STABILIZED CONSTRUCTION ENTRANCE PLAN

PLAN VIEW

SIDE ELEVATION

- NOTES:
- 1 Filter fabric shall meet the requirements of material specification 592 GEOTEXTILE, Table 1 or 2, Class , or and shall be placed over the cleared area prior to the placing of rock.
 2. Rock or reclaimed concrete shall meet one of the following IDOT coarse aggregate gradation, CA-1, CA-2, CA-3 or CA-4 and be placed according to construction specification 25 ROCKFILL using placement Method 1 and Class compaction.
 3. Any drainage facilities required because of washing shall be constructed according to manufacturers specifications.
 4. If wash racks are used they shall be installed according to the manufacturer's specifications.

PORTABLE SEDIMENT TANK PLAN

SECTION ON CENTERLINE

TYPICAL SECTION A-A

- NOTES:
1. Clean out the sediment tank when one-third filled with sediment.
 2. Steel drums are used as an example due to their ready availability. Any tanks may be used, providing that the volume requirements are met.
 3. All sediment collected in the tank shall be disposed of in a sediment trapping device or as approved by the engineer/inspector.

Volume required in tank: _____ cubic feet.

SUMP PIT PLAN

SECTION

- NOTES:
1. Pit dimensions are optional.
 2. The standpipe will be constructed by perforating a 12"-24" diameter corrugated metal or PVC pipe.
 3. A base of 2" aggregate will be placed in the pit to a minimum depth of 12". After installing the standpipe, the pit surrounding the standpipe will then be backfilled with 2" aggregate.
 4. The standpipe will extend 12" to 18" above the lip of the pit.
 5. If discharge will be pumped directly to a storm drainage system, the standpipe will be wrapped with filter fabric before installation.
 6. If desired, 1/4"-1/2" hardware cloth may be placed around the standpipe prior to attaching the filter fabric. This will increase the rate of water seepage into the pipe.
