635.00

Designer Note: To be used in conjunction with Traffic Control and Protection Standards that require flexible delineators. Discuss usage/special requirements and estimate of replacement bases (only) with Operations (Traffic) before including. The replacement/repair of the flexible delineator tube itself is considered as included in the cost of the TC&P standard unit price.

*Fill in appropriate standard number.

FLEXIBLE DELINEATOR MAINTENANCE

Effective May 5, 1992

Revised January 1, 1994

This item shall consist of all material and labor necessary to maintain the base of the flexible delineators required as part of Traffic Control and Protection, Standard.*

The re-attachment of the flexible delineator to the base shall be considered incidental to Traffic Control and Protection, Standard.*

Any unit which needs repair because the attachment of the base to the pavement failed within 120 hours after installation shall be re-attached by the Contractor at his expense.

The quantity listed in the contract is only an estimate of the anticipated number of units requiring repair.

FLEXIBLE DELINEATOR MAINTENANCE will be paid for in accordance with Article 109.04 of the Standard Specifications and shall consist of maintaining the flexible delineator bases required as part of Traffic Control and Protection, Standard.*
