- VR: Maximum  $\dot{L}$  + impact horizontal shear range within the composite portion of the span for stud shear connector design (kips).

NOTES:

- N.T.R. designates members subject to the supplemental requirements for notch toughness (Zone 2).
- All structural steel for beams shall be AASHTO M270 Grade 50.
- Fasteners shall be high strength bolts, conforming to AASHTO M-164 Specification (ASTM A 325). Bolts  $\frac{7}{8}$ " $\phi$ , open holes  $\frac{7}{16}$ " $\phi$ , unless noted otherwise.
- Two hardened washers are required over all oversized holes.
- Number of shear connectors required, 108 beams x 6 = 648.
