

# Illinois Department of Transportation

2300 South Dirksen Parkway / Springfield, Illinois / 62764

February 29, 2008

**SUBJECT: GALENA RIVER TRAIL**

Project HD-85(42)  
Section 06-00042-00-BT (Galena)  
JoDaviess County  
Contract No. 85417  
Item 96  
March 7, 2008 Letting  
Addendum (A)

**TO PROSPECTIVE BIDDERS:**

Due to clarify information necessary to revise the following:

**Plans – Sheet 3 & 5.**

**Proposal – Schedule of Prices, Index of Special Provisions and page 7 of the Special Provisions.**

Prime contractors must utilize the enclosed material when preparing their bid and must include any Schedule of Prices changes in their bidding proposal.

Bidders using computer-generated bids are cautioned to reflect any and all Schedule of Prices changes, if involved, into their computer programs.

Very truly yours,

Eric Harm  
Interim Engineer of Design and Environment

7	AGGREGATE BASE COURSE, TYPE A

*Revised 2-29-08*

The Local Agency will accept responsibility for the accuracy of the initial control points as provided herein.

- (h) It is not the responsibility of the Local Agency, except as provided herein, to check the correctness of the Contractor's stakes; any errors apparent will be immediately called to the Contractor's attention and s(he) shall be required to make the necessary correction before the stakes are used for construction purposes.
- (j) Where the plan quantities for excavation are to be used as the final pay quantities, the Local Agency will make sufficient checks to determine if the work has been completed in conformance with the plan cross sections.

Responsibility of the Contractor.

- (a) The Contractor shall establish from the given survey points and bench marks all the control points necessary to construct the individual project elements. S(he) shall provide the Engineer adequate control in close proximity to each individual element to allow adequate checking of construction operations. This includes, but is not limited to, line and grade stakes, line and grade nails in form work, and or/filed or etched marks in substantially completed construction work. It is the Contractor's responsibility to tie in centerline control points in order to preserve them during construction operations.
- (b) At the completion of the grading operations, the Contractor shall set stakes at 25 m (100 ft.) Station intervals along each profile grade line. These stakes will be used for final cross sectioning by the Local Agency.
- (c) The Contractor shall locate the right of way points for the installation of right of way markers. The Contractor shall set all line stakes for the construction of fences by the Contractor.
- (d) All work shall be in accordance with normally accepted self-checking surveying practices. Field notes shall be kept in standard survey field notebooks and those books shall become the property of the Local Agency at the completion of the project. All notes shall be neat, orderly and in accepted form.
- (e) For highway structure staking, the Contractor shall use diligent care and appropriate accuracy. Points shall be positioned to allow reuse throughout the construction process. Prior to the beginning of construction activities, all structure centerlines and pier lines are to be established by the Contractor and checked by the Engineer. The Contractor shall provide a detailed structure layout drawing showing span dimensions, staking lines and offset distances.

Measurement and Payment. This item will be paid for at the contract lump sum price for CONSTRUCTION LAYOUT.

**AGGREGATE BASE COURSE, TYPE A**

This work shall consist of furnishing and placing an Aggregate Base Course, Type A, on a prepared subgrade or subbase according to Section 351.

Basis of Payment. This work will be paid for at the contract unit price per TON for AGGREGATE BASE COURSE, TYPE A, of the thickness specified.
