SURVEY MONUMENT COVER ASSEMBLY

Effective: February 5, 1975

Revised: November 1, 2006

This item shall consist of furnishing and placing a survey monument cover assembly as shown and specified in the plans at all section, sub-section monuments, landmarks, and pavement alignment control points that might occur in the pavement.

The Contractor may be directed by the Engineer to remove existing hot-mix asphalt surface in trying to relocate and re-establish such monuments or landmarks in the original pavement. All exploration work will not be paid for separately, but shall be considered included in the cost of the contract.

The Survey Monument Cover Assembly (attached) may require modifications to accommodate the total thickness of hot-mix asphalt surface, existing and/or proposed, on the concrete pavement. In the event the total thickness is greater than 3 in (76 mm), the Contractor may attach a metal cylinder, in a manner meeting the approval of the Engineer, to accommodate the additional height required. In the event the thickness of proposed resurfacing is less than 3 in (76 mm) the Contractor shall have the option of coring the existing pavement to the depth required to install the assembly or the Contractor may remove the bottom portion of the assembly and attach a metal flange 1 in (25 mm) minimum in width to insure proper seating.
