UTILITIES TO BE WATCHED AND PROTECTED

The areas of concern noted below have been identified by following the suggested staging plan included for the contract. The information provided is not a comprehensive list of all remaining utilities, but those which during coordination were identified as ones which might require the Department's contractor to take into consideration when making the determination of the means and methods that would be required to construct the proposed improvement. In some instances, the contractor will be responsible to notify the owner in advance of the work to take place so necessary staffing on the owner's part can be secured.

Existing Everstream facilities within the limits of the construction to protected from damage by the contractor.

Existing Nicor facilities within the limits to be protected from damage by contractor. Please contact Mr. Frank Tanzillo, Superintendent-Construction Operations at (815) 261-9418 with field inquiries during construction if needed.

Existing ComEd facilities within the limits to be protected from damage by the contractor. If large equipment will be used near existing overhead lines, facility protection may be required. If facility protection is required, please call 1-800-334-7661 to create a ticket for line protection as soon as possible.

The contractor shall use utmost care to watch and protect the existing junction box and fiber located on the bridge during construction.

Stage 1
