The City of South Elgin atlas pages indicates the existing force main material as PVC, which is non-toneable and marked as Utility Quality Level "D".

The AT&T locations depicted have been obtained through the application of geophysical methods to determine the existence and approximate horizontal position of these facilities. However, AT&T will not provide TBE Group, Inc. with utility records nor allow access to their field closures (pedestals/manholes etc.), to help verify the locations of their existing underground facilities. Therefore, TBE is unable to verify the completeness of the AT&T locations depicted in accordance with the CVASCE Standard 38-02.

Utilities shown in color on these plans as depicted in the legend have been investigated by TBE Group, Inc in accordance with SUE Industry Standards. All other information shown has been provided to TBE Group, Inc by others. TBE's SUE QL "B" field investigation was performed from 3/24/08 to 6/13/08. TBE's SUE QL "A" field investigation was performed on 3/23/09. Changes to utilities after 6/13/08 may have been made and therefore may result in variances from this plan. Consideration should be given to updating this plan if deemed advisable prior to final design and construction.
