Point 12' NE of centerline of relocated track per deed (tracks may have been moved since date of deed) - SEE NOTE 1

FOR INFORMATION ONLY

Note 1:

The surveyor finds conflicting information in re-establishing the angle point in the south line of the total holding. The deed description describes this point on the north line of the 1929 track agreement, at a point 12' northeast of the centerline of the railroad track, and at a point on the south quarter section line at a point 125.22 feet west of the east line of the west half of the northeast quarter. The surveyor has established the angle point on the quarter section line at a point 125.22 feet west of the east line of the west half of the northeast quarter per the deed, but this location does not fit the 12 foot distance to the centerline of the current railroad tracks.
