Designer Note: Drainage holes should be provided when constructing medians, traffic islands, or curb on existing pavement to facilitate drainage and prevent water ponding.

DRAINAGE HOLES

Effective July 1, 1990

Revised January 1, 2007

At locations where medians, traffic islands, or curbs are to be constructed over the existing pavement, drainage holes shall be broken or cut through the existing pavement along the backs of the curbs at 20-foot (6-meter) intervals and at all low points in the grade. The holes shall each be approximately 1 Square Foot (0.1 Square Meter) in area.

This work will not be paid for separately but shall be considered as included in the cost of the various items of construction.
