INSTALLATION AND SETTING METHODS

"A": Set bar splicer assembly by means of a template bolt.
 "B": Set bar splicer assembly by nailing to wood forms or cementing to steel forms.
 (E): Indicates epoxy coating.

** Bar splicers shall be furnished and paid for during Stage I construction. Bar Splicer coupler ends shall be furnished and installed during Stage I construction (SN 016-7943). Bar splicer rod ends shall be furnished during Stage I construction and stored by the Department until installation during Stage II construction (SN 016-7942). The Contractor shall obtain the Bar Splicer rod ends from the Department and install them during Stage II construction. Bar Splicers will be paid for at the unit cost per each Bar Splicer, where each bar splicer includes both the coupler and the rod end. Bar Splicer rod ends will not be measured for payment separately from coupler ends and the cost for installing the Bar Splicer rod ends shall be included with the pay item for Reinforcement Bars, Epoxy Coated during Stage II Construction.
