

Illinois Department of Transportation

2300 South Dirksen Parkway / Springfield, Illinois / 62764

June 4, 2012

SUBJECT: FAP Route 317 (US 24)
Project NHF-0317 (094)
Section 16 W-1, RS-3
Fulton County
Contract No. 88795
Item No. 54, June 15, 2012 Letting
Addendum A

NOTICE TO PROSPECTIVE BIDDERS:

Attached is an addendum to the plans or proposal. This addendum involves revised and/or added material.

1. Replaced the Schedule of Prices.
2. Revised sheets 19 and 41 of the Plans.
3. Revised page iii of the Table of Contents to the Special Provisions.
4. Added pages 158 and 159 to the Special Provisions.

Prime contractors must utilize the enclosed material when preparing their bid and must include any Schedule of Prices changes in their bidding proposal.

Bidders using computer-generated bids are cautioned to reflect any and all Schedule of Prices changes, if involved, into their computer programs.

Very truly yours,

John D. Baranzelli, P. E.
Acting Engineer of Design and Environment

A handwritten signature in cursive script, appearing to read 'Ted B. Walschleger', followed by the initials 'P.E.'.

By: Ted B. Walschleger, P. E.
Engineer of Project Management

Revised 06/04/12

REMOVAL AND DISPOSAL OF REGULATED SUBSTANCES

This work shall be according to Section 669 of the Standard Specifications and the following:

Revise the second and third sentence of the first paragraph of Article 669.08 to read: "The affected area shall be monitored with a photo ionization detector (PID) utilizing a lamp of 10.6 eV or greater or an instrument with a flame ionization detector (FID). Any reading on the PID or FID in excess of background levels indicates the potential presence of contaminated material requiring it to be properly managed as either a non-special waste, non-hazardous special waste, or hazardous waste."

Revise the fourth and fifth sentence of the second paragraph of Article 669.08 to read: "When the analytical results indicate that detected levels are at or below the most stringent maximum allowable concentration (MAC) for chemical constituents in uncontaminated soil established pursuant to the proposed Subpart F of 35 Illinois Administrative Code (IAC) 1100.605, the soil excavated shall be included in the storm sewer or earth excavation, as appropriate, and backfill shall be in accordance to Article 205 and/or 208. When the analytical results indicate that detected levels are above the most stringent MAC for chemical constituents in uncontaminated soil established pursuant to the proposed Subpart F of 35 IAC 1100.605, the soil excavated shall be considered a waste and managed appropriately."

Qualifications. The term environmental firm shall mean an environmental firm with at least five (5) documented leaking underground storage tank (LUST) cleanups or that is pre-qualified in hazardous waste by the Department. Documentation includes but not limited to verifying remediation and special waste operations for sites contaminated with gasoline, diesel, or waste oil in accordance with all Federal, State, or local regulatory requirements and shall be provided to the Engineer for approval. The environmental firm selected shall not be a former or current consultant or have any ties with any of the properties contained within and/or adjacent to this construction project.

General. This Special Provision will likely require the Contractor to subcontract for the execution of certain activities.

All contaminated materials shall be managed as non-special waste. This work shall include monitoring and potential sampling, analytical testing, and management of a material contaminated by regulated substances. The Environmental Firm shall continuously monitor soil excavation for worker protection and soil contamination. **Phase I Preliminary Engineering information is available through the District's Environmental Studies Unit.** Soil samples or analysis without the approval of the Engineer will be at no additional cost to the Department.

- A) The Contractor shall manage and dispose of all soils excavated within the following areas as classified below. The lateral distance is measured from centerline and the farthest distance is the offset distance or construction limit whichever is less.
1. Station 889+00 to Station 890+80 0 to 60 feet RT (Vacant Building, Site 2208-11, 1009-1011 East Broadway) – non-special waste. Contaminants of concern sampling parameters: BETX, PNAs, and Lead.
 2. Station 926+00 to Station 926+25 0 to 60 feet LT (Storage Building, Site 2208-37, 112 West Broadway) – non-special waste. Contaminants of concern sampling parameters: BETX and PNAs.

Added 06/04/12

B) The Contractor shall manage any excavated soils and sediment **within the construction limits of this project as fill**. Although the soil concentrations may exceed the Maximum Allowable Concentrations (MACs) of Chemical Constituents in Uncontaminated Soils, they can be utilized within the construction limits as fill because the roadway is not considered a residential property. All storm sewer excavated soils can be placed back into the excavated trench as backfill unless trench backfill is specified. If the soils cannot be utilized within the construction limits as fill then they must be managed off-site as a non-special waste. The following areas can be managed within the construction limits as fill.

1. Station 883+70 to Station 887+60 0 to 60 feet RT (Hammond's Recycling & Garage, Site 2208-6, 1029 East Broadway) – non-special waste. Contaminants of concern sampling parameters: Arsenic.
2. Station 886+00 to Station 888+60 0 to 60 feet LT (Brass Nuts, Site 2208-8, 1000 block of East Broadway) – non-special waste. Contaminants of concern sampling parameters: Arsenic.
3. Station 888+60 to Station 891+00 0 to 60 feet LT (Hamblin's Gas & Snaks/Hamblin's Service, Site 2208-10, 1012 East Broadway) – non-special waste. Contaminants of concern sampling parameters: Arsenic.
4. Station 915+70 to Station 916+40 0 to 60 feet RT (Residence, Site 2208-24, 225-233 East Broadway) – non-special waste. Contaminants of concern sampling parameters: Arsenic.
5. Station 918+00 to Station 919+40 0 to 60 feet LT (Vacant Building, Site 2208-26, 216 East Broadway) – non-special waste. Contaminants of concern sampling parameters: Arsenic.
6. Station 921+20 to Station 921+95 0 to 60 feet LT (Storage Building, Site 2208-29, 120 East Broadway) – non-special waste. Contaminants of concern sampling parameters: Arsenic.
7. Station 921+95 to Station 922+40 0 to 60 feet LT (Little Monsters, Site 2208-30, 118 East Broadway) – non-special waste. Contaminants of concern sampling parameters: Arsenic.
8. Station 923+15 to Station 923+80 0 to 60 feet RT (Storage Building, Site 2208-31, 101-119 East Broadway) – non-special waste. Contaminants of concern sampling parameters: Arsenic.
9. Station 926+25 to Station 926+50 0 to 60 feet LT (Private Storage/Personal Garage, Site 2208-38, 114 West Broadway) – non-special waste. Contaminants of concern sampling parameters: Arsenic.
10. Station 0+80 to Station 1+30 0 to 60 feet LT (Studio Screens Express, Site 2208-44, 206 West Broadway) – non-special waste. Contaminants of concern sampling parameters: Arsenic.
11. Station 3+50 to Station 5+00 0 to 60 feet LT (Klide's Fast Stop, Site 2208-49, 304 West Broadway) – non-special waste. Contaminants of concern sampling parameters: Arsenic.
