24 – May 30	Memorial Day Holiday
July 1 – July 8	Independence Day Holiday
August 30 – September 5	Labor Day Holiday
November 21 – November 26	Thanksgiving Holiday
December 22 – January 1	Christmas/New Year's Holiday

2. ARTERIAL CLEANING

One lane closures and shoulder closures shall **NOT** be permitted between 6:00 AM to 9:00 AM and 4:00 PM to 6:00 PM on Arterial Highways, unless as otherwise approved by the Engineer.

ARTERIAL HIGHWAY CLEANING

1. **LOCATION AND LIMITS OF CLEANING:** The limits of each arterial to be cleaned with the Full Arterial Cleaning Cycles shall be the portions of the arterials as specified in these special provisions (Arterial Highways to be cleaned) and as indicated in the plans. Areas to be cleaned are those with hard surfaces, including stabilized surfaces under guardrail and (10) feet behind the guardrail or to the State right-of-way whichever is shorter, islands (including thermoplastic striped and painted), turn bays, ramps, roadway crossovers, medians regardless of surface type (striped, raised, corrugated, barrier, painted and turf), curbs, gutters, gores (including thermoplastic striped and painted), stabilized shoulders, aggregate shoulders regardless of width, wheel guards, bridge decks, bridge medians, bridge sidewalks, walkways underneath bridges and traveled lanes as required including all ramps, all intersections and all interchanges. Corrugated medians shall require hand laboring. Sidewalks that are on or underneath bridges are to be cleaned under the terms of this contract.

The Contractor's attention is called to the fact that the limits shown do not necessarily reflect continuous cleaning operations. Those portions with guardrail (under and for a width of 10 feet behind regardless of surface type), paved shoulders, aggregate shoulders (regardless of width), medians, islands, including painted and striped, or curb and gutter are to be cleaned as evidenced by the entire route limits. These are numbered by Team Section and are shown on the location maps in the plans.

2. DEFINITIONS:

- A. Full Arterial Cleaning Cycle: Complete cleaning of all contract areas within the limits of all the arterial highways specified herein, including debris and rubbish which has accumulated over the winter season, shall be considered a Full Arterial Cleaning Cycle. Mechanical and/or hand sweeping will be required to remove debris from winter accumulation.

3. SCHEDULE OF CLEANING: The First Full Arterial Cleaning Cycle shall be completed before starting work on any subsequent Full Arterial Cleaning Cycle. Full Arterial Cleaning Cycles shall start in close conformity with the schedule of starting dates shown in the plans.
4. SEQUENCE OF WORK: The Contractor shall submit at the preconstruction meeting, a sequence of work for the First Full Arterial Cleaning Cycle. The sequence of work shall be approved by the Engineer prior to commencing operations. It is required that the First Full Arterial Cleaning Cycle be completed to the satisfaction of the Engineer before commencing any subsequent Arterial Cleaning Cycle begins. The Contractor may be required to alter the sequence of work at any time throughout the duration of the contract upon instruction from the Engineer.
5. PARKING: It will be the Contractor's responsibility to ascertain ALL parking locations for each cleaning cycle. Parking is permitted along various routes at various times within certain municipalities. A listing of parking locations is included in the special provisions beginning on page number 46. Municipalities may add and or eliminate locations throughout the term of this contract. The contractor will be required to provide "No Parking" signs at least 24 hours in advance of sweeping work to prohibit parking as needed during each cleaning period. Temporary no parking signs shall be minimum size of 17" X 22" with lettering not less than one inch in height, setting forth the day or days and hours parking is prohibited. Temporary no parking signs shall be constructed from materials that will resist tearing and weather. Temporary no parking signs shall be placed at a height not less than five (5) feet from the existing ground height to the bottom of the sign and facing the direction of traffic. The temporary no parking signs shall be approved by the Engineer prior to use. The contractor shall solicit no parking enforcement assistance from the municipalities. *The contractor shall submit documentation to the Engineer verifying the solicitation of the no parking enforcement from the municipalities for each cleaning cycle.* The contractor shall remove the temporary "No Parking" signs promptly after completing sweeping operations. Furnishing, installing and removing temporary "No Parking" signs will not be paid for as separate items, but the costs shall be considered as included in the contract unit price for the cleaning cycle involved, and no additional compensation will be allowed.
6. METHOD OF MEASUREMENT: The Full Arterial Cleaning Cycle pay item shall be measured for payment in concrete curb miles. The length of concrete curb miles paid for shall include the cleaning of all location limits and areas of debris as described in LOCATION AND LIMITS OF CLEANING and no additional compensation will be allowed.
7. CLEANING CYCLE ADJUSTMENT BASIS: The total curb miles for a complete Full Arterial Cleaning Cycle is estimated to be approximately **2,925.4** concrete curb miles and is the basis to be used in computations when a cleaning cycle cannot be completed due to unforeseen highway operational reasons.

SUPPLEMENTAL SWEEPING

1. **LOCATION AND LIMITS OF CLEANING:** The intent of this work is to provide additional cleaning of the gutters of existing curb and gutter and stabilized surfaces during the term of this contract. The intent of this work is also to provide cleaning of the gutters and stabilized surfaces of additional curb and gutter and stabilized surfaces constructed during the term of this contract which is not specified for cleaning in these Special Provisions. Supplemental Sweeping shall not be limited to the various expressways and arterial routes within the limits of specified in these Special Provisions but shall include all expressways and arterial routes located within District One.

The work to be done under Supplemental Sweeping shall consist of the pickup, removal and satisfactory disposal of all sand, stones, debris, refuse, dead animal carcasses, grease, oil, and other rubbish, which has accumulated on the highways and right of ways do to unforeseen events that are not in sequence with the regularly scheduled cleaning categories of this contract.

2. **DEFINITION:**

Supplemental Sweeping is work that is required to correct a condition which is an immediate hazard to the public or any work as designated by the Department that requires first priority corrective action. The contractor shall be available on a 7 day a week, 24-hour –a- day basis to accomplish this work. The Contractor shall have sufficient resources at the location specified by the Engineer within two (2) hours of notification or within a time specified by the Engineer to accomplish the work. The location of work shall be as determined by the Engineer and may be required at any time.

The use of this item shall not in any way mitigate any liquidation damages associated with noncompliance to the First Full Expressway Cleaning Cycle or First Full Arterial Cleaning Cycle guarantee working days specified, or any other cleaning cycles.

3. **PARKING:**

Parking is permitted along various routes within certain municipalities. It will be the Contractor's responsibility to ascertain these locations and to provide no parking signs as may be required to prohibit parking during the cleaning period. Enforcement assistance shall be solicited from the municipalities by the Contractor. The temporary no parking signs shall be approved by the Engineer prior to use. The Contractor shall remove the temporary no parking signs promptly after completing sweeping operations. Furnishing, installing and removing temporary no parking signs will not be paid for as separate items, but the costs shall be considered as included in the contract unit price for the cleaning cycle involved, and no additional compensation will be allowed.

SIGN CLEANING

1. **LOCATION AND LIMITS OF CLEANING:** The intent of this work is to provide the cleaning of signs, on an as needed basis, as determined by the Engineer of various expressway and arterial routes during the full term of this contract January 1, 2016 to December 31, 2016. Sign cleaning shall not be limited to the expressway and arterial routes within the limits specified in these Special Provisions but shall include all expressways and arterial routes located in District One.
2. **DESCRIPTION OF WORK:** This work consists of the removal of all dirt, oil, grease, tar, stickers or any other foreign substance from the faces and backs of Expressway Partnership Recognition Signs, Guide, Regulatory and Warning Signs. Overhead, cantilever and signs with external illumination shall be omitted.
3. **SCOPE OF WORK:** The work involved consists of cleaning signs by high pressure detergent water or detergent water and brush method, all with environmentally safe detergent suitable to completely clean signs without any damage and to the satisfaction of the Engineer.

The Contractor is hereby notified and shall understand that signs damaged or destroyed by the Contractor's operations shall be replaced at the Contractor's expense.

Any trees, shrubs and seeded areas on or adjacent to the work should be protected from damage by the Contractor's operations in a manner satisfactory to the Engineer. The Contractor shall be responsible for the damage or destruction of property of any character resulting from neglect, misconduct, or omission in the execution or non-execution of work, or caused by defective work or the use of unsatisfactory materials. Such responsibilities shall not be released until the work has been completed and accepted according to the requirements of the Special Provisions.

Damage to any property, public or private, shall be repaired by the Contractor to a condition equivalent to its original conditions at no expense to the Department.

4. **METHOD OF MEASUREMENT:**
Signs to be cleaned vary in size and individual signs mounted in groups are considered separate signs.
5. **BASIS OF PAYMENT:**
All work associated with Sign Cleaning will be paid for at the contract unit price per each regardless of size or shape for SIGN CLEANING.

COMPENSABLE DELAY COSTS (BDE)

Effective: June 2, 2017

Revise Article 107.40(b) of the Standard Specifications to read:

“(b) Compensation. Compensation will not be allowed for delays, inconveniences, or damages sustained by the Contractor from conflicts with facilities not meeting the above definition; or if a conflict with a utility in an unanticipated location does not cause a shutdown of the work or a documentable reduction in the rate of progress exceeding the limits set herein. The provisions of Article 104.03 notwithstanding, compensation for delays caused by a utility in an unanticipated location will be paid according to the provisions of this Article governing minor and major delays or reduced rate of production which are defined as follows.

- (1) Minor Delay. A minor delay occurs when the work in conflict with the utility in an unanticipated location is completely stopped for more than two hours, but not to exceed two weeks.
- (2) Major Delay. A major delay occurs when the work in conflict with the utility in an unanticipated location is completely stopped for more than two weeks.
- (3) Reduced Rate of Production Delay. A reduced rate of production delay occurs when the rate of production on the work in conflict with the utility in an unanticipated location decreases by more than 25 percent and lasts longer than seven calendar days.”

Revise Article 107.40(c) of the Standard Specifications to read:

“(c) Payment. Payment for Minor, Major, and Reduced Rate of Production Delays will be made as follows.

- (1) Minor Delay. Labor idled which cannot be used on other work will be paid for according to Article 109.04(b)(1) and (2) for the time between start of the delay and the minimum remaining hours in the work shift required by the prevailing practice in the area.

Equipment idled which cannot be used on other work, and which is authorized to standby on the project site by the Engineer, will be paid for according to Article 109.04(b)(4).

- (2) Major Delay. Labor will be the same as for a minor delay.

Equipment will be the same as for a minor delay, except Contractor-owned equipment will be limited to two weeks plus the cost of move-out to either the Contractor's yard or another job and the cost to re-mobilize, whichever is less. Rental equipment may be paid for longer than two weeks provided the Contractor presents adequate support to the Department (including lease agreement) to show retaining equipment on the job is the most economical course to follow and in the public interest.

- (3) Reduced Rate of Production Delay. The Contractor will be compensated for the reduced productivity for labor and equipment time in excess of the 25 percent threshold for that portion of the delay in excess of seven calendar days. Determination of compensation will be in accordance with Article 104.02, except labor and material additives will not be permitted.

Payment for escalated material costs, escalated labor costs, extended project overhead, and extended traffic control will be determined according to Article 109.13."

Revise Article 108.04(b) of the Standard Specifications to read:

"(b) No working day will be charged under the following conditions.

- (1) When adverse weather prevents work on the controlling item.
- (2) When job conditions due to recent weather prevent work on the controlling item.
- (3) When conduct or lack of conduct by the Department or its consultants, representatives, officers, agents, or employees; delay by the Department in making the site available; or delay in furnishing any items required to be furnished to the Contractor by the Department prevents work on the controlling item.
- (4) When delays caused by utility or railroad adjustments prevent work on the controlling item.
- (5) When strikes, lock-outs, extraordinary delays in transportation, or inability to procure critical materials prevent work on the controlling item, as long as these delays are not due to any fault of the Contractor.
- (6) When any condition over which the Contractor has no control prevents work on the controlling item."

Revise Article 109.09(f) of the Standard Specifications to read:

“(f) Basis of Payment. After resolution of a claim in favor of the Contractor, any adjustment in time required for the work will be made according to Section 108. Any adjustment in the costs to be paid will be made for direct labor, direct materials, direct equipment, direct jobsite overhead, direct offsite overhead, and other direct costs allowed by the resolution. Adjustments in costs will not be made for interest charges, loss of anticipated profit, undocumented loss of efficiency, home office overhead and unabsorbed overhead other than as allowed by Article 109.13, lost opportunity, preparation of claim expenses and other consequential indirect costs regardless of method of calculation.

The above Basis of Payment is an essential element of the contract and the claim cost recovery of the Contractor shall be so limited.”

Add the following to Section 109 of the Standard Specifications.

“**109.13 Payment for Contract Delay.** Compensation for escalated material costs, escalated labor costs, extended project overhead, and extended traffic control will be allowed when such costs result from a delay meeting the criteria in the following table.

Contract Type	Cause of Delay	Length of Delay
Working Days	Article 108.04(b)(3) or Article 108.04(b)(4)	No working days have been charged for two consecutive weeks.
Completion Date	Article 108.08(b)(1) or Article 108.08(b)(7)	The Contractor has been granted a minimum two week extension of contract time, according to Article 108.08.

Payment for each of the various costs will be according to the following.

(a) Escalated Material and/or Labor Costs. When the delay causes work, which would have otherwise been completed, to be done after material and/or labor costs have increased, such increases will be paid. Payment for escalated material costs will be limited to the increased costs substantiated by documentation furnished by the Contractor. Payment for escalated labor costs will be limited to those items in Article 109.04(b)(1) and (2), except the 35 percent and 10 percent additives will not be permitted.

(b) Extended Project Overhead. For the duration of the delay, payment for extended project overhead will be paid as follows.

(1) Direct Jobsite and Offsite Overhead. Payment for documented direct jobsite overhead and documented direct offsite overhead, including onsite supervisory and administrative personnel, will be allowed according to the following table.

Original Contract Amount	Supervisory and Administrative Personnel
Up to \$5,000,000	One Project Superintendent
Over \$ 5,000,000 - up to \$25,000,000	One Project Manager, One Project Superintendent or Engineer, and One Clerk
Over \$25,000,000 - up to \$50,000,000	One Project Manager, One Project Superintendent, One Engineer, and One Clerk
Over \$50,000,000	One Project Manager, Two Project Superintendents, One Engineer, and One Clerk

(2) Home Office and Unabsorbed Overhead. Payment for home office and unabsorbed overhead will be calculated as 8 percent of the total delay cost.

(c) Extended Traffic Control. Traffic control required for an extended period of time due to the delay will be paid. For working day contracts the payment will be made according to Article 109.04. For completion date contracts, an adjustment will be determined as follows.

Extended Traffic Control occurs between April 1 and November 30:

$$\text{ETCP Adjustment (\$)} = \text{TE} \times (\% / 100 \times \text{CUP} / \text{OCT})$$

Extended Traffic Control occurs between December 1 and March 31:

$$\text{ETCP Adjustment (\$)} = \text{TE} \times 1.5 (\% / 100 \times \text{CUP} / \text{OCT})$$

Where: TE = Duration of approved time extension in calendar days.
% = Percent maintenance for the traffic control, % (see table below).
CUP = Contract unit price for the traffic control pay item in place during the delay.
OCT = Original contract time in calendar days.

Original Contract Amount	Percent Maintenance
Up to \$2,000,000	65%
\$2,000,000 to \$10,000,000	75%
\$10,000,000 to \$20,000,000	85%
Over \$20,000,000	90%

When an ETCP adjustment is paid under this provision, an adjusted unit price as provided for in Article 701.20(a) for increase or decrease in the value of work by more than ten percent will not be paid.

Upon payment for a contract delay under this provision, the Contractor shall assign subrogation rights to the Department for the Department's efforts of recovery from any other party for monies paid by the Department as a result of any claim under this provision. The Contractor shall fully cooperate with the Department in its efforts to recover from another party any money paid to the Contractor for delay damages under this provision."

CONSTRUCTION AIR QUALITY – DIESEL RETROFIT (BDE)

Effective: June 1, 2010

Revised: November 1, 2014

The reduction of emissions of particulate matter (PM) for off-road equipment shall be accomplished by installing retrofit emission control devices. The term "equipment" refers to diesel fuel powered devices rated at 50 hp and above, to be used on the jobsite in excess of seven calendar days over the course of the construction period on the jobsite (including rental equipment).

Contractor and subcontractor diesel powered off-road equipment assigned to the contract shall be retrofitted using the phased in approach shown below. Equipment that is of a model year older than the year given for that equipment's respective horsepower range shall be retrofitted:

Effective Dates	Horsepower Range	Model Year
June 1, 2010 ¹⁷	600-749	2002
	750 and up	2006
June 1, 2011 ²⁷	100-299	2003
	300-599	2001
	600-749	2002
	750 and up	2006
June 1, 2012 ²⁷	50-99	2004
	100-299	2003
	300-599	2001
	600-749	2002
	750 and up	2006

- 1/ Effective dates apply to Contractor diesel powered off-road equipment assigned to the contract.
- 2/ Effective dates apply to Contractor and subcontractor diesel powered off-road equipment assigned to the contract.

The retrofit emission control devices shall achieve a minimum PM emission reduction of 50 percent and shall be:

- a) Included on the U.S. Environmental Protection Agency (USEPA) *Verified Retrofit Technology List* (<http://www.epa.gov/cleandiesel/verification/verif-list.htm>), or verified by the California Air Resources Board (CARB) (<http://www.arb.ca.gov/diesel/verdev/vt/cvt.htm>); or
- b) Retrofitted with a non-verified diesel retrofit emission control device if verified retrofit emission control devices are not available for equipment proposed to be used on the project, and if the Contractor has obtained a performance certification from the retrofit device manufacturer that the emission control device provides a minimum PM emission reduction of 50 percent.

Note: Large cranes (Crawler mounted cranes) which are responsible for critical lift operations are exempt from installing retrofit emission control devices if such devices adversely affect equipment operation.

Diesel powered off-road equipment with engine ratings of 50 hp and above, which are unable to be retrofitted with verified emission control devices or if performance certifications are not available which will achieve a minimum 50 percent PM reduction, may be granted a waiver by the Department if documentation is provided showing good faith efforts were made by the Contractor to retrofit the equipment.

Construction shall not proceed until the Contractor submits a certified list of the diesel powered off-road equipment that will be used, and as necessary, retrofitted with emission control devices. The list(s) shall include (1) the equipment number, type, make, Contractor/rental company name; and (2) the emission control devices make, model, USEPA or CARB verification number, or performance certification from the retrofit device manufacturer. Equipment reported as fitted with emissions control devices shall be made available to the Engineer for visual inspection of the device installation, prior to being used on the jobsite.

The Contractor shall submit an updated list of retrofitted off-road construction equipment as retrofitted equipment changes or comes on to the jobsite. The addition or deletion of any diesel powered equipment shall be included on the updated list.

If any diesel powered off-road equipment is found to be in non-compliance with any portion of this special provision, the Engineer will issue the Contractor a diesel retrofit deficiency deduction.

Any costs associated with retrofitting any diesel powered off-road equipment with emission control devices shall be considered as included in the contract unit prices bid for the various items of work involved and no additional compensation will be allowed. The Contractor's compliance with this notice and any associated regulations shall not be grounds for a claim.

Diesel Retrofit Deficiency Deduction

When the Engineer determines that a diesel retrofit deficiency exists, a daily monetary deduction will be imposed for each calendar day or fraction thereof the deficiency continues to exist. The calendar day(s) will begin when the time period for correction is exceeded and end with the Engineer's written acceptance of the correction. The daily monetary deduction will be \$1,000.00 for each deficiency identified.

The deficiency will be based on lack of diesel retrofit emissions control.

If a Contractor accumulates three diesel retrofit deficiency deductions for the same piece of equipment in a contract period, the Contractor will be shutdown until the deficiency is corrected. Such a shutdown will not be grounds for any extension of the contract time, waiver of penalties, or be grounds for any claim.

DISADVANTAGED BUSINESS ENTERPRISE PARTICIPATION (BDE)

Effective: September 1, 2000

Revised: July 2, 2016

FEDERAL OBLIGATION. The Department of Transportation, as a recipient of federal financial assistance, is required to take all necessary and reasonable steps to ensure nondiscrimination in the award and administration of contracts. Consequently, the federal regulatory provisions of 49 CFR Part 26 apply to this contract concerning the utilization of disadvantaged business enterprises. For the purposes of this Special Provision, a disadvantaged business enterprise (DBE) means a business certified by the Department in accordance with the requirements of 49 CFR Part 26 and listed in the Illinois Unified Certification Program (IL UCP) DBE Directory.

STATE OBLIGATION. This Special Provision will also be used by the Department to satisfy the requirements of the Business Enterprise for Minorities, Females, and Persons with Disabilities Act, 30 ILCS 575. When this Special Provision is used to satisfy state law requirements on 100 percent state-funded contracts, the federal government has no involvement in such contracts (not a federal-aid contract) and no responsibility to oversee the implementation of this Special Provision by the Department on those contracts. DBE participation on 100 percent state-funded contracts will not be credited toward fulfilling the Department's annual overall DBE goal required by the US Department of Transportation to comply with the federal DBE program requirements.

CONTRACTOR ASSURANCE. The Contractor makes the following assurance and agrees to include the assurance in each subcontract that the Contractor signs with a subcontractor.

The Contractor, subrecipient, or subcontractor shall not discriminate on the basis of race, color, national origin, or sex in the performance of this contract. The Contractor shall carry out applicable requirements of 49 CFR Part 26 in the award and administration of contracts funded in whole or in part with federal or state funds. Failure by the Contractor to carry out these requirements is a material breach of this contract, which may result in the termination of this contract or such other remedy as the recipient deems appropriate, which may include, but is not limited to:

- (a) Withholding progress payments;
- (b) Assessing sanctions;
- (c) Liquidated damages; and/or
- (d) Disqualifying the Contractor from future bidding as non-responsible.

OVERALL GOAL SET FOR THE DEPARTMENT. As a requirement of compliance with 49 CFR Part 26, the Department has set an overall goal for DBE participation in its federally assisted contracts. That goal applies to all federal-aid funds the Department will expend in its federally assisted contracts for the subject reporting fiscal year. The Department is required to make a good faith effort to achieve the overall goal. The dollar amount paid to all approved DBE companies performing work called for in this contract is eligible to be credited toward fulfillment of the Department's overall goal.

CONTRACT GOAL TO BE ACHIEVED BY THE CONTRACTOR. This contract includes a specific DBE utilization goal established by the Department. The goal has been included because the Department has determined that the work of this contract has subcontracting opportunities that may be suitable for performance by DBE companies. The determination is based on an assessment of the type of work, the location of the work, and the availability of DBE companies to do a part of the work. The assessment indicates that, in the absence of unlawful discrimination, and in an arena of fair and open competition, DBE companies can be expected to perform **0.00%** of the work. This percentage is set as the DBE participation goal for this contract. Consequently, in addition to the other award criteria established for this contract, the Department will only award this contract to a bidder who makes a good faith effort to meet this goal of DBE participation in the performance of the work. A bidder makes a good faith effort for award consideration if either of the following is done in accordance with the procedures set for in this Special Provision:

- (a) The bidder documents that enough DBE participation has been obtained to meet the goal or,
- (b) The bidder documents that a good faith effort has been made to meet the goal, even though the effort did not succeed in obtaining enough DBE participation to meet the goal.

DBE LOCATOR REFERENCES. Bidders shall consult the IL UCP DBE Directory as a reference source for DBE-certified companies. In addition, the Department maintains a letting and item specific DBE locator information system whereby DBE companies can register their interest in providing quotes on particular bid items advertised for letting. Information concerning DBE companies willing to quote work for particular contracts may be obtained by contacting the Department's Bureau of Small Business Enterprises at telephone number (217) 785-4611, or by visiting the Department's website at: <http://www.idot.illinois.gov/doing-business/certifications/disadvantaged-business-enterprise-certification/il-ucp-directory/index>.

BIDDING PROCEDURES. Compliance with this Special Provision is required prior to the award of the contract and the failure of the low bidder to comply will render the bid not responsive.

In order to assure the timely award of the contract, the low bidder shall submit:

- (a) The bidder shall submit a DBE Utilization Plan on completed Department forms SBE 2025 and 2026.
 - (1) The final Utilization Plan must be submitted within five calendar days after the date of the letting in accordance with subsection (a)(2) of Bidding Procedures herein.
 - (2) To meet the five day requirement, the bidder may send the Utilization Plan electronically by scanning and sending to **DOT.DBE.UP@illinois.gov** or faxing to (217) 785-1524. The subject line must include the bid Item Number and the Letting date. The Utilization Plan should be sent as one .pdf file, rather than multiple files and emails for the same Item Number. It is the responsibility of the bidder to obtain confirmation of email or fax delivery.

Alternatively, the Utilization Plan may be sent by certified mail or delivery service within the five calendar day period. If a question arises concerning the mailing date of a Utilization Plan, the mailing date will be established by the U.S. Postal Service postmark on the certified mail receipt from the U.S. Postal Service or the receipt issued by a delivery service when the Utilization Plan is received by the Department. It is the responsibility of the bidder to ensure the postmark or receipt date is affixed within the five days if the bidder intends to rely upon mailing or delivery to satisfy the submission day requirement. The Utilization Plan is to be submitted to:

Illinois Department of Transportation
Bureau of Small Business Enterprises
Contract Compliance Section
2300 South Dirksen Parkway, Room 319
Springfield, Illinois 62764

The Department will not accept a Utilization Plan if it does not meet the five day submittal requirement and the bid will be declared not responsive. In the event the bid is declared not responsive due to a failure to submit a Utilization Plan or failure to comply with the bidding procedures set forth herein, the Department may elect to cause the forfeiture of the penal sum of the bidder's proposal guaranty, and may deny authorization to bid the project if re-advertised for bids. The Department reserves the right to invite any other bidder to submit a Utilization Plan at any time for award consideration.

- (b) The Utilization Plan shall indicate that the bidder either has obtained sufficient DBE participation commitments to meet the contract goal or has not obtained enough DBE participation commitments in spite of a good faith effort to meet the goal. The Utilization Plan shall further provide the name, telephone number, and telefax number of a responsible official of the bidder designated for purposes of notification of Utilization Plan approval or disapproval under the procedures of this Special Provision.
- (c) The Utilization Plan shall include a DBE Participation Commitment Statement, Department form SBE 2025, for each DBE proposed for the performance of work to achieve the contract goal. For bidding purposes, submission of the completed SBE 2025 forms, signed by the DBEs and scanned or faxed to the bidder will be acceptable as long as the original is available and provided upon request. All elements of information indicated on the said form shall be provided, including but not limited to the following:
 - (1) The names and addresses of DBE firms that will participate in the contract;
 - (2) A description, including pay item numbers, of the work each DBE will perform;
 - (3) The dollar amount of the participation of each DBE firm participating. The dollar amount of participation for identified work shall specifically state the quantity, unit price, and total subcontract price for the work to be completed by the DBE. If partial pay items are to be performed by the DBE, indicate the portion of each item, a unit price where appropriate and the subcontract price amount;
 - (4) DBE Participation Commitment Statements, form SBE 2025, signed by the bidder and each participating DBE firm documenting the commitment to use the DBE subcontractors whose participation is submitted to meet the contract goal;
 - (5) If the bidder is a joint venture comprised of DBE companies and non-DBE companies, the Utilization Plan must also include a clear identification of the portion of the work to be performed by the DBE partner(s); and,
 - (6) If the contract goal is not met, evidence of good faith efforts; the documentation of good faith efforts must include copies of each DBE and non-DBE subcontractor quote submitted to the bidder when a non-DBE subcontractor is selected over a DBE for work on the contract.

GOOD FAITH EFFORT PROCEDURES. The contract will not be awarded until the Utilization Plan submitted by the apparent successful bidder is approved. All information submitted by the bidder must be complete, accurate and adequately document that enough DBE participation has been obtained or document that good faith efforts of the bidder, in the event enough DBE participation has not been obtained, before the Department will commit to the performance of the contract by the bidder. The Utilization Plan will be approved by the Department if the Utilization Plan documents sufficient commercially useful DBE work to meet the contract goal or the bidder submits sufficient documentation of a good faith effort to meet the contract goal pursuant to 49 CFR Part 26, Appendix A. The Utilization Plan will not be approved by the Department if the Utilization Plan does not document sufficient DBE participation to meet the contract goal unless the apparent successful bidder documented in the Utilization Plan that it made a good faith effort to meet the goal. This means that the bidder must show that all necessary and reasonable steps were taken to achieve the contract goal. Necessary and reasonable steps are those which, by their scope, intensity and appropriateness to the objective, could reasonably be expected to obtain sufficient DBE participation, even if they were not successful. The Department will consider the quality, quantity, and intensity of the kinds of efforts that the bidder has made. Mere *pro forma* efforts, in other words, efforts done as a matter of form, are not good faith efforts; rather, the bidder is expected to have taken genuine efforts that would be reasonably expected of a bidder actively and aggressively trying to obtain DBE participation sufficient to meet the contract goal.

- (a) The following is a list of types of action that the Department will consider as part of the evaluation of the bidder's good faith efforts to obtain participation. These listed factors are not intended to be a mandatory checklist and are not intended to be exhaustive. Other factors or efforts brought to the attention of the Department may be relevant in appropriate cases, and will be considered by the Department.
- (1) Soliciting through all reasonable and available means (e.g. attendance at pre-bid meetings, advertising and/or written notices) the interest of all certified DBE companies that have the capability to perform the work of the contract. The bidder must solicit this interest within sufficient time to allow the DBE companies to respond to the solicitation. The bidder must determine with certainty if the DBE companies are interested by taking appropriate steps to follow up initial solicitations.
 - (2) Selecting portions of the work to be performed by DBE companies in order to increase the likelihood that the DBE goals will be achieved. This includes, where appropriate, breaking out contract work items into economically feasible units to facilitate DBE participation, even when the prime Contractor might otherwise prefer to perform these work items with its own forces.
 - (3) Providing interested DBE companies with adequate information about the plans, specifications, and requirements of the contract in a timely manner to assist them in responding to a solicitation.

- (4) a. Negotiating in good faith with interested DBE companies. It is the bidder's responsibility to make a portion of the work available to DBE subcontractors and suppliers and to select those portions of the work or material needs consistent with the available DBE subcontractors and suppliers, so as to facilitate DBE participation. Evidence of such negotiation includes the names, addresses, and telephone numbers of DBE companies that were considered; a description of the information provided regarding the plans and specifications for the work selected for subcontracting; and evidence as to why additional agreements could not be reached for DBE companies to perform the work.
 - b. A bidder using good business judgment would consider a number of factors in negotiating with subcontractors, including DBE subcontractors, and would take a firm's price and capabilities as well as contract goals into consideration. However, the fact that there may be some additional costs involved in finding and using DBE companies is not in itself sufficient reason for a bidder's failure to meet the contract DBE goal, as long as such costs are reasonable. Also the ability or desire of a bidder to perform the work of a contract with its own organization does not relieve the bidder of the responsibility to make good faith efforts. Bidders are not, however, required to accept higher quotes from DBE companies if the price difference is excessive or unreasonable. In accordance with subsection (c)(6) of the above Bidding Procedures, the documentation of good faith efforts must include copies of each DBE and non-DBE subcontractor quote submitted to the bidder when a non-DBE subcontractor was selected over a DBE for work on the contract.
- (5) Not rejecting DBE companies as being unqualified without sound reasons based on a thorough investigation of their capabilities. The bidder's standing within its industry, membership in specific groups, organizations, or associations and political or social affiliations (for example union vs. non-union employee status) are not legitimate causes for the rejection or non-solicitation of bids in the bidder's efforts to meet the project goal.
- (6) Making efforts to assist interested DBE companies in obtaining bonding, lines of credit, or insurance as required by the recipient or Contractor.
- (7) Making efforts to assist interested DBE companies in obtaining necessary equipment, supplies, materials, or related assistance or services.
- (8) Effectively using the services of available minority/women community organizations; minority/women contractors' groups; local, state, and federal minority/women business assistance offices; and other organizations as allowed on a case-by-case basis to provide assistance in the recruitment and placement of DBE companies.

- (b) If the Department determines that the apparent successful bidder has made a good faith effort to secure the work commitment of DBE companies to meet the contract goal, the Department will award the contract provided that it is otherwise eligible for award. If the Department determines that the bidder has failed to meet the requirements of this Special Provision or that a good faith effort has not been made, the Department will notify the responsible company official designated in the Utilization Plan that the bid is not responsive. The notification shall include a statement of reasons for the determination. If the Utilization Plan is not approved because it is deficient as a technical matter, unless waived by the Department, the bidder will be notified and will be allowed no more than a five calendar day period in order to cure the deficiency.
- (c) The bidder may request administrative reconsideration of a determination adverse to the bidder within the five working days after the receipt of the notification date of the determination by delivering the request to the Department of Transportation, Bureau of Small Business Enterprises, Contract Compliance Section, 2300 South Dirksen Parkway, Room 319, Springfield, Illinois 62764 (Telefax: (217) 785-1524). Deposit of the request in the United States mail on or before the fifth business day shall not be deemed delivery. The determination shall become final if a request is not made and delivered. A request may provide additional written documentation or argument concerning the issues raised in the determination statement of reasons, provided the documentation and arguments address efforts made prior to submitting the bid. The request will be forwarded to the Department's Reconsideration Officer. The Reconsideration Officer will extend an opportunity to the bidder to meet in person in order to consider all issues of documentation and whether the bidder made a good faith effort to meet the goal. After the review by the Reconsideration Officer, the bidder will be sent a written decision within ten working days after receipt of the request for consideration, explaining the basis for finding that the bidder did or did not meet the goal or make adequate good faith efforts to do so. A final decision by the Reconsideration Officer that a good faith effort was made shall approve the Utilization Plan submitted by the bidder and shall clear the contract for award. A final decision that a good faith effort was not made shall render the bid not responsive.

CALCULATING DBE PARTICIPATION. The Utilization Plan values represent work anticipated to be performed and paid for upon satisfactory completion. The Department is only able to count toward the achievement of the overall goal and the contract goal the value of payments made for the work actually performed by DBE companies. In addition, a DBE must perform a commercially useful function on the contract to be counted. A commercially useful function is generally performed when the DBE is responsible for the work and is carrying out its responsibilities by actually performing, managing, and supervising the work involved. The Department and Contractor are governed by the provisions of 49 CFR Part 26.55(c) on questions of commercially useful functions as it affects the work. Specific counting guidelines are provided in 49 CFR Part 26.55, the provisions of which govern over the summary contained herein.

- (a) DBE as the Contractor: 100 percent goal credit for that portion of the work performed by the DBE's own forces, including the cost of materials and supplies. Work that a DBE subcontracts to a non-DBE does not count toward the DBE goals.

- (b) DBE as a joint venture Contractor: 100 percent goal credit for that portion of the total dollar value of the contract equal to the distinct, clearly defined portion of the work performed by the DBE's own forces.
- (c) DBE as a subcontractor: 100 percent goal credit for the work of the subcontract performed by the DBE's own forces, including the cost of materials and supplies, excluding the purchase of materials and supplies or the lease of equipment by the DBE subcontractor from the prime Contractor or its affiliates. Work that a DBE subcontractor in turn subcontracts to a non-DBE does not count toward the DBE goal.
- (d) DBE as a trucker: 100 percent goal credit for trucking participation provided the DBE is responsible for the management and supervision of the entire trucking operation for which it is responsible. At least one truck owned, operated, licensed, and insured by the DBE must be used on the contract. Credit will be given for the following:
 - (1) The DBE may lease trucks from another DBE firm, including an owner-operator who is certified as a DBE. The DBE who leases trucks from another DBE receives credit for the total value of the transportation services the lessee DBE provides on the contract.
 - (2) The DBE may also lease trucks from a non-DBE firm, including from an owner-operator. The DBE who leases trucks from a non-DBE is entitled to credit only for the fee or commission is receives as a result of the lease arrangement.
- (e) DBE as a material supplier:
 - (1) 60 percent goal credit for the cost of the materials or supplies purchased from a DBE regular dealer.
 - (2) 100 percent goal credit for the cost of materials of supplies obtained from a DBE manufacturer.
 - (3) 100 percent credit for the value of reasonable fees and commissions for the procurement of materials and supplies if not a DBE regular dealer or DBE manufacturer.

CONTRACT COMPLIANCE. Compliance with this Special Provision is an essential part of the contract. The Department is prohibited by federal regulations from crediting the participation of a DBE included in the Utilization Plan toward either the contract goal or the Department's overall goal until the amount to be applied toward the goals has been paid to the DBE. The following administrative procedures and remedies govern the compliance by the Contractor with the contractual obligations established by the Utilization Plan. After approval of the Utilization Plan and award of the contract, the Utilization Plan and individual DBE Participation Statements become part of the contract. If the Contractor did not succeed in obtaining enough DBE participation to achieve the advertised contract goal, and the Utilization Plan was approved and contract awarded based upon a determination of good faith, the total dollar value of DBE work calculated in the approved Utilization Plan as a percentage of the awarded contract value shall become the amended contract goal. All work indicated for performance by an approved DBE shall be performed, managed, and supervised by the DBE executing the DBE Participation Commitment Statement.

- (a) **NO AMENDMENT.** No amendment to the Utilization Plan may be made without prior written approval from the Department's Bureau of Small Business Enterprises. All requests for amendment to the Utilization Plan shall be submitted to the Department of Transportation, Bureau of Small Business Enterprises, Contract Compliance Section, 2300 South Dirksen Parkway, Room 319, Springfield, Illinois 62764. Telephone number (217) 785-4611. Telefax number (217) 785-1524.
- (b) **CHANGES TO WORK.** Any deviation from the DBE condition-of-award or contract plans, specifications, or special provisions must be approved, in writing, by the Department as provided elsewhere in the Contract. The Contractor shall notify affected DBEs in writing of any changes in the scope of work which result in a reduction in the dollar amount condition-of-award to the contract. Where the revision includes work committed to a new DBE subcontractor, not previously involved in the project, then a Request for Approval of Subcontractor, Department form BC 260A or AER 260A, must be signed and submitted. If the commitment of work is in the form of additional tasks assigned to an existing subcontract, then a new Request for Approval of Subcontractor shall not be required. However, the Contractor must document efforts to assure that the existing DBE subcontractor is capable of performing the additional work and has agreed in writing to the change.
- (c) **SUBCONTRACT.** The Contractor must provide DBE subcontracts to IDOT upon request. Subcontractors shall ensure that all lower tier subcontracts or agreements with DBEs to supply labor or materials be performed in accordance with this Special Provision.

- (d) ALTERNATIVE WORK METHODS. In addition to the above requirements for reductions in the condition of award, additional requirements apply to the two cases of Contractor-initiated work substitution proposals. Where the contract allows alternate work methods which serve to delete or create underruns in condition of award DBE work, and the Contractor selects that alternate method or, where the Contractor proposes a substitute work method or material that serves to diminish or delete work committed to a DBE and replace it with other work, then the Contractor must demonstrate one of the following:
- (1) That the replacement work will be performed by the same DBE (as long as the DBE is certified in the respective item of work) in a modification of the condition of award; or
 - (2) That the DBE is aware that its work will be deleted or will experience underruns and has agreed in writing to the change. If this occurs, the Contractor shall substitute other work of equivalent value to a certified DBE or provide documentation of good faith efforts to do so; or
 - (3) That the DBE is not capable of performing the replacement work or has declined to perform the work at a reasonable competitive price. If this occurs, the Contractor shall substitute other work of equivalent value to a certified DBE or provide documentation of good faith efforts to do so.
- (e) TERMINATION AND REPLACEMENT PROCEDURES. The Contractor shall not terminate or replace a DBE listed on the approved Utilization Plan, or perform with other forces work designated for a listed DBE except as provided in this Special Provision. The Contractor shall utilize the specific DBEs listed to perform the work and supply the materials for which each is listed unless the Contractor obtains the Department's written consent as provided in subsection (a) of this part. Unless Department consent is provided for termination of a DBE subcontractor, the Contractor shall not be entitled to any payment for work or material unless it is performed or supplied by the DBE in the Utilization Plan.

As stated above, the Contractor shall not terminate or replace a DBE subcontractor listed in the approved Utilization Plan without prior written consent. This includes, but is not limited to, instances in which the Contractor seeks to perform work originally designated for a DBE subcontractor with its own forces or those of an affiliate, a non-DBE firm, or with another DBE firm. Written consent will be granted only if the Bureau of Small Business Enterprises agrees, for reasons stated in its concurrence document, that the Contractor has good cause to terminate or replace the DBE firm. Before transmitting to the Bureau of Small Business Enterprises any request to terminate and/or substitute a DBE subcontractor, the Contractor shall give notice in writing to the DBE subcontractor, with a copy to the Bureau, of its intent to request to terminate and/or substitute, and the reason for the request. The Contractor shall give the DBE five days to respond to the Contractor's notice. The DBE so notified shall advise the Bureau and the Contractor of the reasons, if any, why it objects to the proposed termination of its subcontract and why the Bureau should not approve the Contractor's action. If required in a particular case as a matter of public necessity, the Bureau may provide a response period shorter than five days.

For purposes of this paragraph, good cause includes the following circumstances:

- (1) The listed DBE subcontractor fails or refuses to execute a written contract;
- (2) The listed DBE subcontractor fails or refuses to perform the work of its subcontract in a way consistent with normal industry standards. Provided, however, that good cause does not exist if the failure or refusal of the DBE subcontractor to perform its work on the subcontract results from the bad faith or discriminatory action of the prime contractor;
- (3) The listed DBE subcontractor fails or refuses to meet the prime Contractor's reasonable, nondiscriminatory bond requirements;
- (4) The listed DBE subcontractor becomes bankrupt, insolvent, or exhibits credit unworthiness;
- (5) The listed DBE subcontractor is ineligible to work on public works projects because of suspension and debarment proceedings pursuant 2 CFR Parts 180, 215 and 1200 or applicable state law.
- (6) You have determined that the listed DBE subcontractor is not a responsible contractor;
- (7) The listed DBE subcontractor voluntarily withdraws from the projects and provides to you written notice of its withdrawal;
- (8) The listed DBE is ineligible to receive DBE credit for the type of work required;
- (9) A DBE owner dies or becomes disabled with the result that the listed DBE subcontractor is unable to complete its work on the contract;
- (10) Other documented good cause that compels the termination of the DBE subcontractor. Provided, that good cause does not exist if the prime Contractor seeks to terminate a DBE it relied upon to obtain the contract so that the prime Contractor can self-perform the work for which the DBE contractor was engaged or so that the prime Contractor can substitute another DBE or non-DBE contractor after contract award.

When a DBE is terminated, or fails to complete its work on the Contract for any reason the Contractor shall make a good faith effort to find another DBE to substitute for the original DBE to perform at least the same amount of work under the contract as the terminated DBE to the extent needed to meet the established Contract goal. The good faith efforts shall be documented by the Contractor. If the Department requests documentation under this provision, the Contractor shall submit the documentation within seven days, which may be extended for an additional seven days if necessary at the request of the Contractor. The Department shall provide a written determination to the Contractor stating whether or not good faith efforts have been demonstrated.

- (f) PAYMENT RECORDS. The Contractor shall maintain a record of payments for work performed to the DBE participants. The records shall be made available to the Department for inspection upon request. After the performance of the final item of work or delivery of material by a DBE and final payment therefore to the DBE by the Contractor, but not later than thirty calendar days after payment has been made by the Department to the Contractor for such work or material, the Contractor shall submit a DBE Payment Agreement on Department form SBE 2115 to the Resident Engineer. If full and final payment has not been made to the DBE, the DBE Payment Agreement shall indicate whether a disagreement as to the payment required exists between the Contractor and the DBE or if the Contractor believes that the work has not been satisfactorily completed. If the Contractor does not have the full amount of work indicated in the Utilization Plan performed by the DBE companies indicated in the Utilization Plan and after good faith efforts are reviewed, the Department may deduct from contract payments to the Contractor the amount of the goal not achieved as liquidated and ascertained damages. The Contractor may request an administrative reconsideration of any amount deducted as damages pursuant to subsection (h) of this part.
- (g) ENFORCEMENT. The Department reserves the right to withhold payment to the Contractor to enforce the provisions of this Special Provision. Final payment shall not be made on the contract until such time as the Contractor submits sufficient documentation demonstrating achievement of the goal in accordance with this Special Provision or after liquidated damages have been determined and collected.
- (h) RECONSIDERATION. Notwithstanding any other provision of the contract, including but not limited to Article 109.09 of the Standard Specifications, the Contractor may request administrative reconsideration of a decision to deduct the amount of the goal not achieved as liquidated damages. A request to reconsider shall be delivered to the Contract Compliance Section and shall be handled and considered in the same manner as set forth in paragraph (c) of "Good Faith Effort Procedures" of this Special Provision, except a final decision that a good faith effort was not made during contract performance to achieve the goal agreed to in the Utilization Plan shall be the final administrative decision of the Department. The result of the reconsideration process is not administratively appealable to the U.S. Department of Transportation.

PROGRESS PAYMENTS (BDE)

Effective: November 2, 2013

Revise Article 109.07(a) of the Standard Specifications to read:

“(a) Progress Payments. At least once each month, the Engineer will make a written estimate of the quantity of work performed in accordance with the contract, and the value thereof at the contract unit prices. The amount of the estimate approved as due for payment will be vouchered by the Department and presented to the State Comptroller for payment. No amount less than \$1000.00 will be approved for payment other than the final payment.

Progress payments may be reduced by liens filed pursuant to Section 23(c) of the Mechanics’ Lien Act, 770 ILCS 60/23(c).

If a Contractor or subcontractor has defaulted on a loan issued under the Department’s Disadvantaged Business Revolving Loan Program (20 ILCS 2705/2705-610), progress payments may be reduced pursuant to the terms of that loan agreement. In such cases, the amount of the estimate related to the work performed by the Contractor or subcontractor, in default of the loan agreement, will be offset, in whole or in part, and vouchered by the Department to the Working Capital Revolving Fund or designated escrow account. Payment for the work shall be considered as issued and received by the Contractor or subcontractor on the date of the offset voucher. Further, the amount of the offset voucher shall be a credit against the Department’s obligation to pay the Contractor, the Contractor’s obligation to pay the subcontractor, and the Contractor’s or subcontractor’s total loan indebtedness to the Department. The offset shall continue until such time as the entire loan indebtedness is satisfied. The Department will notify the Contractor and Fund Control Agent in a timely manner of such offset. The Contractor or subcontractor shall not be entitled to additional payment in consideration of the offset.

The failure to perform any requirement, obligation, or term of the contract by the Contractor shall be reason for withholding any progress payments until the Department determines that compliance has been achieved.”

WEEKLY DBE TRUCKING REPORTS (BDE)

Effective: June 2, 2012

Revised: April 2, 2015

The Contractor shall submit a weekly report of Disadvantaged Business Enterprise (DBE) trucks hired by the Contractor or subcontractors (i.e. not owned by the Contractor or subcontractors) that are used for DBE goal credit.

The report shall be submitted to the Engineer on Department form "SBE 723" within ten business days following the reporting period. The reporting period shall be Monday through Sunday for each week reportable trucking activities occur.

Any costs associated with providing weekly DBE trucking reports shall be considered as included in the contract unit prices bid for the various items of work involved and no additional compensation will be allowed.

REVISIONS TO THE ILLINOIS PREVAILING WAGE RATES

The Prevailing rates of wages are included in the Contract proposals which are subject to Check Sheet #5 of the Supplemental Specifications and Recurring Special Provisions. The rates have been ascertained and certified by the Illinois Department of Labor for the locality in which the work is to be performed and for each craft or type of work or mechanic needed to execute the work of the Contract. As required by Prevailing Wage Act (820 ILCS 130/0.01, et seq.) and Check Sheet #5 of the Contract, not less than the rates of wages ascertained by the Illinois Department of Labor and as revised during the performance of a Contract shall be paid to all laborers, workers and mechanics performing work under the Contract. Post the scale of wages in a prominent and easily accessible place at the site of work.

If the Illinois Department of Labor revises the prevailing rates of wages to be paid as listed in the specification of rates, the contractor shall post the revised rates of wages and shall pay not less than the revised rates of wages. Current wage rate information shall be obtained by visiting the Illinois Department of Labor web site at <http://www.state.il.us/agency/idol/> or by calling 312-793-2814. It is the responsibility of the contractor to review the rates applicable to the work of the contract at regular intervals in order to insure the timely payment of current rates. Provision of this information to the contractor by means of the Illinois Department of Labor web site satisfies the notification of revisions by the Department to the contractor pursuant to the Act, and the contractor agrees that no additional notice is required. The contractor shall notify each of its subcontractors of the revised rates of wages.
