GENERAL NOTES

* Coarse aggregate to be used in parapet handrails and end posts must be absolutely free of chert, flint, limonite, lignite and soft sandstone.

The concrete floor slab shall be finished in accordance with Article 91.19 of the Standard Specifications.

Slope wall shall be reinforced with welded wire fabric 6"x6" mesh, weighing 58# per 100 sq. ft.

All reinforcement bars shall be lapped 20 diameters unless otherwise shown.

Rivets ⅞" ø, open holes 1⅜" unless otherwise noted.

Anchor bolts shall be set before before riveting diaphragms and cross frames over supports.

The exposed surfaces of the expansion guard shall be given two shop coats of red lead paint. The contact surfaces shall be given one coat of red lead paint. Anchor studs shall not be painted.

Expansion guards are included in the quantity of structural steel. Estimated weight = 8,690 lbs.

Except as otherwise provided, all structural steel shall receive one shop coat of red lead paint and two field coats of aluminum paint. See Article 56.1 to 56.5 inclusive of the Standard Specifications.

The Contractor shall drive two test piles. One concrete test pile in a permanent location in the south east abutment and one timber test pile near Pier 2W as directed by the Engineer before ordering remainder of piles.

Concrete piles at abutments shall be driven in holes precored through the embankment in accordance with Article 601(c) of the Standard Specifications.

Permanent forms will not be permitted in forming the concrete floor.

All material for the proposed lighting of the Kirchoff Road sidewalks and the Route 53 structure decks shall, with the exception of the anchor bolts and the conduit, be furnished and installed under the provisions of future contracts.

The Contractor shall pour the full width of the concrete decks in the end units before pouring the center unit deck between the hinge joints.

Reinforcement bars designated thus: 26 x 6 indicates 26 lines of bars with 6 lengths per line.

Except as otherwise provided, all Structural Steel shall conform to A.S.T.M. Specifications - designation A-36.

Wherever in these plans reference is made to "Standard Specifications" it is understood to include the "Supplemental Specifications," effective Apr. 2, 1962.

NOTE -3 - 7/16"ϕ vent holes @ 12" o.c. -16" gage.
NOTE -4 - 6" non-metalic water seal - Place 3 1/2" below top of slab.

DESIGNED	James J. Warning	
CHECKED	J. B. Nolan	
DRAWN	James J. Warning	
CHECKED	B. H.	

SEPT 22 1962
EXAMINED W. E. Bergmann, Engineer of Bridge and Traffic Structures
PASSED
APPROVED R. R. Bartelmeyer, Director of Highways

DIMENSION "t"
After all structural steel has been erected, elevations of the top flange of the beams shall be taken at intervals shown on sheet 3. These elevations subtracted from the "Grade Elevations Adjusted for Dead Load Deflections" shown on sheets 3, 4 & 5, minus slab thickness, equals the fillet height "t" above top of beams.

FILLET DETAIL

** Includes Class X Concrete and Reinforcement bars used in parapet - See sh. 10
● Weight of bearing assemblies (including lead plate and anchor bolts) and open joint expansion devices are included as structural steel.
Est. Wt. (bearings) 13,910
Est. Wt. (expan. Jt.) 27,360

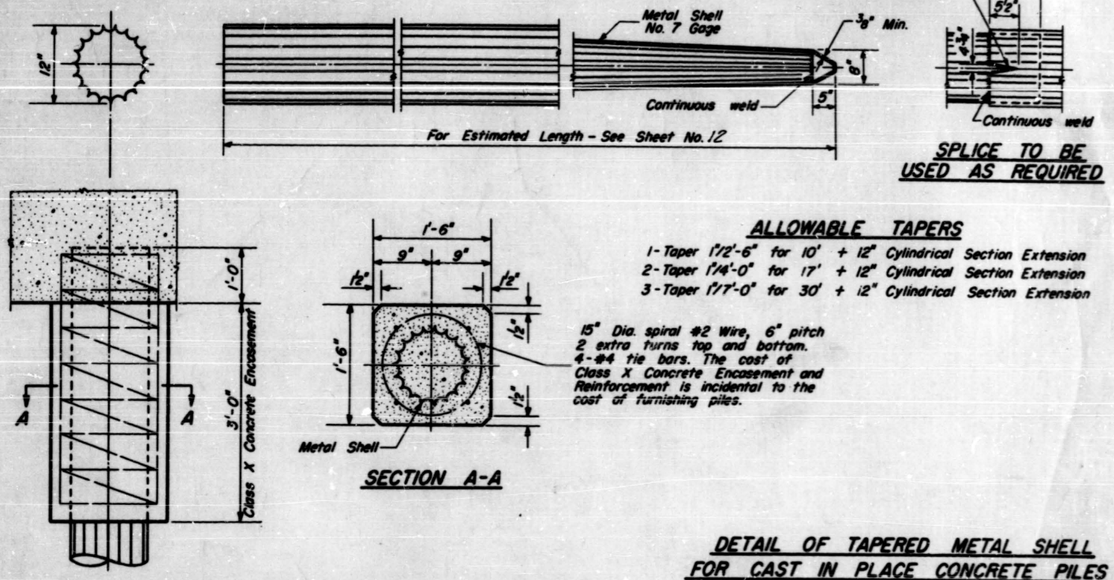
DETAIL OF CYLINDRICAL STEEL SHELL FOR CAST IN PLACE CONCRETE PILES



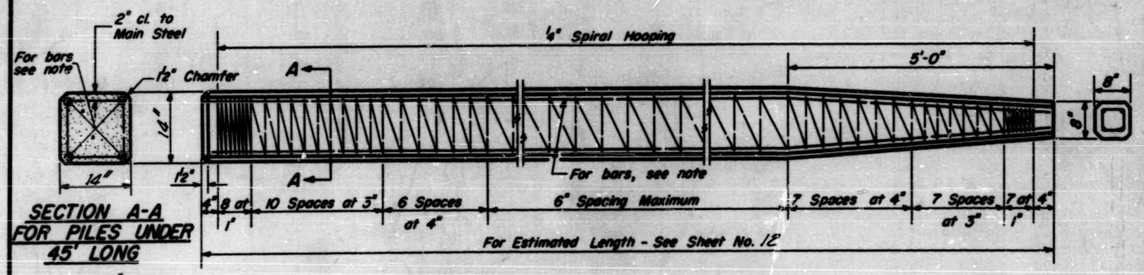
SECTION A-A

SPLICE TO BE USED AS REQUIRED

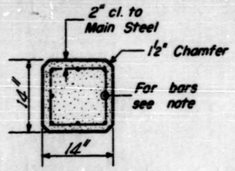
ALLOWABLE TAPERS

1-Taper 1'12'-6" for 10' + 12" Cylindrical Section Extension
2-Taper 1'14'-0" for 17' + 12" Cylindrical Section Extension
3-Taper 1'17'-0" for 30' + 12" Cylindrical Section Extension

DETAIL OF TAPERED METAL SHELL FOR CAST IN PLACE CONCRETE PILES



SECTION A-A FOR PILES UNDER 45' LONG



SECTION A-A FOR PILES 45' OR MORE

Note: For 14" Piles 45' long or more use 8-#8 bars 4 for the full length and 4 to the point of bevel. For 14" Piles under 45' long use 4-#9 bars the full length.

Handling: For Pile lengths up to 45', use two slings placed at a distance of 0.21 L* from each end. For Piles longer than 45', use three slings placed at a distance of 0.12 L* from each end and at mid-point of pile.

*L = Over all length of pile to be handled.
