CONTRACT NO. 78020

STATE OF ILLINOIS
DEPARTMENT OF TRANSPORTATION

GENERAL NOTES

The term "Beam End" is used in this document to indicate all structural steel within 5 feet (measured along the beam) of either side of a deck joint, unless otherwise noted. Beam End locations are shown on the general elevation view of each structure.

Cleaning and painting shall conform to the requirements of special provision "Cleaning And Painting Existing Steel Structures". Near White Metal Blast Cleaning - SSPC - SP10 and Paint System 1 - OZ / E / U shall be used unless otherwise noted.

SSPC - QP1 and SSPC - QP2 Painting Contractor Certifications are required.

The color of the final finish coat shall be Gray, Munsell No. 5B 7/1, except the color of the final finish coat for outside surfaces of fascia beams shall be Interstate Green, Munsell No. 7.5G 4 / 8.

044-0041 & 044-0042

Beam Ends and exterior surfaces of fascia beams, including the bottom of the bottom flange, shall be painted on each structure. See Beam End locations on Sheets 6 and 11 of 35.
Painting of existing new bearings is not required.
Seismic shock absorbers are present at the Beam Ends on Structure 044-0042. The Contractor shall use care to avoid damage or disturbance of these devices.
A minimum of 3 air monitors are required when work is performed at only one bridge.
A minimum of 4 air monitors are required when work is performed at both bridges simultaneously.

044-0049 & 044-0050

Beam Ends and exterior surfaces of fascia beams, including the bottom of the bottom flange, shall be painted on each structure. See Beam End locations on Sheets 16 and 20 of 35.
Painting of existing new bearings is not required.
A minimum of 3 air monitors are required when work is performed at only one bridge.
A minimum of 4 air monitors are required when work is performed at both bridges simultaneously.

100-0059

All structural steel shall be painted.
A minimum of 1 air monitor is required when work is performed at this site.

100-0060

All structural steel shall be painted.

All reinforcement shown.

Fasteners shall be high strength bolts. Bolts ⅞"; open holes 15/16", unless otherwise noted.

Calculated weight of Structural Steel. = 161,170 Lbs

The Basic Lead Silico Chromate paint system shall be used for shop and field painting of structural steel.

Field welding of construction accessories will not be permitted to the bottom flange of beams or girders nor to the top flange for a distance equal to one-fourth the span length each way from the pier supports. Field welding in other areas will be permitted only when approved by the Engineer.

Anchor bolts shall be set before bolting diaphragms over supports.

Slope wall shall be reinforced with welded wire fabric 6" x 6" mesh, weighing 58# per 100 sq. ft.

The embankment configuration shown shall be the minimum embankment that must be constructed prior to construction of the abutments.

The concrete rail section above the mandatory construction joint at the top of the slab shall be constructed of Class X Concrete, except the aggregates shall conform to the requirements of Handrail Concrete.

The Contractor shall drive 1 steel test pile (8 BP 36) at North Abutment Westbound lanes and Pier #2 Eastbound lanes respectively as directed by the Engineer before ordering the remainder of piles.

Rivets ¾" φ, open holes 15/16 φ, unless otherwise noted.

Diaphragm connections may be adapted to shop welding subject to approval by the Engineer.

The basic Lead Silico Chromate paint system shall be used for shop and field painting of structural steel.

Field welding of construction accessories will not be permitted to the bottom flange of beams or girders nor to the top flange for a distance equal to one-fourth the span length each way from the pier supports. Field welding in other areas will be permitted only when approved by the Engineer.

Anchor bolts shall be set before riveting diaphragms over supports.

Slope wall shall be reinforced with welded wire fabric 6"x6" mesh, weighing 58# per 100 sq. ft.

Layout of slope walls may be varied in the field to suit ground conditions as directed by the Engineer.

The Contractor shall drive 1 steel test pile each in permanent locations at west abutment carrying west bound lanes and at the east abutment carrying east bound lanes as directed by the Engineer before ordering the remainder of piles.

Class A Excavation for structures includes excavation for slope wall.

The embankment configuration shown shall be the minimum embankment that must be constructed prior to construction of the abutments.

The concrete rail section above the mandatory construction joint at the top of the slab shall be constructed of Class X Conc. except the aggregates shall conform to the requirements of Handrail Conc.

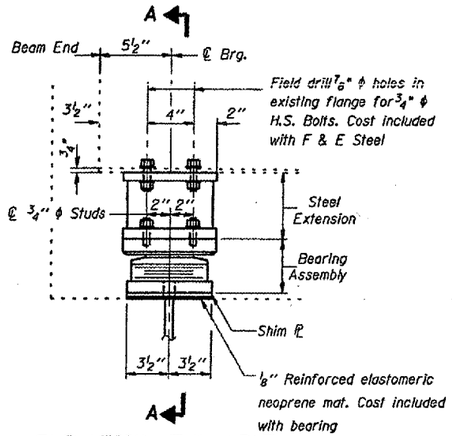
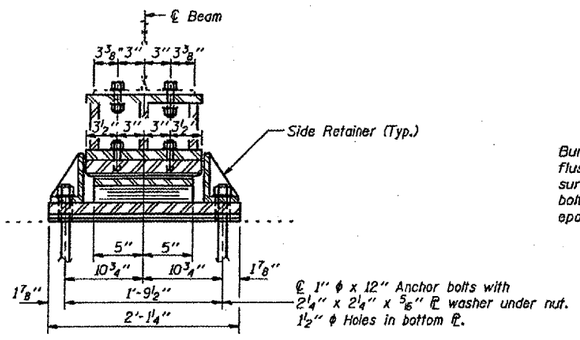
TYPE II TFE ELASTOMERIC EXP. BRG.



ELEVATION AT W. ABUT.



SECTION A-A

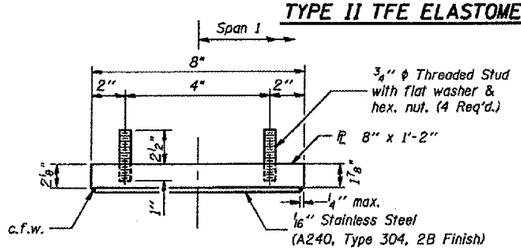
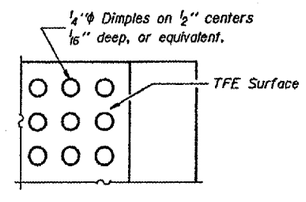
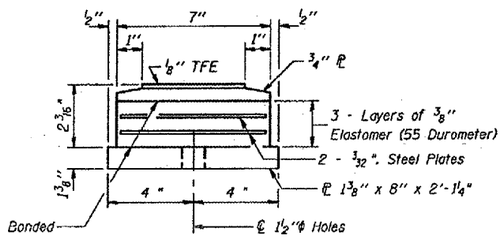
Notes: See sheet 150 for Anchor Bolt installation.



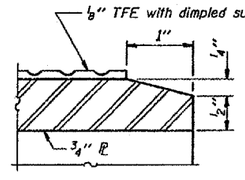
TOP BEARING ASSEMBLY



PLAN-TFE SURFACE



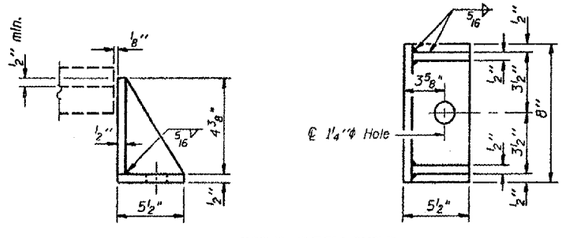
BOTTOM BEARING ASSEMBLY



Note: The ⅛" TFE sheet shall be bonded directly to the top steel plate with a two-component, medium viscosity epoxy resin, conforming to the requirements of the Federal Specification MMM-A-134, Type I. The bond agent shall be applied on the full area of the contact surfaces.

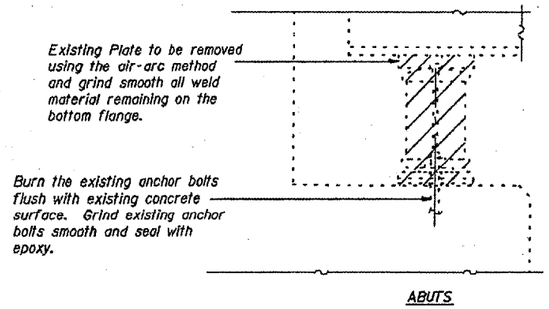
Bonding of ⅛" TFE sheet during vulconizing process will be permitted provided the process and method of adjusting assembly height is approved by the Engineer.

SECTION THRU TFE



SIDE RETAINER

Equivalent rolled angle with stiffeners will be allowed in lieu of welded plates.



ABUTS

EXISTING BEARING REMOVAL DETAILS

Cost is included with Jack and Remove Existing Bearings

Notes: Prior to ordering any material, the Contractor shall verify in the field all bearing height and shim thickness dimensions.
The minimum jack capacity required is 30 Tons.
New steel extensions, side retainers, connection bolts, anchor bolts, and shim plates are included in "Furnishing and Erecting Structural Steel".
Hatched areas indicate Jack and Remove Existing Bearings.
Existing diaphragm removal may be required to provide clearance for the drill during drilling holes in the bottom flange for new bearing attachment. Cost shall be included in the cost of "Furnishing and Erecting Structural Steel".

2. FASTENERS SHALL BE HIGH STRENGTH BOLTS. BOLTS 3/4" ϕ, OPEN HOLES 13/16" ϕ, UNLESS OTHERWISE NOTED.
3. CALCULATED WEIGHT OF STRUCTURAL STEEL = 682,040 LBS.
4. THE BASIC LEAD SILICO CHROMATE PAINT SYSTEM SHALL BE USED FOR SHOP AND FIELD PAINTING OF STRUCTURAL STEEL.
5. FIELD WELDING OF CONSTRUCTION ACCESSORIES WILL NOT BE PERMITTED TO THE BOTTOM FLANGE OF GIRDERS NOR TO THE TOP FLANGE FOR A DISTANCE EQUAL TO ONE-FOURTH THE SPAN LENGTH EACH WAY FROM THE PIER SUPPORTS. FIELD WELDING IN OTHER AREAS WILL BE PERMITTED ONLY WHEN APPROVED BY THE ENGINEER.
6. ANCHOR BOLTS SHALL BE SET BEFORE BOLTING CROSS FRAMES OVER SUPPORTS.
7. SLOPE WALL SHALL BE REINFORCED WITH WELDED WIRE FABRIC 6" X 6" MESH, WEIGHING 56# PER 100 SQ. FT.
8. THE CONTRACTOR SHALL DRIVE ONE SKEL TEST PILE IN A PERMANENT LOCATION AT THE PIER AND AT EACH ABUTMENT AS DIRECTED BY THE ENGINEER BEFORE ORDERING THE REMAINDER OF PILES.
9. AN ALTERNATE STRAND PATTERN USING EXTRA HIGH STRENGTH PRESTRESSING STRAND (270 K.S.I.) IS PERMITTED.

BILL OF MATERIAL

ITEM	UNIT	SUB-STRUCT.	SUPER-STRUCT.	TOTAL

BILL OF MATERIAL-BRG'S		
Item	Unit	Quantity
Carbon Steel	Lbs.	2740
Cast Steel	Lbs.	9780
Total	Lbs.	12,520

No's:
Pins, Steel ℞s, Bolts, Anchor Bolts and Lead ℞s are included in Carbon Steel.
The above quantities are included in Structural Steel on Sht. 3
Cast Steel shall be Class 70. Structural steel weldments of equal sections and meeting ASTM A 36 may be substituted for castings at the option of the Contractor, subject to approval by the Engineer prior to fabrication. No additional compensation will be allowed the Contractor for this substitution.

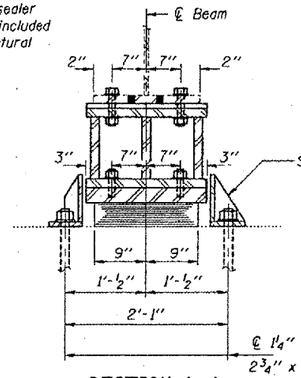
Use exist. holes in exist. flange for 4-1" ϕ H.S. Bolts. Fill remaining holes in existing flange ℄ with silicone sealer suitable for structural steel. Cost included with Furnishing and Erecting Structural Steel.

ELEVATION AT ABUTMENTS



℄ 1¼" ϕ x 15" Anchor bolts with 2¾" x 2¾" x 5/16" ℄ washer under nut.

SECTION A-G

Notes:

New steel extensions, side retainers, shim ℄'s, connection bolts, and anchor bolts are included with Furnishing and Erecting Structural Steel.

See Sheet 6 of 6 for Anchor Bolt installation.

Prior to ordering any material, the Contractor shall verify in the field all bearing height, shim thickness dimensions and side retainer clearance to the backwall.

Min. jack capacity = 95 Tons.
